See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
 Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

<p>Total area of clearing proposed (hectares)</p>	<p>2.68</p> <p style="text-align: right; border: 2px solid red; padding: 2px;">REVISED TO 2.08 HECTARES</p> <p>On the attached 'Deposited Plan 421084' the project area is shown as 'Enlargement D' and 'Enlargement E.'</p> <p>On the attached 'Little Bay Road Reserve' the project area is shown as the combined areas highlighted purple, yellow and blue.</p>
---	--

	This project area covers a total of 3.59 ha. The Shire proposes to clear 2.68 ha of native vegetation within this project area.	
Footprint of clearing (hectares) (purpose permit only)	2.68	REVISED TO 2.08 HECTARES
Number of individual trees to be removed	N/A	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	The clearing of vegetation is required to construct a 4wd access track to Little Bay. The existing track traverses private land and therefore does not provide legal public access to the site. The Shire proposes to develop a 4wd sand track at this stage, but may develop this into a road to accommodate all types of vehicles at some point in the future.
Specify what the final land use will be after clearing	Road reserve

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing
---	---------------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: ~1/2/2023 End date: 30/6/2023
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?

- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>The proposed 4wd sand track to Little Bay is required to provide legal access to the site. As this is a sand track, there are no other engineering solutions to this proposed action.</p> <p>The proposed Little Bay Road follows existing tracks where possible in order to minimise the amount of native vegetation required to be cleared.</p> <p>The proposed Little Bay Road reserve is a 20 m wide road reserve. In order to minimise the amount of native vegetation to be cleared, the Shire is proposing to clear to a width of 15 m at this stage to provide a 4wd access track to the site. Additional clearing to a 20 m width will only be undertaken if the track is developed into a road at some point in the future.</p> <p>The location of the road was agreed to in conjunction with stakeholders and took into account the area of land the private landowners were prepared to relinquish for this road reserve. The road alignment follows existing tracks where possible and was considered the most suitable option by all stakeholders.</p>

If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a

biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
