

**Basic and Targeted Fauna Survey
Meteorological Mast, Sandpatch, Albany
March 2023
Prepared for SynergyRED**

Limitations

Scope of services

This report ("the report") has been prepared by Western Ecological Pty Ltd (WE) in accordance with the scope of services set out in the contract, or as otherwise agreed, between the Client and WE. In some circumstances, a range of factors such as time, budget, access and/or site disturbance constraints may have limited the scope of services. This report is strictly limited to the matters stated in it and is not to be read as extending, by implication, to any other matter in connection with the matters addressed in it.

Reliance on data

In preparing the report, WE have relied upon data and other information provided by the Client and other individuals and organisations, most of which are referred to in the report ("the data"). Except as otherwise expressly stated in the report, WE have not verified the accuracy or completeness of the data. To the extent that the statements, opinions, facts, information, conclusions and/or recommendations in the report ("conclusions") are based in whole or part on the data, those conclusions are contingent upon the accuracy and completeness of the data. WE have also not attempted to determine whether any material matter has been omitted from the data. WE will not be liable in relation to incorrect conclusions should any data, information or condition be incorrect or have been concealed, withheld, misrepresented or otherwise not fully disclosed to WE. The making of any assumption does not imply that WE have made any enquiry to verify the correctness of that assumption.

The report is based on conditions encountered and information received at the time of preparation of this report or the time that site investigations were carried out. WE disclaim responsibility for any changes that may have occurred after this time. This report and any legal issues arising from it are governed by and construed in accordance with the law of Western Australia as at the date of this report.

Executive Summary

Synergy Renewable Energy Development (SynergyRED) is investigating the proposed development of a new meteorological mast (met mast), located approximately 8.5 km to the south east of Albany, Western Australia.

Specialist fauna surveys were required to identify issues of conservation significance, and inform the feasibility and design layouts for the proposed project.

Western Ecological was commissioned by SynergyRED to undertake a basic terrestrial fauna survey and targeted habitat assessment for the three WA threatened Black Cockatoo species and Western Ringtail Possum (WRP) in the met mast survey area.

The scope of work undertaken and broad objectives were as follows:

- Undertake a desktop assessment for terrestrial vertebrate fauna in the survey area and surrounds (the focus being threatened fauna)
- A basic terrestrial fauna survey (the focus of which is fauna habitats and primarily terrestrial vertebrates)
- A Black Cockatoo Habitat Assessment
- A Western Ringtail Possum Habitat Assessment
- Technical Report

The desktop assessment included searches of Department of Biodiversity, Conservation and Attractions (DBCA) threatened fauna database and NatureMap, the Commonwealth Department of Climate Change, Energy, the Environment and Water Protected Matters Search Tool (PMST) and the Atlas of Living Australia (ALA), which were undertaken to identify fauna species of conservation significance potentially occurring in and near the survey area. A search for previous fauna surveys and their reports in the surrounding area was also undertaken.

Habitat assessments were undertaken systematically throughout the survey area to define and delineate the main broad habitats present, and where the survey area was accessible. Habitat assessments and targeted searches for Black Cockatoos and Western Ringtail Possums were also undertaken.

Results of the databases searches identified the following:

- DBCA – 77 conservation significant vertebrate fauna species (one reptile species, 60 bird species and 16 mammal species).
- NatureMap – 429 vertebrate fauna species (10 amphibian species, 42 reptile species, 303 bird species and 68 mammal species).
- PMST - 67 threatened species, 65 migratory species and 91 listed marine species (some species fall into more than one of these categories so there is overlap).
- ALA – 312 vertebrate fauna species (12 amphibian species, 38 reptile species, 227 bird species and 35 mammal species).

Of the 13 conservation significant species retrieved from database searches, none have been recorded in the survey area, two species are considered likely to occur in the survey area, four are considered as possible and seven species are considered unlikely to occur.

A single broad fauna habitat type was identified in the survey area, Coastal Heath. This broad habitat is widespread and common in areas adjacent to the survey area and, more broadly, across the region.

During the field assessment a total of 17 species were recorded in the survey area and this included reptiles, birds and mammals. None of the species recorded during the survey are of conservation significance (State and Commonwealth). During the targeted searches no Black Cockatoo or Western Ringtail Possums, or their signs (foraging evidence, scats, dreys, etc.) were recorded. During the Black Cockatoo habitat assessment, no potential breeding trees were recorded and no foraging habitat was recorded. During the Western Ringtail Possum habitat assessment, no tree hollows, or dreys were recorded, however the Coastal Heath habitat is considered suitable foraging habitat for the species.

1. Introduction

1.1 Background

Synergy Renewable Energy Development (SynergyRED) is a wholly owned subsidiary of Synergy (Electricity Retail and Generation Corporation) located in Perth, Western Australia (WA). SynergyRED is investigating the proposed development of a new meteorological mast (met mast) in Sandpatch, Albany.

Western Ecological (WE) was commissioned to undertake a basic terrestrial fauna survey and targeted habitat assessment for the three WA threatened Black Cockatoo species and Western Ringtail Possum (WRP) in the met mast survey area.

The met mast survey area is located approximately 8.5 km to the south east of Albany and is approximately 28 ha (Figure 1).

The basic terrestrial fauna survey and targeted habitat assessments will help to further understand the fauna values of the survey area and surrounds, which in turn will inform forward environmental approvals for the proposed project.

1.2 Scope and Objectives

The scope of work (SoW) to be undertaken and broad objectives were as follows:

- Undertake a desktop assessment for terrestrial vertebrate fauna in the survey area and surrounds (the focus being threatened fauna)
- A basic terrestrial fauna survey (the focus of which is fauna habitats for terrestrial vertebrates)
- Habitat assessment and targeted searches for threatened Black Cockatoo species - Carnaby's Cockatoo (*Zanda latirostris*), Baudin's Cockatoo (*Zanda baudinii*) and the Forest Red-tailed Black-cockatoo (FRTBC) (*Calyptorhynchus banksii naso*), where and when suitable habitat is present
- Habitat assessment and targeted searches for the Western Ringtail Possum (WRP) (*Pseudocheirus occidentalis*), where and when suitable habitat is present
- Document the above in a technical report.

1.3 Legislative context

Fauna in Western Australia is protected formally and informally by various legislative and non-legislative measures, which are as follows:

- *Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)* – Commonwealth Government
- *Biodiversity Conservation Act 2016 (BC Act)* – WA State Government.

Non-legislative measures:

- WA Department of Biodiversity, Conservation and Attractions (DBCA) Priority lists for flora, ecological communities and fauna.

A short description of each is given below. Other definitions, including species conservation categories, are provided in Appendix 1.

EPBC Act

The *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) aims to protect matters of national environmental significance, which are detailed in Appendix 1. Under the EPBC Act, the Commonwealth Department of Climate Change, Energy, the Environment and Water (DCCEEW) lists protected species and Threatened Ecological Communities (TECs) by criteria set out in the Act. Species are conservation significant if they are listed as Threatened (i.e., Critically Endangered [CrEn], Endangered [En] and Vulnerable [Vu]) or Migratory.

Bird species protected as Migratory under the EPBC Act include those listed under international migratory bird agreements relating to the protection of birds, which migrate between Australia and other countries, for which Australia has agreed. This includes the Japan-Australia Migratory Bird Agreement (JAMBA), the China-Australia Migratory Bird Agreement (CAMBA),

the Republic of Korea-Australia Migratory Bird Agreement (ROKAMBA) and the Convention on the Conservation of Migratory Species of Wild Animals (Bonn Convention).

Some marine fauna or terrestrial fauna that use marine habitats are listed as Marine under the EPBC Act. These species are only considered conservation significant when a proposed development occurs in a Commonwealth marine area (i.e., any Commonwealth Waters or Commonwealth Marine Protected Area). Outside of such areas, the EPBC Act does not consider these species to be matters of national environmental significance, so are not protected under the Act.

BC Act

The *Biodiversity Conservation Act 2016* (BC Act) replaced both the *Wildlife Conservation Act 1950* and the *Sandalwood Act 1929* and came into effect on 1 January 2019. The aim of the new Act is to conserve and protect biodiversity and to promote the ecologically sustainable use of biodiversity components in the State, and will bring more activities within the scope of biodiversity laws.

Taxa listed as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1a, 1b, and 1c), or is a rediscovered species to be regarded as threatened species under section 26(2) of the BC Act. Other categories include extinct or extinct in the wild and they are listed under section 23 (1) of the BC Act (Appendix 1).

If species meet one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection, they are covered under section 13(1) of the BC Act and are called specially protected species. Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act can't also be listed as Specially Protected species (see Appendix 1 for a more detailed description of each threat category).

Threatened Ecological Communities (TECs) are also covered under the BC Act and are placed into three categories of critically endangered, endangered or vulnerable under section 27(1a, 1b, and 1c) of the BC Act depending on their threat status.

DBCA Priority Species and Communities

DBCA lists species that are possibly threatened but that do not meet criteria for listing under the BC Act, or are otherwise data deficient, and adds them to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora. Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring. Consideration of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations (Appendix 1 for more detail of the priority codes).

The DBCA also has a list of Priority Ecological Communities (PECs) that have scant information available to be considered a TEC, or which are rare but not currently threatened. Ecological communities that do not meet survey criteria or that are not sufficiently defined are added to the PEC list under priorities 1, 2 and 3. These three categories are ranked in order of priority for survey and/or definition of the community, and evaluation of conservation status, so that consideration can be given to their declaration as a TEC. Ecological communities that are adequately known, and are rare but not threatened or meet criteria for near threatened, or that have been recently removed from the threatened list, are placed in priority 4. These ecological communities require regular monitoring.

Informal Recognition of Threatened Fauna

Certain populations or communities of fauna may be of local significance or interest because of their patterns of distribution and abundance. For example, fauna may be locally significant because they are range extensions to the previously known distribution or are newly discovered species (and have the potential to be of conservation significance). In addition, many species are in decline as a result of threatening processes (land clearing, grazing, and changed fire regimes) and relict

populations of such species assume local importance for DBCA. It is not uncommon for DBCA to make comment on these species of interest.

Figure 1: Project Location

2. Existing Environment

2.1 Climate

Climate

The closest long-term Bureau of Meteorology (BOM) weather station with a complete and up to date dataset is Albany City Weather Station (Station 9500), located approximately 9 km north-east of the survey area. The long-term mean minimum temperature for Albany City Weather Station ranges from 8.2 °C (July) to 15.6 °C (February) (1880 to 2022) and the long-term mean maximum temperature ranges from 15.8 °C (July) to 22.9 °C (February) (1880 to 2022) (Figure 2) (BOM 2023).

The Albany Weather Station recorded rainfall of 925.2 mm in the 12 months prior to the survey (January 2022 to December 2022 [inclusive]), which was 2.5 mm below the long-term average of 922.7 mm (Bureau of Meteorology 2023). In the three months prior to the survey (September to November 2022), 224.3 mm of rainfall was recorded, which is 20.8 mm above the long-term average of 203.5 mm for the same time period (1880 to 2022) (BOM 2023).

Figure 2. Climate data recorded at Albany City Weather Station (Rainfall and maximum temperature 12 months prior to survey and long-term average) (Bureau of Meteorology 2023).

2.2 IBRA Bioregions

The survey area occurs within the Warren Interim Biogeographic Regionalisation for Australia (IBRA 7) Bioregion and specifically the Warren Subregion (WAR01). The Warren bioregion vegetation broadly consists of Karri Forest, Jarrah-Marri forest, and low Jarrah woodlands and paperbark/sedge swamps, and Holocene marine dunes with *Agonis flexuosa* and Banksia woodlands and heaths (Hearn et al. 2002) (Figure 3). The climate of this subregion is moderate Mediterranean. High rainfall, and low evapotranspiration of the bioregion makes it unique (along with parts of the adjacent Southern Jarrah Forest [JF2]) in WA. The climate is such that the landscape is characterised by high forests, perennial rivers and wetland systems.

- IBRA Subregion: Warren

3. Methods

3.1 Survey Guidance

The fauna survey was completed in accordance with the following EPA and DCCEEW requirements (and other institutions) for the environmental surveying and reporting of fauna surveys in WA, where relevant and practical, and as documented in:

- EPA Technical Guidance: Terrestrial Vertebrate Fauna Surveys for Environmental Impact Assessment (EPA 2020)
- Survey Guidelines for Australia's Threatened Birds. EPBC Act survey guidelines 6.2 (2010) (DSEWPaC).
- Survey Guidelines for Australia's Threatened Mammals. EPBC Act survey guidelines 6.5 (2011) (DSEWPaC).
- Survey Guidelines for Australia's Threatened Reptiles. EPBC Act survey guidelines 6.6 (2011) (DSEWPaC).
- Commonwealth Department of Agriculture, Water and the Environment (DAWE) referral guideline for 3 WA threatened Black Cockatoo species (2022)

3.2 Desktop Assessment

3.2.1 Database Searches

Searches of the DBCA threatened fauna database, NatureMap, the EPBC Protected Matters Search Tool (PMST) and the Atlas of Living Australia (ALA), were undertaken to identify fauna species of conservation significance potentially occurring in and near the survey area (DBCA 2022, DBCA 2023, DCCEEW 2022, ALA 2023) (Appendix 2). The database searches were centred on -35.0559 and 117.7844 (571529.85 m E / 6120476.56 m S) with a 30 km buffer for the DBCA threatened fauna database search, a 20 km buffer for the EPBC PMST and NatureMap database searches and a 10 km buffer for ALA.

Please note, a 20 km buffer was requested for the DBCA threatened fauna database, however a 30 km buffer was provided to capture more species. This large buffer however, resulted in many species, which occur in different habitats that are not relevant to the survey area. It is also important to note that databases such as the ALA and NatureMap get the majority of their records from the various state museums and government departments such as DBCA, hence the records are very similar. And finally for assessments such as this we are primarily interested in conservation significant species records, not common and widespread species that form the majority of records in the ALA and NatureMap databases. The ALA database search can result in many thousands of records (depending on the buffer applied) and as such a 10 km buffer was applied in order to keep results relevant. The DBCA threatened fauna database is typically the most relevant and best resource for records of threatened species in WA.

3.2.2 Previous Surveys

A search was undertaken for previous and relevant fauna surveys that may have been undertaken within a 20 km radial search area surrounding the survey area. The primary aim of this search was to see if past surveys recorded any threatened fauna species for context for this survey. A number of surveys have been summarised below in table 1.

Table 1. Summary of previous fauna surveys.

CrE = Listed as Critically Endangered under the EBPC Act and BC Act, En = Listed as Endangered under the EBPC Act and BC Act, Vu = Listed as Vulnerable under the EBPC Act and BC Act, Mi = Listed as Migratory under the EBPC Act and BC Act, OS = Other specially protected species under the BC Act. Both the EPBC Act and BC Act use IUCN threat categories to determine the threat status and category of species. P4 and P3 = Priority listed under the BC Act.

Survey reference	Threatened fauna species recorded during survey	Distance and direction from survey area
Western Ecological (2021). Flora, Vegetation and Fauna Survey – Telecommunications Corridor, Little Grove, Albany. Report prepared for SPT Environment.	None recorded.	Approximately 10 km to the east of the current survey area.
Invertebrate Solutions (2020). Level 1 Vertebrate Fauna Survey for the Albany Wind Farm. Prepared for Synergy Pty Ltd.	Quenda (P4).	Less than 1 km to the west of the current survey area.
Southern Ecology (2020). Biological survey: Albany Ring Road. Report prepared for Main Roads Western Australia.	Five species recorded; however, this was based on foraging, scat and digging evidence, rather than direct observations: • Carnaby's Cockatoo (En), • Baudin's Cockatoo (En), • Forest Red-tailed Black Cockatoo (Vu), • Western Ringtail Possum, • Quenda (P4).	Approximately 7 km to the north-east of the current survey area.
Bio Diverse Solutions (2019). Reconnaissance Flora and Level 1 Fauna Survey, Lot 5780 Down Road, Drome. Report prepared for the City of Albany.	• Baudin's Cockatoo (En) • Forest Red-tailed Black Cockatoo (Vu), • Western Brush Wallaby (P4), • Quenda (P4).	Approximately 16 km to the north-west of the current survey area.

3.3 Field Survey

The field survey was undertaken over two days (four person days) from the 1st to 2nd December 2022 by two qualified Zoologists, Dr Ron Firth and Laura Stevens from Western Ecological.

3.3.1 Fauna Habitat Assessment

Habitat assessments were undertaken systematically throughout the survey area in 50 x 50 m quadrats to define and delineate the main broad habitats present (mapped in Figure 4 and example is provided in Appendix 3). A description and map of the broad main habitat type was developed for the survey area with this based on broad vegetation types, usually the dominant species in the canopy, vegetation structure and cover, and position in the landscape.

The habitat assessment included an evaluation (likelihood assessment) of the potential for habitats to support the species of conservation significance being targeted during this survey (with this based on the database results, previous surveys, habitats present, known distributions and ecology of species from the literature, and the survey personnel's extensive experience).

Each habitat description included the following information where relevant:

- GPS co-ordinate will be recorded
- habitat condition will be assessed as 'completely degraded through to pristine, based on the scale given in Keighery (1994)

- landscape position
- dominant vegetation and structure e.g., number of vegetation strata
- hollow-bearing trees and dead stags (e.g., average size and abundance of hollows – should they be present)
- description of any rock and rocky outcrops
- logs (e.g., abundance and size)
- substrate (e.g., leaf litter)
- wetlands, creeks, rivers, dams and other water bodies
- description of any observed nests and roosts
- associated fauna species observed using the habitat
- disturbance e.g., cattle grazing, fire
- photo showing a typical example of the broad habitat type.

3.3.2 Targeted Threatened Species Surveys

The following targeted threatened species surveys were undertaken due to database results, past survey results, vegetation and habitats in the region and survey area, fauna known to occur in the region, and WE experience.

Black Cockatoo Habitat Assessment

The survey area is in the known distributional range of Carnaby's Cockatoo, Baudin's Cockatoo and Forest Red-tailed Black Cockatoo (FRTBC). (Black Cockatoo distribution maps [DAWE 2022]).

The Black Cockatoo habitat assessment was undertaken in suitable habitat and the survey methods were undertaken with reference to the DAWE referral guideline for 3 WA threatened Black Cockatoo species (2022).

Breeding Assessment

Black Cockatoos breed in large hollow-bearing trees, generally in woodlands or forests. The size of the tree can be a useful indication of the hollow-bearing potential of the tree. During the survey trees considered to be suitable for breeding based on the following criteria were examined if present (habitat assessment sites will also be utilised):

- Native trees (e.g., Marri, Jarrah, Flooded Gum etc.)
- Diameter at breast height (DBH) > 500 mm (300 mm for Wandoo and Salmon Gum)
- GPS co-ordinates were recorded using a GPS
- Suitable Black Cockatoo breeding hollows were assessed (from the ground) if present and based on the following:
 - 120 mm diameter at entrance
 - location of hollow (i.e., situated on main trunk)
 - direction of hollow
 - height of hollow
 - depth of hollow (where possible to assess from the ground)
 - evidence of breeding activity.

Foraging Assessment

The Black Cockatoo habitat assessment involved assessing the habitat for tree and shrub species known to be important dietary items e.g., Marri, Jarrah Banksia spp. and other Proteaceous species and included looking for the following (if present):

- Native trees and shrubs (e.g., Eucalypts, Banksia spp. and other Proteaceous species etc.)
- Evidence of feeding (chewed cones, seed and nut material)
- Opportunistic observations of Black Cockatoos in the survey area.

Foraging habitat quality criteria (semi quantitative) based on preferred known food items has been developed, their extent in an area being assessed and the condition of the habitat. Please note that we have attempted to keep this criterion simple, practicable and repeatable across habitats and regions so that assessments are consistent as is practicable (see Table 2 below).

Table 2: Foraging habitat quality and the criteria it is assessed against.

Please note that the primary and secondary food sources have been identified in the literature and these will be cited in the results section (should they be present).

Foraging Habitat Quality	Criteria
High Quality	- Primary food sources present and dominant (high relative abundance) in an area greater than 1 ha - Secondary food sources also present in medium to high relative abundance in an area greater than 1 ha - No recent extensive fire (>1 year) and limited to no signs of disease such as <i>Phytophthora cinnamomi</i> and or Marri canker
Medium Quality	- Primary food sources present but not dominant (medium relative abundance) in an area greater than 1 ha, and or - Secondary food sources also present in medium to high relative abundance in an area greater than 1 ha - No recent extensive fire (>1 year) and limited signs of disease such as <i>Phytophthora cinnamomi</i> and or Marri canker.
Low Quality	- Very limited to no primary food sources present in an area, and or - Secondary food sources also present in low to medium relative abundance - Recent fire (<1 year) and or signs of disease such as <i>Phytophthora cinnamomi</i> and or Marri canker
Nil	Self-explanatory.

Western Ringtail Possum (WRP) Habitat Assessment

Potential WRP habitat in the survey area was assessed and classified as vegetation containing species known to be used for shelter (dens in hollows and dreys) and species known to form part of the species diet. For example, species including Marri, Peppermint (*Agonis flexuosa*), Flooded Gum (*Eucalyptus rudis*), Spearwood (*Kunzea glabrescens*), *Melaleuca viminea*, Christmas Tree (*Nuytsia floribunda*), Woody Pear (*Xylomelum occidentale*) and *Acacia saligna* (Shedley & Williams, 2014).

Diurnal resting sites and refuges include dreys, platforms, tree hollows, hollow logs, balga (*Xanthorrhoea* spp.) skirts, under sedges, forest debris and disused rabbit warrens (Jones et al. 1994, Wayne et al. 2000, Wayne 2005). Dreys range from rough platforms to more elaborate roughly spherical arboreal nests constructed from vegetation, and are generally built where hollows are absent (de Tores et al. 1998).

The WRP habitat assessment consisted of the following:

- Daytime searches for potential den sites (including dreys in trees and large shrubs such as Peppermints and potential tree hollows if present) were undertaken in suitable habitat where there were trees considered large enough to contain hollow-bearing trees of a suitable size or in shrubs where dreys could possibly be constructed (if and where habitat was suitable).
- Daytime searches for signs of activity, such as scratches on tree trunks and scats on the ground below trees with hollows or dreys were undertaken (if and where habitat was suitable).

3.3.3 Bird Surveys

Systematic bird surveys were undertaken in all habitats in the survey area. Bird surveys were carried out during typical peak periods of activity when birds were calling and moving about, this was typically in the 3-4 hours following sunrise, particularly during warmer periods and also in the afternoon.

3.3.4 Opportunistic Observations

Fauna was opportunistically observed and recorded during the survey. This included opportunistic records of fauna species encountered while traversing the survey area on foot and while travelling by vehicle on tracks, as this was mostly undertaken at < 20 km/h.

Opportunistic data comprises records of fauna species by location and coordinates are taken with a GPS in the case of any conservation significant fauna. Noting that many of the bird species recorded during a survey come from opportunistic observations.

3.3.5 Taxonomy

For species identified in the desktop assessment, where there is doubt to their true taxonomy (through subsequent name changes or taxonomic reviews), an effort was made to determine the current scientific name for each taxon. In some cases, old scientific names were presented where correct nomenclature could not be determined due to name changes. Some taxon names may be followed by 'sp.', meaning that the species name was not given in the data source or the identification is in doubt. Where there are previously recorded taxa such as this that have the potential to be a conservation significant species, they are discussed specifically in the results and discussion sections.

Taxonomy and nomenclature in this report follows the accepted listing of published terrestrial vertebrate species, primarily the WA Museum (WAM) (2022). In addition, the following are also considered where relevant; the listing for amphibians and reptiles is consistent with Wilson & Swan (2021) and Chapple (2019) and to a lesser extent Cogger (2014); bird listings are consistent with Christidis & Boles (2008) and mammal listings are consistent with Woinarski et al. (2014).

3.3.6 Fauna Survey limitations

Survey limitations are sometimes difficult to predict, as is the extent to which they influence survey effort and results. The limitations of the fauna survey are outlined below in Table 3.

Table 3. Limitations associated with the survey.

Potential Limitation or Constraint	Impact on Survey	Comment
Qualifications and survey experience	None	The Zoologists that undertook the survey are qualified and experienced. Dr Ron Firth has 25 years of experience designing, managing and undertaking biodiversity and ecological surveys throughout Western Australia, the Northern Territory, Queensland, New South Wales and Victoria. He has written over 150 consultant reports and has authored or co-authored 15 papers that have been published in peer reviewed scientific journals and has made other contributions to published Books. Laura Stevens has ten years of experience designing, managing and undertaking biodiversity and ecological surveys throughout Western Australia. Laura has written more than 45 consultant reports. Therefore, no perceived limitations associated with qualifications and experience.
Timing - weather, season	None	The field assessment was undertaken from 1 st to 2 nd December 2022. The survey was conducted as a basic survey and therefore primarily about defining and describing broad fauna habitats present, and to undertake a likelihood assessment for conservation significant species based for the most part on the habitats and database results. Therefore timing, weather and season are not deemed a prime consideration. Further to this, the targeted searches for Black Cockatoos and Western Ringtail Possums are not dependent on season.
Access	Limited Impact	The survey area was generally accessible, but only by foot. However, in some areas, the vegetation was too thick and inaccessible.
Scope - Life forms sampled	None	The primary objective of the field assessment was to broadly describe terrestrial fauna habitats, undertake targeted searches where and when relevant, and make general observations and this was achieved.
Sources of information	None	Sources of information included the DBCA threatened fauna database, PMST, NatureMap and ALA. Other sources of information included past reports, and the scientific literature (peer reviewed scientific papers and books).

Potential Limitation or Constraint	Impact on Survey	Comment
Completeness	None	The main objective of the survey was to undertake a general assessment of habitat for terrestrial fauna and threatened species. In addition, based on the field assessment and database search results we assessed the likelihood of a number of threatened species occurring in the survey area. This was achieved.
Disturbance	Limited Impact	Disturbance in the survey area was limited and consisted of a disused and old vehicle track and evidence of recent fire in an area approximately 1.3 ha in size. This burnt area would have an impact on fauna habitat for a period of time.

Figure 4: Fauna Habitat and Fauna Assessment Locations

4. Results

4.1 Desktop Results

Results of the databases searches can be seen in Appendix 2 and identified the following:

- DBCA – 77 conservation significant vertebrate fauna species (one reptile species, 60 bird species and 16 mammal species).
- NatureMap – 429 vertebrate fauna species (10 amphibian species, 42 reptile species, 303 bird species and 68 mammal species).
- EPBC PMST - 67 threatened species, 65 migratory species and 91 listed marine species.
- ALA – 312 vertebrate fauna species (12 amphibian species, 38 reptile species, 227 bird species and 35 mammal species).

The DBCA Threatened Fauna Database returned a total of 6444 conservation significant fauna records and 77 species from within a 30 km buffer of the survey area. In total 60 of these species were birds, a large number of which were shorebirds, marine and waterbirds, which will be briefly discussed below.

Shorebirds and Waterbirds

Numerous shorebird and waterbird species were returned in the database searches. These were a combination of waders/shorebirds and waterbirds (Appendix 2). These wetland avifauna such as wading birds, including Sandpipers and Godwits for example, inhabit estuaries, mudflats, saltmarshes, sandflats and beaches, and salt lakes with shallow water edges, where they feed on invertebrates such as worms, molluscs, insects and crustaceans (Garnett et al. 2011, Garnett & Baker 2021).

Many of these DBCA records are from nearby wetland habitat including Rushy Point and Princess Royal Harbour, approximately 7 km to the east of the survey area, or Emu Point and Oyster Harbour, which are approximately 15 km to the north east of the survey area. These locations provide suitable habitat in the way of shallow water for various waterbird species, however this habitat is absent from the survey area itself (Figure 5).

In addition, some records are classed as pelagic (while observed from the coast [for example Elleker, Nanarup, King George Sound, or Eclipse Island Albany]). This ocean habitat is also not present in the survey area. Therefore, these species have been omitted from any further discussion.

Marine Fauna

Some marine fauna or terrestrial fauna that use marine habitats or have been recorded in marine reserves, are listed as Marine under the EPBC Act (for example Whales, Dolphins etc). In addition, several species of bird in the database searches are listed as Marine under the EPBC Act; however, these species are only considered conservation significant when a proposed development occurs in a Commonwealth marine area (i.e., any Commonwealth Waters or Commonwealth Marine Protected Area). Outside of such areas, the EPBC Act does not consider these species to be matters of national environmental significance (unless they are listed under another category such as migratory), so are not protected under the Act.

Now Regionally Extinct

A number of threatened species in the database searches were also known to be historical records of species now regionally extinct, for example the Bilby (*Macrotis lagotis*), Dibbler (*Parantechinus apicalis*), Quokka (*Setonix brachyurus*), Woylie (*Bettongia penicillata ogilbyi*) and Tammar Wallaby (*Notamacropus eugenii derbianus*) (Appendix 2). These species have been excluded from any further discussion.

In addition, those species with very few records (three or less) and very old/historical records in the DBCA database have also been omitted from further discussion (with a few exceptions). Particularly if these results are classed as uncertain (with regard to identification of species), or are from named locations or provide habitat not present in the survey area (for example the Western Ground Parrot [*Pezoporus flaviventris*] and the Water Rat [*Hydromys chrysogaster*]).

Unsuitable Habitat

Some species present in the database searches simply won't be in the survey area because suitable habitat is not available e.g., the Blue-billed Duck (*Oxyura australis*) which is almost entirely aquatic, and rarely seen on land. This species tends to occur in flocks on large, deep open freshwater dams and lakes or they seek refuge in vegetation during the day. This habitat is not present in the survey area.

In addition, fauna is not distributed evenly across the landscape, are more abundant in some places than others, and consequently more detectable (Currie 2007). Furthermore, some small, common ground-dwelling reptile and mammal species tend to be habitat specific, and many bird species can occur as regular migrants, occasional visitors or vagrants. Therefore, all these species have been excluded from any further discussion.

Database Errors and Anomalies

Occasionally there are errors and/or anomalies in the database searches that are sourced from the various government departments, for example, the Grey Wagtail (*Motacilla cinerea*) which is a rare visitor and this species was only present in the PMST (Johnstone & Storr 1998, DotE 2015). Also, the Western Whipbird (*Psophodes nigrogularis*), which is present in all the databases, but the DBCA threatened fauna database, which provides the most detailed information, doesn't specify the subspecies. This detail is required for assessment of this particular species, due to both the conservation listing and preferred habitat of each subspecies. These species have been omitted from any further discussion, with some exceptions.

It is important to note that the PMST is not entirely based on point records but also on broader information (e.g., bioclimatic distribution models), whereas the DBCA threatened fauna database is solely based on point records. Consequently, the results of the PMST are in some cases less accurate, particularly at a local scale. As a result, the PMST can include species that do not occur in the study area because, for example, there is no habitat available or they are now known to be locally extinct.

Conservation Significant Fauna

With the above-mentioned species removed, a total of 13 conservation significant species retrieved from the database searches are considered as either recorded (none were recorded), likely, possible or unlikely to occur in the survey area, with this based on location of the database record, habitats present in the survey area, and importantly the species ecology. Of these 13 conservation significant species, none have been recorded in the survey area, two species are considered likely to occur in the survey area, four are considered as possible and seven species are considered unlikely to occur. A summary of the 13 threatened species records is outlined below (Table 4). All conservation significant species recorded or considered likely to occur will be addressed in the discussion.

The Likelihood of each species is based on the following criteria:

- Recorded: Recorded during the field survey or from database records in the survey area
- Likely: Suitable habitat is present in the study area and the study area is in the species' known distribution
- Possible: Limited or no suitable habitat is present in study area, but is nearby. The species has good dispersal abilities and is known from the general area
- Unlikely: No suitable habitat is present in study area but is nearby, the species has poor dispersal abilities, but is known from the general area; or suitable habitat is present, however, the study area is outside of the species' known distribution.

Table 4. Conservation significant fauna potentially occurring in the survey area.

CrE = Listed as Critically Endangered under the EBPC Act and BC Act, En = Listed as Endangered under the EBPC Act and BC Act, Vu = Listed as Vulnerable under the EBPC Act and BC Act, Mi = Listed as Migratory under the EBPC Act and BC Act, OS = Other specially protected species under the BC Act. Both the EPBC Act and BC Act use IUCN threat categories to determine the threat status and category of species. P4 and P3 = Priority listed under the BC Act.

Common Name	Species Name	EPBC Status	WA BC Status	DBCA Database Records	NatureMap Database Records	EPBC PMST Records	ALA Database Records	Likelihood of Occurrence in Survey Area	Summary of Rationale
Reptiles									
Short-nosed Snake	<i>Elapognathus minor</i>		P2	7 records	6 records	Not present	Present	Unlikely	The seven records of the Short-nosed Snake were all historical specimens that were vouchered at the WAM. The preferred habitat of the Short-nosed Snake consists of heaths along the margins of swamps, in sedgeland and wet sclerophyll forest, which is not present in the survey area.
Birds									
Baudin's Cockatoo	<i>Zanda baudinii</i>	EN	EN	382 records	315 records	Present	Present	Possible	A Black Cockatoo Assessment forms part of this report, therefore the species will be discussed in Section 5
Carnaby's Cockatoo	<i>Zanda latirostris</i>	EN	EN	593 records	486 records	Present	Present	Possible	A Black Cockatoo Assessment forms part of this report, therefore the species will be discussed in Section 5
Forest Red-tailed Black Cockatoo	<i>Calyptorhynchus banksii naso</i>	VU	VU	30 records	21 records	Present	Not present	Possible	A Black Cockatoo Assessment forms part of this report, therefore the species will be discussed in Section 5
Malleefowl	<i>Leipoa ocellata</i>	VU	VU	4 records	2 records	Not present	Present	Unlikely	The four records of the Malleefowl in the DBCA threatened fauna database were from between the years 1963 and 2016. The closest of these records was approximately 11.5 km to the north-east of the survey area (Figure 5 and Appendix 2). This closest record is from 2000, the certainty of the record is given as moderately certain. The three remaining records are either a dead sighting, moderately certain or an historic record. In addition, suitable habitat in the way of low woodlands dominated by mallee Eucalypts and/or acacia, with a dense canopy and an open ground layer in which they can construct their mounds (Benshemesh 2007), with abundant leaf litter (for breeding) is not present in the survey area.

Common Name	Species Name	EPBC Status	WA BC Status	DBCA Database Records	NatureMap Database Records	EPBC PMST Records	ALA Database Records	Likelihood of Occurrence in Survey Area	Summary of Rationale
Noisy Scrub-bird	<i>Atrichornis clamosus</i>	EN	EN	9 records	6 records	Not present	Present	Unlikely	The nine records of the Noisy Scrub-bird in the DBCA threatened fauna database were from between the years 1990 and 2008. The closest of these records was approximately 13.8 km to the east of the survey area, in Torndirrup National Park. (Figure 5 and Appendix 2). This closest record is from 1994 and part of a translocation programme. The remaining eight records are between 15 and 22 km from the survey area either as part of the translocation programme, or from specific locations, which generally appear to be rocky hills. This species therefore lacks recent or nearby records. Although the survey area has suitable habitat in the way of dense understory and shrub layer with sedges, the species requires long-unburnt vegetation with a thick accumulation of litter and piles of debris (required for breeding and foraging) (Danks et al. 1996), which is not present.
Osprey	<i>Pandion haliaetus</i>		OS	222 records	164 records	Present	Present	Possible	The 222 records of the Osprey in the DBCA threatened fauna database, were from between the years 1963 and 2016. The closest of these records was approximately 3 km to the east of the survey area (Figure 5 and Appendix 2). This closest record is from the Bibbulmun Track in 1998. The remaining records are between 3 and 24 km from the survey area, many of which are from Rushy Point, which is approximately 6 km from the survey area and provides wetland habitat not present in the survey area. There are numerous records of the Osprey, which requires coasts and near-coastal wetland habitat, where it feeds mainly on fish, sea snakes and nesting seabirds (Johnstone & Storr 1998). The survey area does not contain rocky cliff faces where this species can perch or build nests, however, the Osprey, is

Common Name	Species Name	EPBC Status	WA BC Status	DBCA Database Records	NatureMap Database Records	EPBC PMST Records	ALA Database Records	Likelihood of Occurrence in Survey Area	Summary of Rationale
									highly mobile and may utilise the survey area, as it flies over coastal areas, hunting for fish etc.
Peregrine Falcon	<i>Falco peregrinus</i>		OS	40 records	30 records	Not present	Not present	Unlikely	The 40 records of the Peregrine Falcon in the DBCA threatened fauna database, were from between the years 1977 and 2018. The closest of these records was approximately 4.7 km to the north of the survey area (Figure 5 and Appendix 2). This closest record is from 2012, from Albany Racecourse. The Peregrine Falcon occurs mainly along rivers and ranges as well as wooded watercourses and lakes and nests primarily on cliffs, granite outcrops and quarries (Olsen & Fuentes 2008). This habitat is not present in the survey area.
Western Whipbird Heath / Mallee)	<i>Psophodes nigrogularis nigrogularis/oberon</i>	EN	P4	12 records	1 record	Not present	Present	Unlikely	The 12 records of the Western Whipbird in the DBCA threatened fauna database are unclear. The database doesn't specify the subspecies, it just provides EN or P4 for five of the records and EN for seven of the records. These records also appear to be inaccurate (with regard to habitat) when the data is plotted (Figure 5 and Appendix 2). The records of the Western Whipbird are from between 1963 and 2002. The closest of these records was approximately 1 km to the north of the survey area and is from a survey undertaken for the Albany wind farm in 2002 (Figure 5 and Appendix 2). <i>P.n. oberon</i> is restricted to scattered locations throughout the Southern Wheatbelt and Central South Coast Regions, with the majority in Fitzgerald River National Park and Stirling Range National Park. It occurs in open mallee eucalypt woodland with a dense, tall shrub layer up to 1.5 metres tall, dominated by such species as Hakea, Lambertia or Banksia (DPaW 2014). Suitable habitat is therefore not present in the survey area and therefore the subspecies is considered unlikely to occur.

Common Name	Species Name	EPBC Status	WA BC Status	DBCA Database Records	NatureMap Database Records	EPBC PMST Records	ALA Database Records	Likelihood of Occurrence in Survey Area	Summary of Rationale
									<i>P.n. nigrogularis</i> is restricted to a small coastal strip east of Albany from Two Peoples Bay and Mount Gardner in the south west to about Cape Riche Road in the north east, with the South Coast Highway as an approximate inland boundary. In this area, it occurs in heath-like thicket associations on coastal dunes and in low, dense mallee woodland or shrubland with understorey of dense, stunted shrubs (DPaW 2014). While suitable habitat is present in the survey area, a lack of records (and clarity of data in those records), results in the subspecies being considered unlikely to occur in the survey area.
Mammals									
Quenda	<i>Isoodon fusciventer</i>	P4		189 records	58 records	Not present	Present	Likely	See section 5 - Discussion
Wambenger	<i>Phascogale tapoatafa wambenger</i>		CD	7 records	1 record	Not present	Not present	Unlikely	The seven records of the Wambenger in the DBCA threatened fauna database, were from between the years 1974 and 2006. The closest of these records was approximately 8.5 km to the east of the survey area (Figure 5 and Appendix 2). This closest record is a specimen from 1982, as are the majority of these records. The Wambenger is restricted to the south-west, and its characteristic low population densities make it vulnerable to localised extinction (Van Dyck & Strahan 2008). This species inhabits dry sclerophyll forests and open woodlands containing hollow-bearing trees with a sparse ground cover (Rhind 1996). This habitat is not present in the survey area.
Chuditch	<i>Dasyurus geoffroii</i>	VU	VU	5 records	2 records	Present	Not present	Unlikely	The five records of the Chuditch in the DBCA threatened fauna database, were from between the years 1974 and 2016 and are generally a mix of historic records, secondary signs, dead or trapped individuals. The closest of these records is from 1974 and approximately 7.3 km to the north of the survey area (Figure 5 and Appendix 2).

Common Name	Species Name	EPBC Status	WA BC Status	DBCA Database Records	NatureMap Database Records	EPBC PMST Records	ALA Database Records	Likelihood of Occurrence in Survey Area	Summary of Rationale
									The Chuditch is now primarily restricted to the south west of WA, predominantly the Jarrah Forest and nearby areas. Though, there are small, isolated subpopulations that persist in the Avon Wheatbelt, eastern Goldfields Woodlands and Mallee and in Fitzgerald National Park and Ravensthorpe Range (Woinarski et al. 2014). Suitable habitat in the way of Jarrah Forest is not present in the survey area.
Western Ringtail Possum	<i>Pseudocheirus occidentalis</i>	CR	CR	714 records	740 records	Present	Not present	Likely	A Western Ringtail Possum habitat assessment forms part of this report, therefore the species will be discussed in Section 5

Figure 5: Threatened Fauna Records (DBCA)

4.2 Field Survey Results

During the field assessment in the survey area a total of 17 species were recorded (this included reptiles, birds and mammals). This includes species recorded at habitat assessment sites, bird survey locations and opportunistically while traversing the survey area on foot.

Many small reptiles and mammals are captured during detailed surveys when trapping is undertaken. Noting that this was a basic terrestrial fauna survey.

All species recorded can be seen below.

- Australian Kestrel (*Falco cenchroides*)
- Australian Magpie (*Cracticus tibicen*)
- Australian Raven (*Corvus coronoides*)
- Bobtail (*Tiliqua rugosa*)
- Brown Quail (*Coturnix ypsilophora*)
- Carpet Python (*Morelia spilota*)
- Common Bronzewing (*Phaps chalcoptera*)
- Dugite (*Pseudonaja affinis*)
- Grey Fantail (*Rhipidura fuliginosa*)
- Grey Butcherbird (*Cracticus torquatus*)
- Heath Monitor (*Varanus rosenburgi*)
- Red-capped Parrot (*Purpureicephalus spurius*)
- Red-eared Firetail (*Stagonopleura oculatum*)
- Rufous Whistler (*Pachycephala rufiventris*)
- Silveryeye (*Zosterops lateralis*)
- Western Grey Kangaroo (*Macropus fuliginosus*)
- White-cheeked Honeyeater (*Phylidonyris niger*)

Amphibians

No amphibian species was recorded (seen or heard calling) during the field assessment. There was no wetland habitat present in the survey area and so the absence of frogs is not surprising given no water was present in the survey area.

Reptiles

During the field assessment four reptile species were recorded. One skink species, the Bobtail, one goanna species, the Heath Monitor and two snake species, the Dugite and Carpet Python. None of the reptile species recorded are of conservation significance.

Birds

During the field assessment 12 bird species were recorded. The family with the most species recorded was Artamidae, with two species, (Australian Magpie and Grey Butcherbird). All other species were from individual families. No bird species of conservation significance were recorded during the survey.

Mammals

A single mammal species was recorded during the assessment, the Western Grey Kangaroo, which is not of conservation significance.

4.2.1 Fauna Habitat

A single broad fauna habitat type was identified in the survey area, Coastal Heath (approximately 27 ha). This broad habitat is associated with marine dunes and widespread and common in areas adjacent to the survey area and, more broadly, across the region. The fauna habitat type is mapped in Figure 4.6. A small section of the area showed evidence of recent fire (approximately 1.3 ha). An example habitat assessment is detailed in Appendix 3 and the photo points and location coordinates of the remaining habitat assessments are provided in Appendix 4.

Coastal Heath

Coastal Heath habitat comprised the entire survey area (with the exception of an old track that was being remediated). This habitat consisted of a canopy with predominantly Peppermint, *Eucalyptus* sp., *Acacia* sp. and *Melaleuca* sp. with an average height of approximately 2.5 m. The understorey consisted of low mixed shrubs such as *Banksia* sp., *Calothamnus* sp., *Astartea* sp. and sedges such as *Lepidosperma* with a height of about 1 to 2 m.

Coastal Heath habitat lacks a tall and open overstory, so provides little habitat for larger bird species, however there is habitat for the smaller bird species such as the White-cheeked Honeyeater, Red-eared Firetail and Silvereye due to the dense vegetation. The dense low stratum provides shelter for various common reptile species and small mammals while the sandy soils provide habitat for reptile species. There was very little to no grass and little leaf litter or woody debris. An example of Coast Heath habitat is provided in Plate 1.

Plate 1. Example of Coastal Heath habitat in the survey area (photo taken at HA 4 location).

4.2.2 Targeted Threatened Species Surveys

Black Cockatoo Habitat Assessment

During the field survey (two days), none of the three species of Black Cockatoos were recorded directly (i.e., sighted or their calls heard), or indirectly by the way of foraging evidence, for example chewed *Banksia* cones.

In addition, once this survey was completed after two days, we carried out another assessment in the wind farm for a further four days, and still no Black Cockatoos were sighted, heard or evidence of foraging was recorded.

Potential Breeding Habitat

In the survey area there are no tall trees with hollows large enough for Black Cockatoo to nest in, therefore, there is no potential Black Cockatoo breeding habitat present.

Foraging Habitat

None of the flora species recorded in the survey area are considered to be preferred foraging items of any of the three Black Cockatoo species. Therefore, there is no Black Cockatoo foraging habitat present in the survey area.

Western Ringtail Possum Habitat Assessment

During the assessment, no WRP were observed or their scats and no dreys were recorded. The suitability of the habitat in the survey area and the likelihood of this species occurring is discussed below in section 5.3.

5. Discussion

5.1 Conservation Significant Fauna

As mentioned in section 4.1 only conservation significant species considered Likely will be discussed in this section with information presented on their ecology, their distribution and the database search results. This information then links with the likelihood of occurrence that we assign to them i.e., why they are considered Likely to occur in the survey area.

Quenda (*Isoodon fusciventer*)

The Quenda is listed as P4 under the DBCA Priority List. This species once occurred throughout south-west WA; it now occurs from Guilderton southwards on the Swan Coastal Plain, in Jarrah and Karri forests and adjacent coastal vegetation complexes, east along the south coast to Cape Arid National Park. It is patchily distributed with isolated populations occurring in the Wheatbelt and nature reserves along the south coast.

The species inhabits scrubby, often swampy, vegetation with dense cover up to about 1 m high, with populations inhabiting Jarrah and Wandoo forests usually associated with watercourses, wetland fringes and heathland. The Quenda prefers areas with thick vegetation, where it constructs nests under plants on the ground. They do not create burrows, but occasionally use the burrows of other species. It feeds in adjacent forest and woodland that is burnt on a regular basis and in areas of pasture and cropland lying close to dense cover. The Quenda is often associated with wetlands with dense vegetation where they feed on fungi, fruit, seeds and insects. Quenda forages for food mainly by digging in the leaf-litter and soil to find insects, fungi, plant root nodules and bulbs (Woinarski et al. 2014).

Nest consists of a heap of ground litter over a shallow depression providing an internal chamber with loose regions at both ends for entry and exit. It is usually concealed next to or under logs, shrubs or piles of debris. The Quenda can also use old rabbit burrows. Quenda are generally nocturnal but can be active during the day, especially during winter (Woinarski et al. 2014). A large adult male has a home range of 2-7 ha compared to 1-3 ha for females. The size of the home range depends upon the density of individuals in an area, and the locality. Individuals are usually solitary though overlap in home ranges has been recorded for some individuals (DEC 2012).

The DBCA threatened fauna database returned 189 records of the Quenda in the vicinity of the survey area from 1909 to 2019. The closest record was approximately 3 km to the west from a survey undertaken at the wind farm in 1999 (there are also other records given as the wind farm). Of these 189 records the majority are either specimens, or from fauna surveys undertaken.

While the Quenda (or its diggings) was not recorded during this survey, it was recorded during a recent survey undertaken for the Albany wind farm in 2020 less than 1 km from the current survey area (Table 1). The Quenda was also recorded in fauna surveys undertaken in 2020 and 2019, however these records are slightly further from the current survey area (Table 1). These recent records are missing from the DBCA database (to date).

Suitable habitat in the way of heathland vegetation with dense cover is present in the survey area and a large number of records, result in the Quenda being considered Likely to occur in the survey area.

5.2 Black Cockatoo habitat Assessment

All three species of Black Cockatoo (Carnaby's Cockatoo, Baudin's Cockatoo and FRTBC) could potentially occur in the survey area. The distribution of all three species can be seen in the distribution maps in Appendix 5.

We reiterate that during the field survey, none of the three species of Black Cockatoos were recorded directly (i.e., sighted or their calls heard), or indirectly by the way of foraging evidence, for example chewed Banksia cones.

Carnaby's Cockatoo (*Zanda latirostris*)

Carnaby's Cockatoo is listed as Endangered under the EPBC Act and the BC Act. is endemic to south-west WA, and is distributed from the Murchison River to Esperance and inland to Coorow, Kellerberrin and Lake Cronin (Cale 2003). The species was once common, but the population has declined significantly in the last half century, and is now locally extinct in some areas (Johnstone & Storr 1998; Shah 2006). In the last 45 years (prior to Cale 2003) the species has suffered a 50% reduction in its abundance (Cale 2003). More recent information suggests this decline has continued. This reduction is due to the clearing of core breeding habitat in the wheatbelt, the deterioration of nesting hollows, and clearing of food

resources on the Swan Coastal Plain (SCP) (Cale 2003). The total population of Carnaby's Cockatoo was estimated to be 40,000 in 2008 (Johnstone & Kirkby 2008). Since then, trend analyses of the seven Great Cocky Counts 2010 – 2017 identified strong indications that the population of Carnaby's -Cockatoo inhabiting the Perth-Peel Coastal Plain continues to decline.

Carnaby's Cockatoos feed on seeds, nuts and flowers of a variety of native and exotic plants. Food plants include a variety of Eucalyptus species, such as Marri, Jarrah, Swan River Blackbutt (*Eucalyptus patens*), Coastal Blackbutt (*Eucalyptus tottiana*), Caesia (*Eucalyptus caesia*) and Salmon Gum, as well as Pine trees (*Pinus* sp.), Grevillea, Allocasuarina, and Hakea species (Shah 2006). Marri nuts that are damaged extensively, especially on the main body of the nut, are likely to have been chewed by Carnaby's Cockatoo. The 'levering' of Marri nuts by Carnaby's Cockatoos tends to leave different marks on the fruit casings, particularly in the location of indentations by the lower mandible and in the amount of damage caused to the rim of the fruit casing. Carnaby's Cockatoos also generally feed on green Marri nuts that are soft enough for their beaks to manipulate. The seeds from a variety of Banksia species and the cones of Pine trees provide the highest energetic yield (Cooper et al. 2002).

Breeding has been recorded from early July to mid-December, and primarily occurs in the wheatbelt in the semi-arid and subhumid interior (Johnstone & Storr 1998). However, this species is currently expanding its breeding range westward and south into the Jarrah-Marri forests of the Darling Scarp (e.g., Wungong Dam Catchment) and into the Tuart forests of the SCP including Yanchep, Baldi, Lake Clifton and near Bunbury (Johnstone & Kirkby 2011).

Carnaby's Cockatoo display strong pair bonds and mate for life. They nest in hollows of smooth-barked eucalypts particularly Salmon Gum and Wandoo but nests have also been found in other Eucalypt species including York Gum (*Eucalyptus loxophleba*), Flooded Gum (*Eucalyptus rudis*), the rough-barked Marri and Tuart (Johnstone & Kirkby 2011). In most nests in Tuart, eggs are laid on a mat of wood chips at the bottom of a large hollow (mostly top entry hollows) ranging from a few cm's to five m deep (Johnstone & Kirkby 2011). Clutch size is 1–2 eggs, more typically two; only one young is reared (Saunders 1986). Incubation lasts for 29 days and only the female incubates and broods. The nestling is brooded by the female during which time both rely on food from the male. Once brooding is complete, the female then leaves the nest each day at dawn, sometimes returning mid-morning (with the male) to feed the chick (Johnstone & Kirkby 2011). After approximately three weeks she ceases to brood and the chick is fed by one or both parents in the morning and in the late evening (Johnstone & Kirkby 2011).

Approximately 87% (525,732 ha) of potential Carnaby's Cockatoo habitat (i.e., areas of vegetation that contain flora species and vegetation types that could support the species' breeding, feeding and night roosting activities) has been cleared in the wheatbelt since European settlement. The south-west region is now a severely fragmented landscape and the further loss of foraging habitat, the lack of suitable breeding sites, climate change, alterations in the landscape, changing forest structure with almost every part of the Jarrah-Marri forest logged in the past and with most trees too young to form hollows, and competition with exotic species, exacerbate the future conservation of Carnaby's Cockatoo (Johnstone & Kirkby 2011).

Baudin's Cockatoo (*Zanda baudinii*)

Baudin's Cockatoo is listed as Endangered under the EPBC Act and the BC Act. This species is distributed through the south-western humid and subhumid zones, from the northern Darling Range and adjacent far east of the SCP (south of the Swan River), south to Bunbury and across to Albany (Johnstone & Kirkby 2011). Baudin's Cockatoo rarely occurs near the coast north of Mandurah, and rarely occurs north of the Swan River (Johnstone & Kirkby 2008, Johnstone & Storr 1998). Baudin's Cockatoo usually occur in small flocks of up to 30, or occasionally up to 50 and rarely in aggregations of up to 1200 (Johnstone & Kirkby 2008). Baudin's Cockatoo is distinguished from Carnaby's Cockatoo by its longer bill and slightly different call.

This species forages primarily in Eucalypt forest, where it feeds on Marri seeds, flowers, nectar and buds. They also feed on a wide range of seeds of Eucalyptus, Banksia, Hakea and Pines (*Pinus* sp.) as well as fruiting apples and pears and beetle larvae from under the bark of trees (Johnstone & Kirkby 2008, Johnstone & Storr 1998). Baudin's Cockatoo forages at all levels of the forest, from the canopy to the ground, often feeding in the understorey on proteaceous trees and shrubs, especially Banksia, and in orchards both in trees and on dropped or fallen fruit on the ground.

The breeding biology of this species is poorly known. It has been recorded breeding in the deep south-west, north to the Whicher Range and Lowden and also isolated records at Wungong Catchment, Serpentine (hills area) and east to Kojonup and near Albany (Johnstone & Kirkby 2008). They nest in large, mostly vertical, hollows of Karri, Marri and Wandoo.

Baudin's Cockatoos display strong pair bonds are monogamous and most likely mate for life (Johnstone & Kirkby 2008). The pair remains together all year round except when the female is incubating and brooding. Both adults play a part in selecting the nest hollow, but only the female is responsible for renovation and preparing the hollow for breeding. Preparation of the hollow consists of chewing around the entrance of the hollow and down one part of the interior wall. Pairs have also been recorded prospecting for hollows in most months and outside the breeding range (Johnstone & Kirkby 2008).

Forest Red-tailed Black Cockatoo (*Calyptrorhynchus banksii*)

The FRTBC is listed as Vulnerable under the EPBC Act and the BC Act. It is distributed through the humid and subhumid south-west of WA from Gingin through the Darling Ranges to the south-west from Bunbury to Albany (primarily in the hilly interior) (Johnstone & Storr 1998, Johnstone et al. 2013a). In these areas, the FRTBC inhabits dense Jarrah, Karri, and Marri forests that receive more than 600 mm average annual rainfall (Johnstone & Storr 1998). However, in recent years the FRTBC has moved on to the SCP to forage in the Perth metropolitan area (Johnstone & Kirkby 2011). The FRTBC occurs in pairs or small flocks, or occasionally large flocks of up to 200 birds (Johnstone & Storr 1998).

The FRTBC feeds primarily on Marri and Jarrah fruit, but also Tuart and to a lesser extent on Blackbutt, Albany Blackbutt (*Eucalyptus staeri*), Karri, Sheoak (*Allocasuarina fraseriana*) and Snottygobble (*Persoonia longifolia*) (Johnstone et al. 2013b). The FRTBC can obtain energy faster when feeding on Marri and Jarrah than other food sources (Cooper et al. 2002), and these two-plant species make up most of their diet (Johnstone et al. 2013b).

FRTBC shear the base of Marri nuts at a 45° angle to remove seeds (the 'bottom slice' method), while Baudin's Cockatoos use their elongated upper mandible to pry seeds out, leaving the nut intact (the 'lever') (Johnstone & Kirkby 1999, Cooper et al. 2002). Carnaby's Cockatoos may use either technique to feed on Marri nuts, but generally with some modification, e.g., the 'slicing' of fruits may occur along the side of the fruit casing.

The FRTBC is monogamous and pairs nest in tree hollows from 6.5 – 33 m above ground and most nests are in large and old mature Marri, and these trees are the most important nesting tree throughout the FRTBC range (Johnstone et al. 2013a). Nest trees of the FRTBC have a mean circumference at breast height of 2.79 m, a mean estimated age of 222 years and a mean overall height of 20.24 m (Johnstone et al. 2013a).

Breeding has been recorded in all months, with peaks in April-June and August-October. Only one egg is laid, which the female incubates for 29 to 31 days, before a nestling hatches and weighs between 27 and 32 g. The female remains in the hollow during incubation and only leaves for a short period in the evening to be fed by the male, usually at dusk (Johnstone et al. 2013b). Brooding is for up to 10 days, after which the female leaves the nest between dawn and dusk. Pairs of birds appear to recognise each other by calls, not responding to calls by others in the area. Chicks only respond when the parent is heard and are fully feathered at 48 days (Johnstone et al. 2013b).

Potential Black Cockatoo Breeding Habitat

The survey area consisted entirely of coastal heath and as such no large trees were present. There were Eucalypts, however, these were short and had a mallee form (DBH of trunks were too small), and so were too small to contain hollows suitable for Black Cockatoos to nest in. Therefore, the survey area does not contain any potential breeding habitat for the three Black Cockatoo species.

Potential Black Cockatoo Foraging Habitat

The coastal heathland typically consisted of an overstorey of Peppermint, *Eucalyptus* sp., *Acacia* sp. and *Melaleuca* sp. The understorey consisted of low mixed shrubs such as *Banksia* sp., *Calothamnus* sp., *Astartea* sp. and sedges such as *Lepidosperma*. None of these flora species recorded in the survey area are considered to be preferred foraging items of any of the three Black Cockatoo species. Therefore, there is no Black Cockatoo foraging habitat present in the survey area.

DBCA Black Cockatoo Database Records

The DBCA threatened fauna database returned 593 records of Carnaby's Cockatoo, 382 records of Baudin's Cockatoo and 30 records of the FRTBC (as well as 302 records of White-tailed Black Cockatoo, which could be Carnaby's or Baudin's as they look very similar and can be confused by those unfamiliar with the species). More recent records of Black Cockatoos recorded in the vicinity of the survey area can also be seen in Table 1. (These records are missing from the DBCA database (to date)).

Records of Carnaby's Cockatoo are from 1980 to 2018. The closest record of Carnaby's Cockatoo is 78 m to the south-west of the survey area from 2001.

Records of Baudin's Cockatoo are from 1980 to 2018. The closest record of Baudin's Cockatoo is 80 m to the west of the survey area from 2013. This record is from the Bibbulmun Track, which runs through the survey area, however in the DBCA database it is classed as 'not sure' in certainty.

Records of the FRTBC are from 1984 to 2020. The closest record of the FRTBD is 4.4 km to the north of the survey area from 2007.

It is important to note that although there are many Black Cockatoo records in the vicinity of the survey area, and some are < 100 m away, the search radius was 30 km, which also covers areas nearby that do contain potential breeding habitat and foraging habitat, yet there are records (Figure 5). This breeding and foraging habitat is lacking from the survey area itself and therefore, while Black Cockatoos may fly over the survey area, as they are highly mobile, they are unlikely to utilise the survey area for breeding and or foraging. As such all three Black Cockatoo species are classed as Possibly occurring in the survey area.

It is also important for context to note that a record in the DBCA threatened fauna database for Black Cockatoos (and in fact many bird species which are highly mobile) will often represent a sighting while birds are flying past i.e., they may not be utilising the location/ habitat on the ground where the record is taken from (unfortunately the database does not include this information). The location itself is where the person was standing while they recorded the bird and we know this from our own extensive experience over many years. Finally, as with all fauna, but particularly highly mobile species such as Black Cockatoos, database records represent a finite point in time and space.

5.3 Western Ringtail Possum Habitat Assessment

Western Ringtail Possum is listed as Critically Endangered (CR) under the EPBC Act and the BC Act. Western Ringtail Possum populations have declined or become locally extinct over much of their former range in the south-west as a result of clearing and fragmentation of habitat associated with agricultural development (Jones et al. 1994; Shedley & Williams 2014). However, even in the relatively intact forested regions of the south-west, populations have declined significantly, particularly since 1998 (Shedley & Williams 2014; Woinarski et al. 2014). Threatening processes include logging intensity, inappropriate fire regimes, dieback, and a drying climate may have all contributed to the degradation of WRP habitat, and increased the exposure of WRP to predation by foxes (*Vulpes vulpes*) and cats (*Felis catus*) or to heat stress (Jones et al. 1994; Wayne et al. 2005; Woinarski et al. 2014).

The highest population densities of WRP are now found around the Bunbury (Binningup) to Dunsborough coastal strip, which coincides with an area of urban development and loss of prime habitat (Shedley & Williams 2014). This coastal strip is considered to be a stronghold for the WRP and is therefore a focus for recovery and conservation of the species. High WRP population densities have been recorded in some urban areas, particularly where mature Peppermint trees (*Agonis flexuosa*) with large, dense and overlapping canopies have been retained (Harewood 2008). This habitat type is thought to provide high quality shelter and food. High population densities may indicate that WRP have benefited from some forms of urbanisation, or alternatively have been displaced from the broader setting by vegetation clearing and are confined to smaller pockets of remnant habitat.

The main component of suitable habitat for WRP is the Peppermint tree either as a dominant woodland species or as an understory component of Eucalypt woodland (Jones et al. 1994). In coastal areas, the WRP diet is largely dominated by Peppermint leaves (Jones et al. 1994; De Torres 2008), with a preference for young leaves, which have lower lignin content, often higher nitrogen levels and are more digestible (Ellis & Jones 1992). Additional woodland species known as WRP habitat include Jarrah, Marri, Tuart and various species of Melaleuca.

WRP populations in the south coast management zone (which stretches from [approximately 15 km] west of Walpole to [approximately 60 km] east of Albany) are associated with a diverse range of habitats including coastal heath, Jarrah/Marri woodland and forest, peppermint woodlands, myrtaceous heaths and shrublands, Bullich dominated riparian zones and Karri forest. (DPaW 2014). In the vegetation associations mapped in the Albany urban area by Sandiford & Barrett (2010), most WRP records were from coastal limestone heath vegetation. Little is known of the relative abundance of the WRP within and between vegetation types, including the vegetation types where they have been recorded in the broader Denmark to Mt Manypeaks area. As such the habitat critical to survival in the south coast management zone cannot currently be clearly defined so all remnant habitat is considered important.

The milder climate of the South Coast is likely to become increasingly important or critical to the survival of the species in a warming and drying climate trend and the sensitivities this species has to drought and heat and the anticipated climate change effects on the forage and shelter quality of vegetation upon which this species depends (Molloy et al. 2014).

Ideal WRP habitat comprises of long unburnt mature remnants of Peppermint woodlands with high canopy continuity and high foliage nutrients (high in nitrogen and low toxin levels); other habitats comprise of Jarrah/Marri forests and woodlands with adequate hollows, coastal heath, myrtaceous heaths and shrublands, Bullich (*Eucalyptus megacarpa*) dominated riparian zones and karri forests.

The survey area contains approximately 28 ha of suitable habitat in the way of coastal limestone heath vegetation with Peppermint. This habitat contains potentially suitable mixed coastal heath and shrubland containing myrtaceous heaths and shrubs, with a dense understory, which may be utilised by the species. Peppermint when available, is their preferred habitat, and this was present in the survey area. There are no large trees with hollows suitable for the WRP to den in. During the field survey, no dreys or scats were recorded in the survey area.

DBCA WRP Database Records

The DBCA threatened fauna database returned 714 records of the WRP in the vicinity of the survey area. The closest record was 2.9 km to the north-west of the survey area, in habitat that appears to be similar to the coastal heath habitat of the survey area. The record however was undated. Many records of the WRP and suitable habitat, result in the species being considered likely to occur in the survey area.

APPENDICES

Appendix 1: Conservation Categories

Categories of Threatened Fauna Species under the EPBC Act

Conservation Code	Description
Ex	Extinct Taxa which at a particular time if, at the time, there is no reasonable doubt that the last member of the species has died.
ExW	Extinct in the Wild Taxa which are known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; or it has not been recorded in its known and/or expected habitat, at appropriate seasons, anywhere in its past range, despite exhaustive surveys over a time frame appropriate to its life cycle and form.
CE	Critically Endangered Taxa which at a particular time, it is facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with the prescribed criteria.
En	Endangered Taxa which is not critically endangered and it is facing a very high risk of extinction in the wild in the medium-term future, as determined in accordance with the prescribed criteria.
Vu	Vulnerable Taxa which is not critically endangered or endangered and is facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with the prescribed criteria.

Conservation and Attractions

CONSERVATION CODES

For Western Australian Flora and Fauna

Threatened, Extinct and Specially Protected fauna or flora¹ are species² which have been adequately searched for and are deemed to be, in the wild, threatened, extinct or in need of special protection, and have been gazetted as such.

The Wildlife Conservation (Specially Protected Fauna) Notice 2018 and the Wildlife Conservation (Rare Flora) Notice 2018 have been transitioned under regulations 170, 171 and 172 of the Biodiversity Conservation Regulations 2018 to be the lists of Threatened, Extinct and Specially Protected species under Part 2 of the Biodiversity Conservation Act 2016.

Categories of Threatened, Extinct and Specially Protected fauna and flora are:

T Threatened species

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the Biodiversity Conservation Act 2016 (BC Act).

Threatened fauna is that subset of 'Specially Protected Fauna' listed under schedules 1 to 3 of the Wildlife Conservation (Specially Protected Fauna) Notice 2018 for Threatened Fauna.

Threatened flora is that subset of 'Rare Flora' listed under schedules 1 to 3 of the Wildlife Conservation (Rare Flora) Notice 2018 for Threatened Flora.

The assessment of the conservation status of these species is based on their national extent and ranked according to their level of threat using IUCN Red List categories and criteria as detailed below.

CR Critically endangered species

Threatened species considered to be *"facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines"*.

Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines. Published under schedule 1 of the Wildlife Conservation (Specially Protected Fauna) Notice 2018 for critically endangered fauna or the Wildlife Conservation (Rare Flora) Notice 2018 for critically endangered flora.

EN Endangered species

Threatened species considered to be *"facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines"*.

Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines. Published under schedule 2 of the Wildlife Conservation (Specially Protected Fauna) Notice 2018 for endangered fauna or the Wildlife Conservation (Rare Flora) Notice 2018 for endangered flora.

VU Vulnerable species

Threatened species considered to be *"facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines"*.

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines. Published under schedule 3 of the Wildlife Conservation (Specially Protected Fauna) Notice 2018 for vulnerable fauna or the Wildlife Conservation (Rare Flora) Notice 2018 for vulnerable flora.

Extinct species

Listed by order of the Minister as extinct under section 23(1) of the BC Act as extinct or extinct in the wild.

EX Extinct species

Species where *"there is no reasonable doubt that the last member of the species has died"*, and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

Published as presumed extinct under schedule 4 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for extinct fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for extinct flora.

EW Extinct in the wild species

Species that *"is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form"*, and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

Specially protected species

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

MI Migratory species

Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the *Convention on the Conservation of Migratory Species of Wild Animals* (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

Published as migratory birds protected under an international agreement under schedule 5 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

CD Species of special conservation interest (conservation dependent fauna)

Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Published as conservation dependent fauna under schedule 6 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

OS Other specially protected species

Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

Published as other specially protected fauna under schedule 7 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

Conservation codes for Western Australian flora and fauna

P Priority species

Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora.

Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

1 Priority 1: Poorly-known species

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.

2 Priority 2: Poorly-known species

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.

3 Priority 3: Poorly-known species

Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.

4 Priority 4: Rare, Near Threatened and other species in need of monitoring

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as Conservation Dependent.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

¹The definition of flora includes algae, fungi and lichens

²Species includes all taxa (plural of taxon - a classificatory group of any taxonomic rank, e.g. a family, genus, species or any infraspecific category i.e. subspecies or variety, or a distinct population).

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 08-Feb-2023

[Summary](#)

[Details](#)

[Matters of NES](#)

[Other Matters Protected by the EPBC Act](#)

[Extra Information](#)

[Caveat](#)

[Acknowledgements](#)

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	2
Listed Threatened Species:	67
Listed Migratory Species:	65

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	16
Commonwealth Heritage Places:	None
Listed Marine Species:	91
Whales and Other Cetaceans:	31
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	29
Regional Forest Agreements:	1
Nationally Important Wetlands:	1
EPBC Act Referrals:	26
Key Ecological Features (Marine):	None
Biologically Important Areas:	13
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Commonwealth Marine Area

[Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name	Buffer Status
EEZ and Territorial Sea	In buffer area only

Listed Threatened Ecological Communities

[Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text	Buffer Status
Proteaceae Dominated Kwongan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community may occur within area	In buffer area only
Subtropical and Temperate Coastal Saltmarsh	Vulnerable	Community likely to occur within area	In buffer area only

Listed Threatened Species

[Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.
Number is the current name ID.

Scientific Name	Threatened Category	Presence Text	Buffer Status
BIRD			
Botaurus poiciloptilus Australasian Bittern [1001]	Endangered	Species or species habitat known to occur within area	In feature area
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calidris tenuirostris Great Knot [862]	Critically Endangered	Roosting known to occur within area	In buffer area only
Calyptorhynchus banksii naso Forest Red-tailed Black-Cockatoo, Karrak [67034]	Vulnerable	Species or species habitat known to occur within area	In feature area
Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area	In buffer area only
Dasyornis longirostris Western Bristlebird [515]	Endangered	Species or species habitat likely to occur within area	In feature area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat may occur within area	In feature area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area	In feature area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat may occur within area	In feature area
Halobaena caerulea Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In feature area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Pachyptila turtur subantarctica Fairy Prion (southern) [64445]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Phoebastria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Psophodes nigrogularis nigrogularis Western Heath Whipbird [64449]	Endangered	Species or species habitat known to occur within area	In buffer area only
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area	In feature area
Zanda baudinii listed as Calyptorhynchus baudinii Baudin's Black-Cockatoo, Long-billed Black-cockatoo [87736]	Endangered	Breeding known to occur within area	In feature area
Zanda latirostris listed as Calyptorhynchus latirostris Carnaby's Black Cockatoo, Short-billed Black-cockatoo [87737]	Endangered	Breeding known to occur within area	In feature area
FISH			
Nannatherina balstoni Balston's Pygmy Perch [66698]	Vulnerable	Species or species habitat likely to occur within area	In buffer area only
Thunnus maccoyii Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat likely to occur within area	In feature area
INSECT			
Trioza barrettiae Banksia brownii plant louse [87805]	Endangered	Species or species habitat known to occur within area	In feature area
MAMMAL			
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat may occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area	In feature area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat known to occur within area	In feature area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area	In feature area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Species or species habitat likely to occur within area	In feature area
Parantechinus apicalis Dibbler [313]	Endangered	Species or species habitat known to occur within area	In feature area
Pseudocheirus occidentalis Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Species or species habitat known to occur within area	In feature area
OTHER			
Westralunio carteri Carter's Freshwater Mussel, Freshwater Mussel [86266]	Vulnerable	Species or species habitat likely to occur within area	In buffer area only
PLANT			
Banksia brownii Brown's Banksia, Feather-leaved Banksia [8277]	Endangered	Species or species habitat known to occur within area	In feature area
Banksia goodii Good's Banksia [16727]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Banksia verticillata Granite Banksia, Albany Banksia, River Banksia [8333]	Vulnerable	Species or species habitat likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Caladenia granitora [65292]	Endangered	Species or species habitat may occur within area	In feature area
Caladenia harringtoniae Harrington's Spider-orchid, Pink Spider-orchid [56786]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Calectasia cyanea Blue Tinsel Lily [7669]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Chordifex abortivus Manypeaks Rush [64868]	Endangered	Species or species habitat known to occur within area	In buffer area only
Conostylis misera Grass Conostylis [21320]	Endangered	Species or species habitat likely to occur within area	In buffer area only
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Isopogon uncinatus Albany Cone Bush, Hook-leaf Isopogon [20871]	Endangered	Species or species habitat known to occur within area	In feature area
Kennedia glabrata Northcliffe Kennedia [16452]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Microtis globula South-Coast Mignonette Orchid [6780]	Vulnerable	Species or species habitat likely to occur within area	In buffer area only
Sphenotoma drummondii Mountain Paper-heath [21160]	Endangered	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Verticordia apecta Hay River Featherflower, Scruffy Verticordia [65545]	Critically Endangered	Species or species habitat may occur within area	In buffer area only
Verticordia fimbrilepis subsp. australis Southern Shy Featherflower [24630]	Vulnerable	Species or species habitat known to occur within area	In buffer area only

REPTILE			
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding likely to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Species or species habitat may occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area	In feature area

SHARK			
Carcharias taurus (west coast population) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area
Galeorhinus galeus School Shark, Eastern School Shark, Snapper Shark, Tope, Soupfin Shark [68453]	Conservation Dependent	Species or species habitat may occur within area	In feature area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area	In feature area

Listed Migratory Species		[Resource Information]	
Scientific Name	Threatened Category	Presence Text	Buffer Status
Migratory Marine Birds			
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]	Vulnerable	Breeding known to occur within area	In feature area
Ardenna grisea Sooty Shearwater [82651]		Species or species habitat may occur within area	In feature area
Diomedea antipodensis Antipodean Albatross [64458]		Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat may occur within area	In feature area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area	In feature area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area	In feature area
Hydroprogne caspia Caspian Tern [808]	Endangered	Breeding known to occur within area	In feature area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]		Species or species habitat may occur within area	In feature area
Macronectes halli Northern Giant Petrel [1061]		Foraging, feeding or related behaviour likely to occur within area	In feature area
Onychoprion anaethetus Bridled Tern [82845]		Foraging, feeding or related behaviour likely to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area	In feature area
Migratory Marine Species			
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area	In feature area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area	In feature area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat may occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour may occur within area	In feature area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat may occur within area	In feature area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding likely to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Species or species habitat may occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area	In feature area
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Breeding known to occur within area	In feature area
Lagenorhynchus obscurus Dusky Dolphin [43]		Species or species habitat may occur within area	In feature area
Lamna nasus Porbeagle, Mackerel Shark [83288]		Species or species habitat may occur within area	In feature area
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat known to occur within area	In feature area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status	
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area	In feature area	
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area	In feature area	
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area	In buffer area only	
Rhincodon typus Whale Shark [66680]		Vulnerable	Species or species habitat may occur within area	In feature area
Migratory Terrestrial Species				
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area	In feature area	
Migratory Wetlands Species				
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area	
Arenaria interpres Ruddy Turnstone [872]		Roosting known to occur within area	In buffer area only	
Calidris acuminata Sharp-tailed Sandpiper [874]		Roosting known to occur within area	In feature area	
Calidris alba Sanderling [875]		Roosting known to occur within area	In buffer area only	
Calidris canutus Red Knot, Knot [855]		Endangered	Species or species habitat known to occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]		Critically Endangered	Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calidris melanotos Pectoral Sandpiper [858]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Calidris ruficollis Red-necked Stint [860]		Roosting known to occur within area	In buffer area only
Calidris tenuirostris Great Knot [862]		Roosting known to occur within area	In buffer area only
Charadrius bicinctus Double-banded Plover [895]	Vulnerable	Roosting known to occur within area	In buffer area only
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]		Species or species habitat known to occur within area	In feature area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]		Roosting known to occur within area	In buffer area only
Gallinago megala Swinhoe's Snipe [864]	Endangered	Roosting likely to occur within area	In buffer area only
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area	In buffer area only
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In feature area
Limosa limosa Black-tailed Godwit [845]	Critically Endangered	Roosting known to occur within area	In buffer area only
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]		Species or species habitat known to occur within area	In feature area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area	In buffer area only
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Pandion haliaetus Osprey [952]		Breeding known to occur within area	In feature area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area	In buffer area only
Pluvialis squatarola Grey Plover [865]		Roosting known to occur within area	In buffer area only
Thalasseus bergii Greater Crested Tern [83000]		Breeding known to occur within area	In buffer area only
Tringa brevipes Grey-tailed Tattler [851]		Roosting known to occur within area	In buffer area only
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area	In feature area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area	In buffer area only
Xenus cinereus Terek Sandpiper [59300]		Roosting known to occur within area	In buffer area only

Other Matters Protected by the EPBC Act

Commonwealth Lands		[Resource Information]
The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species			[Resource Information]
Scientific Name	Threatened Category	Presence Text	Buffer Status
Bird			
Actitis hypoleucos			
Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area
Apus pacificus			
Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area	In feature area
Ardenna carneipes as Puffinus carneipes			
Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area	In feature area
Ardenna grisea as Puffinus griseus			
Sooty Shearwater [82651]		Species or species habitat may occur within area	In feature area
Arenaria interpres			
Ruddy Turnstone [872]		Roosting known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area	In feature area
Calidris acuminata Sharp-tailed Sandpiper [874]		Roosting known to occur within area	In feature area
Calidris alba Sanderling [875]		Roosting known to occur within area	In buffer area only
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area overfly marine area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area	In feature area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat known to occur within area overfly marine area	In feature area
Calidris ruficollis Red-necked Stint [860]		Roosting known to occur within area overfly marine area	In buffer area only
Calidris tenuirostris Great Knot [862]	Critically Endangered	Roosting known to occur within area overfly marine area	In buffer area only
Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978]	Vulnerable	Species or species habitat known to occur within area overfly marine area	In feature area
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat likely to occur within area overfly marine area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Charadrius bicinctus Double-banded Plover [895]		Roosting known to occur within area overfly marine area	In buffer area only
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area	In buffer area only
Charadrius ruficapillus Red-capped Plover [881]		Roosting known to occur within area overfly marine area	In buffer area only
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area	In buffer area only
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat may occur within area	In feature area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area	In feature area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area	In feature area
Eudyptula minor Little Penguin [1085]		Breeding known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Gallinago megala Swinhoe's Snipe [864]	Vulnerable	Roosting likely to occur within area overfly marine area	In buffer area only
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area	In buffer area only
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area	In feature area
Halobaena caerulea Blue Petrel [1059]		Species or species habitat may occur within area	In buffer area only
Himantopus himantopus Pied Stilt, Black-winged Stilt [870]		Roosting known to occur within area overfly marine area	In buffer area only
Hydroprogne caspia as Sterna caspia Caspian Tern [808]	Endangered	Breeding known to occur within area	In feature area
Larus pacificus Pacific Gull [811]		Breeding known to occur within area	In buffer area only
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In feature area
Limosa limosa Black-tailed Godwit [845]		Roosting known to occur within area overfly marine area	In buffer area only
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]		Species or species habitat may occur within area	In feature area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Merops ornatus Rainbow Bee-eater [670]	Critically Endangered	Species or species habitat may occur within area overfly marine area	In feature area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]		Species or species habitat known to occur within area	In feature area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area overfly marine area	In buffer area only
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area	In buffer area only
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In buffer area only
Pachyptila turtur Fairy Prion [1066]		Species or species habitat likely to occur within area	In feature area
Pandion haliaetus Osprey [952]		Breeding known to occur within area	In feature area
Pelagodroma marina White-faced Storm-Petrel [1016]		Breeding known to occur within area	In buffer area only
Phoebetria fusca Sooty Albatross [1075]		Species or species habitat likely to occur within area	In feature area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area	In buffer area only
Pterodroma macroptera Great-winged Petrel [1035]		Breeding known to occur within area	In buffer area only
Pterodroma mollis Soft-plumaged Petrel [1036]		Species or species habitat may occur within area	In buffer area only
Puffinus assimilis Little Shearwater [59363]		Breeding known to occur within area	In feature area
Recurvirostra novaehollandiae Red-necked Avocet [871]	Vulnerable	Roosting known to occur within area overfly marine area	In buffer area only
Stercorarius skua as Catharacta skua Great Skua [823]		Species or species habitat may occur within area	In buffer area only
Thalassarche carteri Indian Yellow-nosed Albatross [64464]		Species or species habitat likely to occur within area	In feature area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area	In feature area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area	In buffer area only
Thinornis cucullatus as Thinornis rubricollis Hooded Plover, Hooded Dotterel [87735]		Species or species habitat known to occur within area overfly marine area	In feature area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area	In buffer area only
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area overfly marine area	In feature area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area	In buffer area only
Xenus cinereus Terek Sandpiper [59300]		Roosting known to occur within area overfly marine area	In buffer area only
Fish			
Acentronura australe Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area	In feature area
Campichthys galei Gale's Pipefish [66191]		Species or species habitat may occur within area	In feature area
Heraldia nocturna Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area	In feature area
Hippocampus breviceps Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area	In feature area
Histiogamphelus cristatus Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Leptoichthys fistularius Brushtail Pipefish [66248]		Species or species habitat may occur within area	In feature area
Lissocampus caudalis Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area	In feature area
Lissocampus runa Javelin Pipefish [66251]		Species or species habitat may occur within area	In feature area
Maroubra perserrata Sawtooth Pipefish [66252]		Species or species habitat may occur within area	In feature area
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area	In feature area
Notiocampus ruber Red Pipefish [66265]		Species or species habitat may occur within area	In feature area
Phycodurus eques Leafy Seadragon [66267]		Species or species habitat may occur within area	In feature area
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area	In feature area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area	In feature area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area	In feature area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area	In feature area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area	In feature area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area	In feature area
Vanacampus phillipi Port Phillip Pipefish [66284]		Species or species habitat may occur within area	In feature area
Vanacampus poecilolaemus Longsnout Pipefish, Australian Longsnout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area	In feature area
Mammal			
Arctocephalus forsteri Long-nosed Fur-seal, New Zealand Fur-seal [20]		Breeding known to occur within area	In feature area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Species or species habitat likely to occur within area	In feature area
Reptile			
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding likely to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Species or species habitat may occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area	In feature area
Whales and Other Cetaceans			
		[Resource Information]

Mammal			
Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area	In feature area

Current Scientific Name	Status	Type of Presence	Buffer Status
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area	In feature area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area	In feature area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Berardius arnuxii Arnoux's Beaked Whale [70]		Species or species habitat may occur within area	In buffer area only
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour may occur within area	In feature area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area	In feature area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area	In feature area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area	In buffer area only
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area	In buffer area only
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur within area	In buffer area only

Current Scientific Name	Status	Type of Presence	Buffer Status
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area	In feature area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area	In buffer area only
Kogia sima as Kogia simus Dwarf Sperm Whale [85043]		Species or species habitat may occur within area	In buffer area only
Lagenorhynchus obscurus Dusky Dolphin [43]		Species or species habitat may occur within area	In feature area
Lissodelphis peronii Southern Right Whale Dolphin [44]		Species or species habitat may occur within area	In buffer area only
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat known to occur within area	In feature area
Mesoplodon bowdoini Andrew's Beaked Whale [73]		Species or species habitat may occur within area	In buffer area only
Mesoplodon densirostris Blainville's Beaked Whale, Dense-beaked Whale [74]		Species or species habitat may occur within area	In buffer area only
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area	In buffer area only
Mesoplodon hectori Hector's Beaked Whale [76]		Species or species habitat may occur within area	In buffer area only
Mesoplodon layardii Strap-toothed Beaked Whale, Strap-toothed Whale, Layard's Beaked Whale [25556]		Species or species habitat may occur within area	In buffer area only

Current Scientific Name	Status	Type of Presence	Buffer Status
Mesoplodon mirus True's Beaked Whale [54]		Species or species habitat may occur within area	In buffer area only
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area	In feature area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area	In buffer area only
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area	In buffer area only
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area	In buffer area only
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area	In feature area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area	In feature area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area	In buffer area only

Whales			
Balaenoptera musculus brevipinna Pygmy Blue Whale [81317]	Distribution	Known to occur	In feature area
Eubalaena australis Southern Right Whale [40]	Calving buffer	Known to occur	In buffer area only
Eubalaena australis Southern Right Whale [40]	Seasonal calving habitat	Known to occur	In feature area
Megaptera novaeangliae Humpback Whale [38]	Migration (north)	Known to occur	In feature area

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

The Department is extremely grateful to the many organisations and individuals who provided expert advice and information on numerous draft distributions.

Atlas of Living Australia

Antarctic Prion	Fuscous Warbler	Scarlet Robin
Arrgarrg	Galah	Scrub Quail
Atlantic Yellow-nosed Albatross	Glauert's Froglet	Sharp-tailed Sandpiper
Australasian Bittern	Golden Whistler	Shining Bronze-cuckoo
Australasian Gannet	Gould's Long-eared Bat	Shining Cuckoo
Australasian Harrier	Great Cormorant	Short-beaked Echidna
Australasian Shoveler	Great Knot	Short-billed Black-cockatoo
Australasian Shoveler	Greater Long-eared Bat	Shrubland Morethia Skink
Australian Hobby	Greater Sand Plover	Shy Heathwren
Australian Little Grebe	Greenshank	Silver Gull
Australian Magpie	Grey Butcherbird	Silvereye
Australian Owlet-nightjar	Grey Currawong	Singing Honeyeater
Australian Pelican	Grey Fantail	Slender Tree Frog
Australian Pipit	Grey Plover	Small Western Froglet
Australian Raven	Grey Quail	Sooty Oystercatcher
Australian Red-necked Avocet	Grey Shrike-thrush	Southern Blind Snake
Australian Reed Warbler	Grey-bellied Dunnart	Southern Boobook
Australian Ringneck	Grey-headed Goshawk	Southern Brown Bandicoot
Australian White-winged Triller	Grey-tailed Tattler	Southern Emu-wren
Australian Wood Duckmaned Goose	Ground Parrot	Southern Forest Bat
Baluun	Gunther's Toadlet	Southern Giant-petrel
Banded Lapwing	Heath Delma	Southern Right Whale
Banded Stilt	Heath Monitor	South-western Crevice-skink
Bardick	Hoary-headed Dabchick	Southwestern Earless Skink
Bar-tailed Godwit	Honey Possum	South-western Mulch-skink
Baudin's Black-cockatoo	Horsfield's Bronze-cuckoo	South-western Rock-skink
Beautiful Firetail	House Mouse	Southwestern Sandplain Worm Lizard
Black Curlew	Humpback Whale	South-western Slider
Black Rat	Kelp Gull	Sperm Whale
Black Swan	King's Skink	Splendid Fairy-wren
Black-and-white Shag	Kookaburra	Spotted Crake
Black-faced Cormorant	Landrail	Spotted Dove
Black-faced Cuckoo-shrike	Lea's Frog	Spotted Harrier
Black-faced Woodswallow	Lesser Egret	Spotted Nightjar
Black-fronted Dotterel	Lesser Long-eared Bat	Spotted Pardalote
Black-necked Ibis	Letter Bird	Square-tailed Kite
Black-shouldered Kite	Little Black Cormorant	Striated Pardalote
Black-tailed Godwit	Little Brown Snake	Striated Worm-lizard
Black-tailed Native Hen	Little Corella	Subantarctic Fur Seal
Bleating Froglet	Little Cormorant	Sulphur-crested Cockatoo
Blue Heron	Little Eagle	Tawny Frogmouth
Blue Whale	Little Grassbird	Tawny-crowned Honeyeater
Blue-billed Duck	Little Penguin	Terek Sandpiper
Blue-breasted Fairy-wren	Little Pied Cormorant	Thick-tailed Gecko
Boggi	Little Shearwater	Thorny Devil
Bottlenose Dolphin	Little Spotted Snake	Tiger Snake
Bridled Tern	Little Swamphen	Tree Martin
Brown Honeyeater	Long-beaked Bottle-nosed Dolphin	Tschudi's Froglet
Brown Skua	Lowlands Earless Skink	Turtle Frog
Brown Songlark	Müller's Snake	Varied Sittella
Brown Weebill	Magpie-lark	Wala
Brownhead	Mallard	Wedge-tailed Eagle
Brown-headed Honeyeater	Malleefowl	Welcome Swallow
Brush Bronzewing	Marbled Gecko	Western Banjo Frog

Brush-tailed Bettong	Marsh Crane	Western Bristlebird
Burton's Snake-lizard	Marsh Sandpiper	Western Crowned Snake
Bush Rat	Masked Owl	Western Grey Kangaroo
Bush Stone-curlew	Masters' Tit	Western Mourning Skink
Buuway	Matuka	Western Pygmy-possum
Bynoe's Gecko	Moaning Frog	Western Rosella
Cape Barren Goose	Mongolian Plover	Western Spinebill
Caspian Tern	Motorbike Frog	Western Three-lined Skink
Cat	Musk Duck	Western Wattlebird
Cattle Egret	Mutton-bird	Western Whipbird
Chain-striped South-west Ctenotus	New Holland Honeyeater	Western Yellow Robin
Chestnut Quailthrush	New Zealand Fantail	Whimbrel
Chestnut Sheldrake	Ngwayir	Whiskered Tern
Chestnut Teal	Nicholl's Toadlet	Whistling Eagle-hawk
Chestnut Teal	Noisy Scrub-bird	White-bellied Sea-eagle
Chicken Hawk	Norfolk Island Robin	White-breasted Robin
Children's Python	Northern Snake-necked Turtle	White-browed Babbler
Chocolate Wattled Bat	Oceanic Teal	White-cheeked Honeyeater
Collared Sparrowhawk	Osprey	White-faced Storm Petrel
Common Bronzewing	Pacific Golden Plover	White-fronted Chat
Common Brushtail Possum	Pacific Gull	White-fronted Scrubwren
Common Dolphin	Pale-flecked Garden Sunskink	White-naped Honeyeater
Common Dwarf Skink	Pallid Cuckoo	White-necked Heron
Common Sandpiper	Parera	White-striped Freetail-bat
Common Scaly-foot	Partridge Quail	Willie Wagtail
Common South-west Ctenotus	Pied Oystercatcher	Wood Sandpiper
Common Starling	Pied Stilt	Yellow Wattlebird
Crane	Pink-eared Duck	Yellow-footed Antechinus
Crested Bellbird	Plain Turkey	Yellow-legged Spoonbill
Crested Grebe	Purple Gallinule	Yellow-plumed Honeyeater
Crested Pigeon	Purple-crowned Lorikeet	Yellow-tail
Crested Shrike-tit	Pygmy Right Whale	Yellow-throated Miner
Crested Tern	Quenda	
Curlew Sandpiper	Quokka	
Diamond Python	Rabbit	
Diving Petrel	Rainbow Bee-eater	
Duck Hawk	Rakali	
Dugite	Red Knot	
Dusky Dunnart	Red Wattlebird	
Dusky Moorhen	Red-capped Parrot	
Dusky Woodswallow	Red-capped Plover	
Dwarf Four-toed Slider	Red-eared Firetail	
Eastern Barn Owl	Red-kneed Dotterel	
Eastern Great Egret	Red-necked Stint	
Eastern Yellow Wagtail	Red-rumped Tit	
Elegant Parrot	Red-tailed Black Cockatoo	
Emu	Red-winged Fairy-wren	
Eurasian Coot	Regent Parrot	
Eurasian Tree Sparrow	Restless Flycatcher	
Fairy Martin	Rock Parrot	
Fairy Tern	Rock Pigeon	
Fan-tailed Cuckoo	Ruddy Turnstone	
Far Eastern Curlew	Rufous Treecreeper	
Flesh-footed Shearwater	Rufous Whistler	
Fork-tailed Swift	Sacred Kingfisher	

Appendix 3: Habitat Assessment Example

FAUNA HABITAT ASSESSMENT SHEET

(South West)

Location: Albany Met Mast

Appendix 4: Habitat Assessment Photo Points

Habitat Assessment 1 Location (Northing: 6119256, Easting: 572964)

Habitat Assessment 2 Location (Northing: 6119161, Easting: 573119)

Habitat Assessment 3 Location (Northing: 6119087, Easting: 6119087)

Habitat Assessment 4 Location (Northing: 6119120, Easting: 6119120)

Habitat Assessment 5 Location (Northing: 6119123, Easting: 573730)

Habitat Assessment 6 Location (Northing: 6119601, Easting: 573437)

Appendix 5: Black Cockatoo Distribution Maps

Appendix A – Distribution maps for the three black cockatoos

Map 2: Modelled distribution for Baudin's Cockatoo
(*Calyptorhynchus baudinii*)

Produced by:
Environmental Resources Information Network 2016

Contextual data source:
National Vegetation Information System (NVIS 4.2) 2016
Interim Biogeographic Regionalisation for Australia (IBRA) version 7 2012
Collaborative Australian Protected Area Database (CAPAD) 2014
Geoscience Australia GEODATA TOPO 250K Topographic Data Series 3 2006

Projection: Geographic
Datum: GDA94

Ecological Communities

- *Corymbia calophylla* - *Xanthorrhoea preissii* woodlands and shrublands of the Swan Coastal Plain
- *Corymbia calophylla* - *Kingia australis* woodlands on heavy soils of the Swan Coastal Plain
- *Banksia* Woodlands of the Swan Coastal Plain

- Conservation Areas
- Jarrah, Karri and Marri (NVIS 4.2)

Species

- Known Breeding Areas
- Predicted Breeding Range
- Known Foraging Areas
- Main Wintering Area
- Species Likely to Occur

- Cities & Towns
- Roads (sealed)
- Roads (unsealed)
- State Border
- Major Rivers
- Lakes/Reservoirs
- Non-perennial Lakes

Map 3: Modelled distribution for Carnaby's Cockatoo
(*Calyptorhynchus latirostris*)

INDICATIVE MAP ONLY: For the latest departmental information, please refer to the Protected Matters Search Tool and the Species Profiles & Threats Database at <http://www.environment.gov.au/biodiversity/threatened/index.html>

Map 4: Modelled distribution for Forest Red-tailed Black-Cockatoo
(*Calyptorhynchus banksii naso*)

INDICATIVE MAP ONLY: For the latest departmental information, please refer to the Protected Matters Search Tool and the Species Profiles & Threats Database at <http://www.environment.gov.au/biodiversity/threatened/index.html>
