Part 5 – Proposed clearing

5.1 Maps and/or spatial data

<p>Select which map type(s) you will attach with your form.</p> <p>Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.</p>	<p><input checked="" type="checkbox"/> An ESRI shapefile with the following properties (<i>preferred</i>)</p> <ul style="list-style-type: none"> • Geometry type: polygon shape • Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude / longitude) • Datum: GDA 2020 <p><input type="checkbox"/> An aerial photograph or map with a north arrow, clearly marking the proposed clearing area</p> <p>Note:</p> <ul style="list-style-type: none"> • An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj • You must provide an ESRI shapefile if the form requires an assessment under an <i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.26 ha
Footprint of clearing (hectares) (purpose permit only)	0.26 ha
Number of individual trees to be removed	0

NOTE:
Amended to 0.27ha within a 0.34ha footprint of during validation.

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Expanding Borden in-loading infrastructure.
Specify what the final land use will be after clearing	Grain storage/handling

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical
---	------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1/07/2024 End date: 1/07/2027
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>After assessing the options, an option that required no native vegetation clearing was chosen initially in the design phase. In 2023, this option was implemented and a full year of harvest operations was conducted, but it did not provide much benefit to growers. The main issue was the inefficiency caused by a bottleneck at the site. In late 2024, a secondary option was identified, which required minimal clearing as necessary to unlock the key benefits, which include reducing site cycle times, mitigating safety risks and improving traffic flow.</p> <p>Measures to Reduce Clearing Impact</p> <p>CBH considered the results of the 2023 spring survey and the mitigation hierarchy to minimize the project's environmental impact.</p>
--	---

	<p>- Avoid: The proposed 0.26 ha development footprint was chosen in an area with <i>Acacia acuminata</i> Low Open Forest [AaLOF] in a Degraded to Completely Degraded condition.</p> <p>- Minimize: The proposed footprint includes all areas that may be impacted by the works.</p> <p>- Manage: The location of the development footprint avoids even potential Wheatbelt Woodlands TEC/PEC vegetation, minimizing environmental impacts.</p> <p>The final design avoids over 97% of native vegetation within the BDS 49.5ha survey area (BDS 2023).</p> <p>Additional mitigation measures will be implemented to address potential indirect impacts on surrounding vegetation or habitat. This will involve the development and execution of a Construction Environmental Management Plan, which will manage the potential environmental impacts during the clearing, construction, and operational stages of the Proposal. Furthermore, a Revegetation Plan will be developed to mitigate these impacts.</p> <p>Avoidance and mitigation details are further detailed in the NVCP Application Supporting Document.</p>

If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form. For further information on IBSA, refer to [DWER's website](#).

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please
