5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only** if you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m²

1 acre = 0.4 hectares/4,000 m²

1 tree = 0.01 hectares/100 m²

Area of circle = 3.14 x radius²

Area of a rectangle = length x width

Area of a triangle = ½ length x perpendicular height

| | |
|--|---|
| Total area of clearing proposed (hectares) | 23.88 ha |
| Footprint of clearing (hectares) (purpose permit only) | 23.88 ha of clearing within a footprint of 85.57ha Footprint adjusted to 84.23ha during validation |
| Number of individual trees to be cleared | N/A |

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

5.3 Purpose

| | |
|--|--|
| <p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p> | <p>Enabling investigation works to inform design and project definition to facilitate the installation of renewable energy infrastructure and supporting infrastructure.</p> <p>Clearing will be required for installation of groundwater/geotechnical investigation equipment and access tracks for new tracks to reach the chosen sites.</p> <p>Refer to Section 1 and 2 of the NVCP Supporting Document for further information.</p> |
| <p>Specify what the final land use will be after clearing</p> | <p>Groundwater bore sites will be established as operational areas during construction phase with clearing maintained. Post-construction it is likely groundwater bore ownership will be passed on to an interested party (i.e. pastoralist). New access tracks developed to sites involving groundwater bores will remain cleared.</p> <p>If a groundwater bore is not successful in locating water, the bore will be capped and the pad area rehabilitated. If a new access track was developed to the site, it will be rehabilitated.</p> <p>Following completion of geotechnical investigations, sites will be left to be revegetated through active rehabilitation. Sites will be restored and reprofiled to natural levels and contours. New access tracks developed to sites only involving geotechnical investigations will be rehabilitated following the completion of investigation activities.</p> <p>Geotechnical investigation occurring alongside groundwater bores will be rehabilitated after the groundwater bore is established.</p> <p>Active rehabilitation will include the following scope</p> <ul style="list-style-type: none"> - Removal of any temporary fill material, contaminated or unsuitable material and disposal at an approved facility - The reprofiling of the temporary Works areas to their natural levels - The finishing of the temporary Works areas with stockpiled cleared topsoil |

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

| | |
|---|---|
| Provide the avoidance details (e.g. retention of vegetation on property) | Refer to Section 2 and Section 6 of the NVCP Supporting Document. |
| Provide the mitigation details (e.g. management of weed spread, rehabilitation) | Refer to Section 2 and Section 6 of the NVCP Supporting Document. |

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority’s (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a ‘**controlled action**’ before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER’s [guidance on the assessment bilateral agreement](#).

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
