Part 5 – Proposed clearing

5.1 Maps and/or spatial data

See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	Clearing application area is 5.75ha
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be removed	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Construction of Perth Sur Park (the Facility).
Specify what the final land use will be after clearing	<p>The proposed Facility will feature a next generation Wavegarden™ “Cove” open water surfing lagoon that is 2.2ha in area. The surfing lagoon can create consistent high-quality surfing waves of variable height in quick succession for up to 84 guests at any one time.</p> <p>The Facility will also include ancillary amenity features, such as short-term accommodation, food and beverage venues, a function centre, events lawn, pump track, surf-skate bowl, outdoor gym, a health, fitness and wellness offering, a children’s playground, and car parking, providing a world class facility for Perth locals and domestic and international tourists.</p>

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing, stripping topsoil and mulching.
---	--

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1/07/23 End date: 1/10/23
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<ul style="list-style-type: none"> • Setting aside Tree Retention Areas (0.46 ha) around the perimeter of the Site (Figures 5 to 8) with further avoidance actions including enhanced native plantings and the use of salvaged Balga trees from the Site. • The design and orientation of the Surf Park has been carefully considered to ensure that there will be no impact on surrounding developments and no shading of vegetation on the neighbouring lots, or on the trees to be retained on Site. • Preparation and implementation of a Construction Environmental Management Plan (CEMP) and Operational Management Plan (OMP) to protect the retained trees on the Site and ensure no offsite impacts to surrounding vegetation. • Preparation and implementation of a Tree Retention Plan which will identify the significant vegetation assets to be retained within the Tree Retention Areas as part of detailed design, which will also be managed through the Building Permit plans and updated Landscape Plan.

Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
