## Part 5 – Proposed clearing

### 5.1 Maps and/or spatial data

<p>Select which map type(s) you will attach with your form.</p> <p>Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.</p>	<p><input type="checkbox"/> An ESRI shapefile with the following properties (<i>preferred</i>)</p> <ul style="list-style-type: none"> <li>• Geometry type: polygon shape</li> <li>• Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude / longitude)</li> <li>• Datum: GDA 2020</li> </ul> <p><input checked="" type="checkbox"/> An aerial photograph or map with a north arrow, clearly marking the proposed clearing area</p> <p>Note:</p> <ul style="list-style-type: none"> <li>• An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj</li> <li>• You must provide an ESRI shapefile if the form requires an assessment under an <i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.</li> </ul>
---	---

### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>.4</b>	NOTE: Clearing area amended to 0.08ha during validation process
Footprint of clearing (hectares) (purpose permit only)	<b>.4</b>	
Number of individual trees to be removed	<b>50-100</b>	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	This proposition is being supported and proposed for the purposes of Fire safety to the residency and its occupants. This is also being proposed because of the need to rejuvenate and rescue of the Flora.
Specify what the final land use will be after clearing	Residential Use

### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Professional Removal and Flora rejuvenation in local Grasstree Nursery. This is supported and actioned by the company ‘Grass Trees Australia’
---	---

### 5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 20/11/2023 End date: 20/11/2024
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	Grass Trees Australia will take all grasstrees that are able to be successfully rescued. Grasstrees that have limited life will remain in place if they are not in a high fire risk area and not impeding on the residential use of the property, this will give us an opportunity to attempt local rejuvenation of the Flora. The removal of grasstrees is limited to locations on the property that either pose a direct fire threat to persons or property (such as structures) or are limited to areas where grasstrees are overwhelmed by thatch and concentration of other Flora.  I have consulted a professional company who will use appropriate machining
--	---

	and man power to ensure only the required trees are taken and all other forms of Flora will be untouched and unharmed. There is currently a driveway that runs front to back of the property that machines can use to access the trees without damaging other areas of the property while extracting the trees

### 7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form. For further information on IBSA, refer to [DWER's website](#).

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Have you submitted all the biodiversity surveys that support this form to the IBSA portal, via <a href="https://ibsasubmissions.dwer.wa.gov.au">ibsasubmissions.dwer.wa.gov.au</a> ?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Not applicable
Provide an IBSA number (preferred) or a submission number(s)	

### 7.2 Marine surveys
