In determining the amount of native vegetation to be cleared under this Permit, the Permit Holder must apply the following principles, set out in descending order of preference:

- (a) avoid the clearing of native vegetation;
- (b) minimise the amount of native vegetation to be cleared; and
- (c) reduce the impact of clearing on any environmental value.

### **7. Weed control**

When undertaking any clearing or other activity authorised under this Permit, the Permit Holder must take the following steps to minimise the risk of the introduction and spread of *weeds*:

- (a) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
- (b) ensure that no known *weed*-affected soil, *mulch*, *fill* or other material is brought into the area to be cleared; and
- (c) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.

### **8. Vegetation management**

- (a) where practicable the Permit Holder shall avoid *clearing riparian vegetation*; and
- (b) where a *watercourse*, *drainage line*, or *wetland* is to be impacted by clearing, the Permit Holder shall ensure that the existing surface flow is maintained, or reinstated downstream into existing natural *drainage lines*.

### **9. Fauna Management – Northern Quoll**

- (a) Within one week to undertaking any clearing authorised under this permit, the permit holder shall engage a *fauna specialist* to undertake clearance surveys within the areas shaded green on Figure 1, 2, 3, 4 and 5 of Schedule 1 for the Northern Quoll (*Dasyurus hallucatus*), including the identification and inspection of dens, and determination of whether dens are being utilised.
- (b) If Northern Quoll are identified utilising any den/s under Condition 9(a) of this permit and cannot be avoided in accordance with Condition 9 of this permit, the permit holder shall engage a *fauna specialist* to remove and relocate the identified Northern Quoll to an area of *suitable habitat*.
- (c) Where active Northern Quoll den/s are identified under Condition 9(a) of this permit, and/or Northern Quoll are relocated under Condition 9(b) of this permit, the permit holder shall include the following in a report submitted to the *CEO* within two months of undertaking any clearing authorised under this permit:
  - (i) The location of any active Northern Quoll dens identified, using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
  - (ii) the location of any Northern Quoll, as referred to under Condition 9(a) of this Permit, captured using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
  - (iii) the date, time, vegetation type and weather conditions at each location where Northern Quoll are captured under Condition 9(c)(ii) of this permit;
  - (iv) the location of any Northern Quoll, identified in accordance with condition 9(a) of this permit, relocated using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
  - (v) the date, time, vegetation type and weather conditions at each location where Northern Quoll are relocated under Condition 9(b) of this permit;
  - (vi) the name of the *fauna specialist* that relocated fauna under Condition 9(b) of this permit; and
