5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only** if you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares/4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares/100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.58	Ammended in validations to 0.21 hectares
Footprint of clearing (hectares) (purpose permit only)		
Number of individual trees to be cleared		

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>As part of Oasis@Newman expansion of accommodation MRWA has requested we widen Great Northern Highway, lengthen our left turn in pocket from 60m to 150m and create a new right turn in pocket. This will make our intersection safe for users on Great northern Highway.</p> <p>2 clearing areas:</p> <ul style="list-style-type: none"> - Ensure 350m line of sight is clear - Clear vegetation in road reserve for road widening

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

<p>Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?</p>	<p><input type="checkbox"/> Yes – complete section below</p> <p><input type="checkbox"/> I have had a pre-application meeting with DWER/DEMIRS</p> <table border="1" data-bbox="450 1839 1406 1989"> <tr> <td data-bbox="456 1848 703 1980"> <p>Insert date of meeting and officer name(s):</p> </td> <td data-bbox="710 1848 1399 1980"></td> </tr> </table> <p><input type="checkbox"/> I have contacted DWER/DEMIRS in relation to a pre-application</p>		<p>Insert date of meeting and officer name(s):</p>

<input type="checkbox"/> I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.		
<input checked="" type="checkbox"/> No – proceed to next question.		

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	<p>Clearing required is minimal to the North of Oasis entrance on Great Northern Highway. The requirement is for a 350m clear line of sight which is determined by MRWA. We are only required to remove a few small areas of trees that are blocking the line of sight, shrubs next to the trees will remain.</p> <p>For the widening of Great Northern Highway to the South of Oasis entrance, we will only clear to the extent of the road widening, no further. There is minimal clearing required as the highway is clear of a lot of bush and brush. It consists shrub, small trees with small diameters and creepers, much of the area is clear already.</p> <p>Oasis Front entrance clearing consists some higher shrubs and ground covers.</p>
--	--

Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<p>Equipment used for the road widening will be parked in a lay—down area within Oasis@Newman. This is a cleared area free of weeds therefore mitigating the risk of spread of weeds.</p> <p>Clearing machinery will be cleaned of soil and vegetation prior to entering the area to be cleared with restricted movement in the area.</p> <p>There is no reintroduction of soil, much or fill to any areas except the Southern side of Great northern Highway where the road widening will take place. All fill will be MRWA approved, Oasis will ensure no known dieback or weed-affected soil etc will be brought into the area.</p> <p>A Traffic Management Plan will be in place closing one side of the Highway to the South per plans, this allows minimal use of the road reserve other than to clear, backfill and seal a small portion being the widening component.</p>

If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
