

# Environmental Services Site Visit notes - Purposed Road upgrade – Reservoir St Chidlow

14 December 2023 and 14 February 2024

**Photo 1:** Two (2) Eucalyptus wandoo to be removed. No native vegetation underneath.

**Photo 2:** Another two (2) Eucalyptus wandoo to be removed. No native vegetation underneath. One of the trees has been heavily lopped with power lines overhead. Both have a DBH of approx. 50cm.

**Photo 3:** Small cluster of native vegetation on the eastern verge, measuring 36.90 sqm (0.0037 ha).

**Photo 4:** View of the eastern side of Reservoir Street that will be impacted for the proposed works to extend Reservoir St to Rosedale Road. The area measures 707sqm (0.0707ha) and includes -

A mix of native shrubs (banksia and tea tree sp), sedges, native grasses, 4 x Eucalyptus wandoo trees and some exotics (weeds).

Additional photos (shown below as photo 5 to 9) of the proposed vegetation removal along the eastern side of Reservoir Street.

**Photo 5 and 6 (above):** Eastern side of Reservoir St - dead tree (species unknown) with no hollows. Native vegetation underneath is mix of native sedges, grasses, tea tree sp. and weeds.

**Photo 7 and 8 (above):** Eastern side of Reservoir St - additional photos of the native vegetation.
