5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

<p>Total area of clearing proposed (hectares)</p>	<p>The proposal includes 0.3573 ha within the boundary of the ESA Kings Park Bush Forever Site comprising:</p> <ul style="list-style-type: none"> • Completely Degraded: 3,558 m². • Degraded 15 m². <p>And including one individual of each of the following</p>
---	---

	<p>priority species which is abundant in the adjacent vegetation:</p> <ul style="list-style-type: none"> • <i>Jacksonia sericea</i> (Priority 4 flora) • <i>Dodonaea hackettiana</i> (Priority 4 flora) <p>Significant portion of the areas to be cleared are in Completely Degraded condition and are dominated by introduced grasses and herbs with some scattered native species, and planted introduced tree species. The alignment has been designed to eliminate impacts to conservation significant values and reduce impacts to native vegetation.</p>
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Construction of the Kings Park Shared Path, which forms part of the Perth CBD Transport Plan Cycling Upgrades.
Specify what the final land use will be after clearing	Public shared pathway.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Vegetation will be cleared by hand and where required and safe to do with low impact mechanical support such as small bobcat. Minimal removal of topsoil is required as most of the pathway sits above the natural groundcover. Where excavation is required, vacuum excavation has been specified to limit impact to root systems.
---	---

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	<p>Start date: Late March</p> <p>End date: Late April</p>
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>The City of Perth has consulted extensively with Kings Park Botanic Parks and Gardens Authority to determine an alignment which avoids environmental values, while also meeting the engineering and safety criteria for the Shared Path.</p> <p>The attached impact assessment letter (Western Environmental 2023) provides a detailed discussion on the consultation and subsequent mitigation measures undertaken in the design of the Shared Path to eliminate significant impacts to native vegetation.</p> <p>In brief, three designs for the pathway alignment have been drawn and considered at subsequent stages of the project. Each design has gone further to reduce potential impacts from clearing. The final alignment avoids all conservation significance flora, vegetation and fauna values, including Threatened Ecological Communities, Priority listed flora, and potential habitat (breeding and foraging) for Black-Cockatoos.</p>

If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
