Part 5 – Proposed clearing

See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	35 ha
Footprint of clearing (hectares) (purpose permit only)	235.63 ha
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	AGMC propose to expand mining activities in the Hidden Secret Project Area to include cutback of the Hidden Secret open pit, expansion of the Waste Rock Landform (WRL), development of a WRL within TSF2, construction of a turkey's nest, ROM, laydown area and installation of ancillary areas for access and material stockpiles.
Specify what the final land use will be after clearing	Expansion of mining activities for mineral production and associated activities

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing
---	---------------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: Q1 2024 End date: 31/08/2026
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<ul style="list-style-type: none"> • Ground disturbance will only be undertaken via the AGM Surface disturbance permitting process to ensure close oversight of land clearing activities. • Clearing areas demarcated and clearing will be kept to a minimum to

	<p>allow proposal to be implemented.</p> <ul style="list-style-type: none"> • All priority flora species will be avoided. • Topsoil stockpiled for re-use and returned to cleared areas during progressive rehabilitation operations. • Areas no longer being utilised will be progressively rehabilitated throughout operations. • Potential impacts of clearing and construction will be managed by standard avoidance and mitigation measures. • Natural drainage will be maintained as much as possible. • Direct impacts to drainage lines will be avoided. Indirect impacts will be minimised via strategically placed flow control structures. • Common dust suppression management practices will be used to manage impacts to adjacent vegetation. • Operational speed limits enforced to mitigate the risk of fauna and vehicle interactions. • Feral animal and weed control measures will be implemented during clearing activities and operations across the project area.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a

biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
