

Department of Energy, Mines, Industry Regulation and Safety

Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (maps etc.). The Department of Water and Environmental Regulation (DWER) or Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) will return/decline any forms that are not correctly completed.

To find out more about the stages of assessment for clearing permit forms, see the *Procedure: Native vegetation clearing permits*.

Part 1 – Form type

Select your form type. Note: Where appropriate in this form, and unless stated otherwise, the terms 'application' and 'applicant' also mean 'referral' and 'referrer' respectively.	 □ Referral of proposed clearing (section 51DA of the EP Act) ☑ Application for an area permit (section 51E of the EP Act) □ Application for a purpose permit (section 51E of the EP Act) 	
Which department are you submitting this form to? If the clearing is for mineral and petroleum activities authorised under the <i>Mining Act 1978</i> , the various petroleum Acts, and/or a State Agreement with areas covered by either mineral or petroleum		□ Department of Energy, Mines, Industry Regulation and Safety
tenure granted under one of the abovementioned Acts, select 'Department of Energy, Mines, Industry Regulation and Safety'. For all other clearing activities, select 'Department of Water and Environmental Regulation'.		□ Department of Water and Environmental Regulation

Part 2 – Applicant details

2.1 Applicant name

Eor oron	
For area permits:	
If granted, the name(s) of (all) landowner(s) will be listed as 'permit holders' on the permit.	
For purpose permits:	
If granted, the name(s) of (all) applicant(s) will go on the permit.	

2.2 Applicant contact details

Provide the contact details for the above (primary contact).

Title	
First name	
Last name	
Position	
Company name	
Phone number	
Email address	

2.3 Applicant contact postal details

Provide the postal address for the above individual, body corporate or local government authority (primary contact).

Address line 1		

Address line 2		
Suburb		
State		
2.4 Applicant contact – reconstruction of the second secon	rporated body, local government authority or public a	uthority,
Address line 1		
Address line 2		
Suburb		
State		
Phone number		
2.5 Electronic correspondence consent DWER/DEMIRS prefer to send all correspondence via email. We request that you consent to receiving all correspondence relating to instruments and notices under Part V of the EP Act via email. Please indicate your consent in this section of the form. I consent that all written correspondence between myself (the applicant) and DWER/DEMIRS (as applicable) about the subject of this form will be exclusively via email, using the email address provided above. □ Yes □ No 2.6 Contact details for enquiries		
If different from the applicant's contact details, enter the contact details of a person with whom DWER/DEMIRS should liaise with (e.g. a consultant).		
Same as applicant's contact details		
If 'No' – complete the following:		
Title		
Contact name		
Position (if applicable)		
Company name (if applicable)		

Phone number	
Email address	
Business or postal address line 1	
Business or postal address line 2	
Suburb	
State	

Part 3 – Land details

- You must accurately describe the location of the land where your clearing is proposed.
- Provide copies of associated documents registered against the Certificate of Title (limitations, interests, encumbrances or notifications) where the clearing may impact them (i.e. caveats within freehold Lots).
- If you have a large number of properties, please provide the relevant details for each property in a separately attached supporting document.

I have a large number of properties and have given the relevant details in an attached supporting document.	☐ Yes – skip to Part 4	⊠ No
---	------------------------	------

If 'No' – complete the following:

Land description			
Provide the following details, as applicable, for all properties: - volume and folio number - lot or location number(s) - crown lease or reserve number - pastoral lease number - mining tenement number	Lot: 10842 Vol: LR3144 Folio:896 Reserve No.:4001	2	
Street address – Line 1	159 Benmuni Roa	ad	
Street address – Line 2			
Suburb	WANNEROO		
State	W.A	Postcode	6065
Local government area(s)	City of Wanneroo		

Land Zaning	MRS: Parks and Recreation
Land zoning	DPS2: Parks and Recreation

Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

Proof of ownership may include:

- a certificate of title
- a pastoral or mining lease
- public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner (select one of the following options)	Complete the following
☐ I am the landowner	☐ Attach proof of ownership
⋈ I am lodging a form on behalf of the landowner (e.g. a consultant)	
☐ I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to act on their behalf and acknowledge they will be jointly responsible for the clearing permit
☐ I am likely to become the landowner	☐ Attach evidence of the pending transfer of ownership, including details of current proprietor on certificate of title, and/or contract of sale ('offer and acceptance')
☐ I will undertake the clearing activities with the landowner's authority and will be the permit holder	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to access and clear native vegetation within the property(ies) as detailed in section 3.1 (if the applicant is not the landowner)
☐ I am a person with multiple land parcels within which clearing is proposed	☐ Attach proof of ownership and/or ☐ Attach letters, in which the landowner authorises you to access and clear native vegetation within the properties as detailed in section 3.1 (if the applicant is not the landowner)
☐ I will undertake the clearing activities through the exercise of power conferred by different legislation (e.g. the <i>Energy Operators (Powers) Act 1979</i>)	□ Provide relevant legislative details:

Part 5 – Proposed clearing

5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form.

Note: DWER/DEMIRS will decline/return forms (as applicable) if you do not provide sufficient information for this question.

- Geometry type: polygon shape
- Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude/longitude)
- Datum: GDA 2020

☐ An aerial photograph or map with a north arrow, clearly marking the proposed clearing area

Note:

- An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj
- You must provide an ESRI shapefile if the form requires an assessment under an *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, "clearing of 5 hectares".
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, "clearing of 10 trees". If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = $10,000 \text{ m}^2$ Area of circle = 3.14 x radius² 1 acre = $0.4 \text{ hectares/}4,000 \text{ m}^2$ Area of a rectangle = length x width 1 tree = $0.01 \text{ hectares/}100 \text{ m}^2$ Area of a triangle = $\frac{1}{2}$ length x perpendicular height

Total area of clearing proposed (hectares)	0.38 ha
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing
(e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).

If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).

Specify what the final land use will be after clearing

To support the development of park and recreation activities for equestrian use including trail riding, show jumping, cross country and endurance.

Parks and Recreation

5.4 Method

	Mechanical Clearing – Brush cutting and Chainsaws
- 1	

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: On receipt of approved permit
	End date: 30/06/2029

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt Interim Biogeographic Regionalisation for Australia (IBRA) bioregions has been extensive. DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?	 ⊠ Yes – complete section below □ I have had a pre-application meeting with DWER/DEMIRS 	
	Insert date of meeting and officer name(s):	
	☐ I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
	Insert date of conversation and officer name(s):	

☑ I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.
□ No – proceed to next question.

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing e.g. engineering solutions did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property) The Pony Club approached the City to re-establish riding trails throughout their leased area, highlighting all historically used tracks for Equestrian Use. This option could not be supported by the City, as fire access and vegetation management may not be adequately maintained by the Pony Club.

A meeting onsite between stakeholders resulted in the currently proposed option which includes:

- a perimeter Fire Access Track (trafficable by vehicles and not to be obstructed by horse jumps)
- tracks for equestrian use which can include horse jumps or riding trails
- tracks to remain wholly vegetated (promoting revegetation and reducing edge effects).

The project design was selected to minimize the potential impact on native vegetation by selecting areas in degraded or completely degraded condition containing evidence of disturbance from previous use. All trees and grass trees (*Xanthorrhoea preissii*) will be avoided with the clearing composing of just middle and lower story shrubs and herbs. To support the continued development of the Pony Club, the tracks are required for Equestrian Use and will require clearing to provide clearance for horses and their riders. Some trees will be required to be pruned to provide clearance for horses and riders, this will be undertaken by an approved specialist.

The City proposes to improve the vegetation along tracks marked to be rehabilitated. Historic tracks that will not be re-established during the proposed clearing will be rehabilitated to reduce edge effects throughout the bushland and improve the vegetation condition of the tracks. The proposed clearing areas along the tracks have been marked out with Provide the flagging tape and pegs to ensure that no additional clearing outside of the mitigation details track alignments are to be undertaken. All clearing works will consider (e.g. management environmental impact mitigation measures including weed control, dieback of weed spread, hygiene, dust suppression and tree protection during construction activities. rehabilitation) Estrel Park will receive whole of site weed management works to assist in improving the condition of the remnant vegetation through the reduction of weed populations. In the previous 2 years the City has completed targeted weed management works costing \$82,431, including the following activities: Extensive removal of woody weeds – Coast Teatree (*Gaudium laevigatum), *Acacia longifolia, *Acacia iteaphylla and Tagasaste (*Chamaecytisus palmensis). Herbicide treatment of all weeds on the perimeter firebreak and fence lines Hand weeding/removal of priority weed species throughout the bushland areas, including – perennial veldt grass (*Ehrharta calycina), African lovegrass (*Eragrostis curvula), fleabane (*Erigeron bonariensis) and Geraldton Carnation (*Euphorbia terracina) The City has programmed ongoing weed management works targeting key species, as well as annual whole of site weed applications. The City's weed program has been developed in collaboration with the Pony Club as the key user of the site. In particular, the Pony Club has expressed concern that herbicides should not be used in bushland areas of Estrel Park, due to potential impacts on horses at the site. Accordingly, the City's management program is based on hand removal in most circumstances, which enables appropriate mitigation while accommodating the Pony Club's preferences.

6.2 Offsets

support of your form?

Do you want to submit a clearing offset proposal with your form?	□ Yes ⊠ No		
If 'Yes' – please complete and attach Appendix A of the <u>Clearing</u> of native vegetation offsets procedure guideline as a supporting document for your form.	☐ Appendix A attached		
Part 7 – Surveys for assessments (IBSA and IMSA)			

☐ Yes ☐ No – skip to Part 8

Do you want to submit marine or biodiversity surveys in
