5.1 Maps and/or spatial data

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.9765
Footprint of clearing (hectares) (purpose permit only)	0.9765
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	The clearing is to allow for an existing access track to be maintained for the purpose of accessing the Shooting Star Prospect.
Specify what the final land use will be after clearing	Vehicle Access

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	No additional clearing will be conducted outside of existing windrows. Maintenance of existing track will be conducted mechanically using earth moving equipment.
---	---

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 10/01/2023 End date: 26/10/2026
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	As this track is pre-existing and historically cleared, this is the best solution to reduce environmental impact to access the exploration programmes. All clearing will be undertaken in accordance with Fortescue's <i>Exploration Environmental Management Plan</i> (E-PL-EN-0002 Rev 7d). The PPE lies within a 50m buffer zone of a known location of <i>Quoya zonalis</i> .

	<p>The location of these conservation significant species has been identified in the field through detailed flora and vegetation surveys. These species have been flagged in the field and will not be disturbed. The access track is clearly visible and just needs to be re-established to allow for drilling & support vehicles.</p> <p>Specific measures to conservation significant flora species will include only clearing along the existing track and conducting the clearing in accordance with a permit issued under our <i>Land Use Certification Procedure</i> (100-PR-TA-0001). All priority species have been mapped and entered into Fortescue's GIS database. A site specific toolbox will be run with the clearing team (Contractors & Fortescue staff) prior to works being undertaken.</p>

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

<p>Have you submitted all the biodiversity surveys that support this form to the IBSA portal, via ibasubmissions.dwer.wa.gov.au?</p>	<input type="checkbox"/> Yes <input type="checkbox"/> Not applicable
<p>Provide an IBSA number (preferred) or a submission number(s)</p>	

7.2 Marine surveys

If you want to submit any marine surveys to support this form, you must follow the EPA's [*Instructions for the preparation of data packages for the Index of Marine Surveys for Assessments*](#) (IMSA). If you do not meet the IMSA requirements, DWER may decline / return your form. For more information on IMSA, refer to [DWER's website](#).
