### 5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only** if you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares/4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares/100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>0.597</b>
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	<b>0</b>

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).  If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).	Clearing of native vegetation to upgrade carpark infrastructure and surrounds alongside coastal erosion management.
Specify what the final land use will be after clearing	The site will continue to be utilized as Public Recreation and Parking

### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing/bulldozing.
---	---------------------------------

### 5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 01 September 2025 End date: 30 August 2027
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?	<input checked="" type="checkbox"/> Yes – complete section below  <input type="checkbox"/> I have had a pre-application meeting with DWER/DEMIRS	
	Insert date of meeting and officer name(s):	
	<input type="checkbox"/> I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
	Insert date of conversation and officer name(s):	

	<input checked="" type="checkbox"/> I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.  <input type="checkbox"/> No – proceed to next question.

## Part 6 – Mitigation hierarchy

### 6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	<p>Unfortunately, there are no alternatives to clearing coastal vegetation in this instance. The decision was made to protect this carpark from erosion rather than disposing of it. Now that coastal protection works have been completed, the standard and form of the carpark needs to be reinstated, thus providing parking facilities to those visiting the coastline.</p> <p>The Quinns Rocks Beach profile was surveyed against historical profiles, and this was used in various erosion modelling scenarios, including a SPP2.6 design storm as this is considered a 100-year ARI event in terms of erosion. The modelling demonstrated the existing carpark needs to be offset and maximum of 13 meters assuming a beach buffer is required, and a maximum of 8 meters assuming a retaining wall is installed. To cater for SPP2.6 design event, the maximum safe setback distance was chosen to increase the life of the infrastructure and safety to the public using the space. The choice to install limestone retaining walls, rock protection and sandfill allowed the setback to be reduced (compared to the beach buffer) and thus reducing the impact of the surrounding environment.</p> <p>The City assessed two (2) design options including a cul-de-sac and one way in and one way out option. The one way in and one way out design option was selected based on design safety, accessibility, and practical operational requirements for ongoing beach renourishment despite the marginally bigger footprint relative to cul-des-sac option.</p>
--	--

<p>Provide the mitigation details (e.g. management of weed spread, rehabilitation)</p>	<p>A summary of how the City proposes to mitigate impacts to the surrounding coastal foreshore reserve is listed below:</p> <ul style="list-style-type: none"> <li>• Surveying, and clearly delineating, the proposed clearing area with boundary fencing and/or flagging to ensure that during demolition and construction activities, no unauthorised clearing occurs in the surrounding Quinns Rocks coastal foreshore reserve, and that vegetation outside the approved clearing area is not adversely affected.</li> <li>• A Construction Management Plan (CMP) will be submitted, reviewed, and approved by the City outlining how the Carpark and surrounds will be constructed including clearing activities and methodology, the demolition of the existing structures and removal of demolished materials, site hygiene, dust suppression methods and material storage, among other considerations.</li> <li>• Areas temporarily disturbed due to demolition and construction works will be stabilized and revegetated where possible following the completion of construction activities. Temporarily cleared areas associated with the carpark will be planted with local native species such as: <ul style="list-style-type: none"> <li>○ <i>Spinifex longifolius</i></li> <li>○ <i>Olearia axillaris</i></li> <li>○ <i>Scaevola crassifolia</i></li> <li>○ <i>Rhagodia baccata</i></li> <li>○ <i>Leucophyta brownii</i></li> <li>○ <i>Carpobrotus virescens</i></li> </ul> </li> <li>• North and South interfaces between the proposed Frederick Stubbs Carpark and the remaining native vegetation will be contoured via civil works to match the existing dune face. The north and south clearing boundaries will be revegetated with local native coastal species with the aim to match existing vegetation structures, allowing fauna (specifically Quenda) movement through the site and dune system.</li> </ul>

If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

## Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a ‘**controlled action**’ before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER’s [guidance on the assessment bilateral agreement](#).

## Part 9 – Other approvals

### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.

Has the proposed clearing or any related matter been referred to the EPA?	<input type="checkbox"/> Yes <div style="border: 1px solid black; padding: 2px; margin: 2px 0;">Enter details:</div> <input checked="" type="checkbox"/> No – complete question below.
If 'No' – do you intend to refer the proposal to the EPA?	<input type="checkbox"/> Yes – intend to refer (proposal is a 'significant proposal') <input type="checkbox"/> Yes – intend to refer (proposal will require a section 45C amendment to the current Ministerial Statement) <input type="checkbox"/> No – a current valid Ministerial Statement applies <div style="border: 1px solid black; padding: 2px; margin: 2px 0;">Enter Ministerial Statement number:</div> <input checked="" type="checkbox"/> No – not a significant proposal
