Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), see the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

☐ Yes EPBC number: _____

☒ No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

☐ *Form Annex C7* is complete and the required supporting information is attached.

Part 2: Clearing permit details

Amendments can only be made to active clearing permits.

Applications must be made more than 90 working days prior to the existing permit expiring to ensure there is adequate time to assess the amendment.

Part 4: Proposed amendments	
<p>Additional information to support the assessment of your application to amend may be attached.</p> <p>Please ensure you have included the following as part of your application:</p> <ul style="list-style-type: none"> a photocopy of the granted clearing permit, with proposed changes highlighted, and payment of the prescribed fee. <p>When providing details of the proposed change(s), if any additional clearing is proposed, include details of:</p> <ul style="list-style-type: none"> the proposed method of the clearing; the purpose of the clearing; the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); and the final land use. 	<p>Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es):</p> <p><input type="checkbox"/> Extend the duration of the clearing permit.</p> <p><input type="checkbox"/> Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.</p> <p><input checked="" type="checkbox"/> Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.</p> <p><input type="checkbox"/> Redescribe the boundary of the area authorised to be cleared [for an area permit only]</p> <p><input type="checkbox"/> Make a correction to the clearing permit.</p> <p><input type="checkbox"/> Other.</p> <p>Provide details of the proposed change(s), and the rationale(s) for it / them.</p> <p>The applicant holds clearing permit CPS 10201-1 for the clearing of up to 7.0 ha of land on Lot 550 on Deposited Plan 414367, Talandji for the purpose of development of a decontamination facility and associated access road.</p> <p><u>Amend the size of the area permitted to be cleared</u></p> <p>The applicant is requesting that the 7.0 ha approved clearing area is increased by 2.1 ha (approximately 137 m by 150 m) as per the attached shapefile (Attachment 2) and Figure 1 and Figure 2 (Attachment 3). The applicant requires the additional area as they are planning to expand and diversify the existing operations at the site, including providing general scrap services for the local area. Once cleared, the land will initially be used for the temporary stockpiling of iron ore pending export.</p> <p><u>Vegetation</u></p> <p>Vegetation in the area was mapped in April 2018 (Attachment 4) and consists of scattered areas of mixed shrub cover ranging from 1-2 m over mixed smaller shrubs and hummock grasses, and areas dominated by patches of immature and mature <i>Triodia</i> grasses. The vegetation is described as having low species diversity and is extensive throughout the region. The additional 2.1 ha of proposed clearing is not likely to significantly impact biological diversity locally or regionally.</p> <p><u>Priority flora</u></p> <p>A targeted preclearance survey of the approved clearing area (Attachment 5) was undertaken in August 2023 as per DWER's request prior to the grant of CPS 10201-1. The targeted survey was for three priority flora species specified by DWER: <i>Abutilon</i> sp. Onslow (F. Smith s.n. 10/9/61), <i>Abutilon</i> sp. <i>Pritzelianum</i> (S. van Leeuwen 5095) and <i>Triumfetta echinata</i>.</p> <p>The survey concluded that these species do not occur in the approved clearing area (the area was surveyed comprehensively and no species were recorded). Although the targeted survey did not traverse the whole of the proposed 2.1 ha extension area, the vegetation is contiguous with that in the adjacent approved clearing area and, therefore, it is considered unlikely that the priority flora will be present in the extension area.</p> <p><u>Mitigation</u></p> <p>Mitigation methods to reduce impacts of clearing will be implemented as per the current permit, including:</p> <ul style="list-style-type: none"> Appropriate weed management practices; Undertake slow progressive directional clearing to allow fauna to move into adjacent habitat ahead of the clearing activity; A 10,000 litre water cart will be utilised to stabilise soils; and Site preparation and operational activities will commence within three months of the date of clearing.

Part 4: Proposed amendments			
	Clearing principles As per the 2018 survey (Attachment 4), the vegetation/habitat types and condition in the extension area are contiguous with what has been assessed and approved in the current permit CPS 10201-1. The vegetation is locally and regionally abundant; therefore, it is unlikely that the increase of 2.1 ha of clearing will have a significant impact on biodiversity or change the outcomes of the assessment of the clearing principles as documented in the DWER Decision Report dated 11 September 2023.		
For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.	State the nature of the applicant's authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission. <i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i> The applicant holds a lease from the Shire of Ashburton for the land to be cleared. A copy of the lease is attached confirming the applicant has permission for legal land access (Attachment 6).		
Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties. Lot 550 on Deposited Plan 414367, Talandji.		
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied?	<input type="checkbox"/>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	If yes, provide details: N/A		
Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the EPA's WA Environmental Offsets Policy and Guidelines on the EPA website for further information.	Do you want to submit a clearing permit offset proposal with your application?	<input type="checkbox"/>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i> . N/A		

Part 5: Other DWER approvals	
Instructions: <ul style="list-style-type: none"> If your application is to be submitted to DMIRS, complete Section A and then skip to Part 6 of this form. If your application is to be submitted to DWER, complete both Sections A and B.
