Referral determination

The Department of Water and Environmental Regulation has considered the above referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that a clearing permit **is required** for the proposed clearing of native vegetation within the area cross-hatched in orange on the attached map detailed in Schedule 1 (the referral area).

The reason for this determination is that the proposed clearing does not satisfy all of the criteria specified in section 51DA(4) of the EP Act. Specifically:

- There are issues that would arise as a result of the proposed clearing that are likely to require conditions to mitigate effects on the environment.
