See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	3.5 ha	NOTE: Application area revised to 3.55 hectares during validation
Footprint of clearing (hectares) (purpose permit only)		
Number of individual trees to be removed	0	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<p>Clearing is to revert the land back to when we purchased the property in 1994. The land at the time was being used for growing vegetables and keeping bees. This is to keep the land clear under power lines, to keep control of fires, fire breaks etc. (Hazard reduction). There has been a few small fires due to the under growth in this area. We have also previously grown vegetables in the area as well.</p>
<p>Specify what the final land use will be after clearing</p>	<p>We would like to resume growing vegetables in the area. Over the years we have also had a few beekeepers ask us if they can use the land again for that purpose.</p>

5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical clearing (Dozer)</p>
--	------------------------------------

5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: 1/11/23 End date: 31/12/24</p>
--	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>Please refer to attached maps to show the area that we would like to clear.</p> <p>Why did you select this location and amount of clearing?</p> <ul style="list-style-type: none"> - The area that we would like to clear is the same area that was cleared when we purchased the property in 1994. We would like to return it to the same state as 1994. We would like to use it again for growing vegetables. This clearing also helps with fire hazard (firebreaks) and keeping vegetation cleared under the power lines. <p>What alternatives to clearing – e.g. engineering solutions – did you consider?</p> <ul style="list-style-type: none"> - Unfortunately, there are no other ways of returning this part of the property to the cleared land that we had when originally purchasing the property. The power lines are unable to be moved. Due to the volatile nature of the growth, tea trees etc. we need to keep the firebreaks in place to help with hazard control. <p>What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?</p> <ul style="list-style-type: none"> - The area is the same cleared area that was there in 1994, this clearing is purely to take it back to that state.

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
