See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	3.7102
Footprint of clearing (hectares) (purpose permit only)	7.164
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	A powerline requires removal as it is no longer in use and leaving it in place will become a safety issue (e.g. bushfire risk, electrocution during required maintenance work). The area has been previously disturbed during the construction of the powerline so there is no intention to clear unnecessarily however, to ensure that full due diligence has been completed, Western Power has requested a clearing permit for the area.
Specify what the final land use will be after clearing	Native veg/farmland (original land use)

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing. Note- there is no intention to clear and this permit is intended to cover inadvertent destruction of vegetation.
---	--

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 31/3/24 End date: 30/3/2026
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>The intention is not to clear any land as the area has been disturbed previously during installation, however, in removing the power poles, Western Power is concerned that small additional disturbance may occur and this permit is to ensure that all due diligence investigations have been completed. The large area has been presented in the GIS data to ensure that any adjustments fall within the permit boundary.</p> <p>All other constraints have been considered and clearing was deemed the most significant impact. Methods to avoid and minimise clearing considered during the design phase included;</p> <ol style="list-style-type: none"> 1. Placement of laydown areas, turnarounds etc. in previously cleared land 2. Utilization of existing access tracks where possible 3. Restriction of works to existing maintenance zone where possible 4. Utilisation of pruning instead of clearing where possible 5. Utilisation of farmers paddocks and previously cleared areas where possible 6. Undergrounding of cables and drilling instead of trenching 7. Selection of joint and entry/exit hole locations to avoid clearing of (high value) vegetation 8. Helicopter installation instead of ground work 9. Early and continual engagement with western power environmental team to highlight proposed risks and avoid where possible 10. Using larger line spans that can span over vegetation 11. Using structures with smaller footprints 12. Implementing lower impact clearing methodologies, for example hand clearing instead of mechanical clearing.

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form. For further information on IBSA, refer to [DWER's website](#).

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Part 8 – Assessment Bilateral Agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a **'controlled action'** before you submit this form.

For further information, see [DWER's website guidance on the assessment bilateral agreement](#).

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
