

Lake Monger (Galup) Typha control required adjacent to island in Sth West corner

Below: Area of thinning/clearing of Typha species, in red

Below: Location within Lake Monger (Galup) reserve

See over for evidence of Typha expansion in the proposed clearing areas over 14months.

Below – Intramaps snip April 2023

Below – Intramaps snip June 2024

The above two images show that the gap has closed between lake edge and typha on southern end (see photo 1. over page) and beginning to close the gap on western side (see photo 2).

Below: Photo 1, southern end of island Lake Monger

Below: Photo 2, Western side of island Lake Monger Drone view of south west corner of Lake Monger (Galup)

Below: Drone view of site
