5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only** if you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m²

1 acre = 0.4 hectares/4,000 m²

1 tree = 0.01 hectares/100 m²

Area of circle = 3.14 x radius²

Area of a rectangle = length x width

Area of a triangle = ½ length x perpendicular height

Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>The proposal is to install a 50m Telecommunications Lattice Tower within a 20m by 30m leased compound area.</p> <p>The site has been funded by Telstra and the Federal Government in Round 5A of the Federal Governments Mobile Black Spot Program (MBSP5A).</p> <p>There is currently little to no 4G coverage along Indian Ocean Drive in this area. The proposed site at Eneabba is designed to provide adequate coverage along Indian Ocean Drive and the surrounding area addressing an identified need for improved emergency services infrastructure along this busy tourist route.</p> <p>The proposed facility has been sited to minimise environmental and visual amenity impacts as much as practical and will provide visitors and residents will access to modern reliable telecommunications that will assist in connectivity, road safety, reserve management and tourism operations. Access to reliable mobile communications will assist in the protection of this valued and scenic coastal environment in times of emergency such as bushfire.</p>

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

<p>Provide the avoidance details (e.g. retention of vegetation on</p>	<p>The proposed location has been determined by the co-ordinates set by the Federally funded Mobile Blackspot program to ensure mobile coverage to this area. The entire search area is located within Crown Reserve. The site selection focused on the thin strip of land to the east of Indian Ocean Drive avoiding more environmentally sensitive areas conserved for conservation</p>

property)	<p>in the Beekeepers Reserve further to the east.</p> <p>Two alternate sites were assessed by Amplitel with the selected location determined in consultation with the Department of Biodiversity, Conservation and Attractions (DBCA) and the Shire of Carnamah.</p> <p>The selected site is located within a natural clearing vegetated with dispersed shrubs. To mitigate and reduce impacts on native vegetation the compound has been located in close proximity to an existing access track on the subject land to minimise native vegetation disturbance from the construction of new tracks on the site. Although clearing is required, Amplitel will seek to prevent disturbance to vegetation in proximity to the compound by erecting appropriate fencing around the works area.</p> <p>The site will utilise solar power and radio transmission to minimise the need for electrical and fibre cable trenching.</p> <p>The proposed development has been sited to avoid and minimise impacts on native vegetation as much as possible and provides a balance between vegetation removal, placement to mitigate visual impact and provision of essential infrastructure.</p>
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<p>Amplitel will ensure that vehicles and equipment are clean prior to entering the site to prevent any foreign material, weed species and soil pathogens from contaminating the site.</p> <p>Please refer to the attached Construction Management Plan.</p>

If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
