5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, "clearing of 5 hectares".
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, "clearing of 10 trees". If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m²

Area of circle = 3.14 x radius²

1 acre = 0.4 hectares/4,000 m²

Area of a rectangle = length x width

1 tree = 0.01 hectares/100 m²

Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	15.3 ha
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>Clearing for horticulture development. Lot 753 is part of the Gascoyne Food Bowl Initiative (GFBI). The lots have been released under Development Leases (DPIRD/Lessee) with an option to convert to freehold title when the development lease conditions have been met. It is currently unimproved crown land under Management Order with WAAA in care of DPIRD to be developed for horticulture. Under the GFBI project in conjunction with DPLH and the Shire of Carnarvon, land was identified and released for agricultural development. An amendment was made to the Town Planning Scheme to convert the land zoning to priority agriculture. The proposed clearing is consistent with the Shire's LPS No. 13. The subject land is zoned "Priority Agriculture" with the main objectives:</p> <ul style="list-style-type: none"> A) Identify land of State, regional or local significance for food production purposes; B) Retain priority agricultural land for agricultural purposes; C) Limit the introduction of sensitive land uses that may compromise existing, future or potential agricultural production; D) Protect and enhance wetlands and other ecological sensitive areas. <p>A Development Approval has been applied for Lot 753 on Deposited Plan 420666.</p> <p>The Lot size is 15.3 ha and it is proposed to clear 15.3 ha for horticultural crops. A cleared level site is required to plant 14.5 ha of (mainly melons) on a seasonal basis.</p>
Specify what the final land use will be after clearing	Horticulture consistent with Town Planning Scheme – Priority Agriculture and GFBI Development

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing and burning. Clearing will be conducted in a slow progressive manner towards adjacent native vegetation to allow fauna to move into adjacent native vegetation ahead of the clearing activity.

5.5 Timeframe

Period within which you propose to do the clearing	Start date:1/6/25*
--	--------------------

(e.g. 1/7/2022 to 30/8/2024)	End date: 1/09/2026 *Best case dependent on approval of clearing permit over a 5 week period. Winter clearing preferred.
------------------------------	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?	<input type="checkbox"/> Yes – complete section below <input type="checkbox"/> I have had a pre-application meeting with DWER/DEMIRS	
	Insert date of meeting and officer name(s):	
	<input type="checkbox"/> I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
	Insert date of conversation and officer name(s):	
	<input type="checkbox"/> I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.	
	<input checked="" type="checkbox"/> No – proceed to next question.	

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?

Responding to a call from government to improve the land to develop horticulture precinct. The land is being purchased and developed for intensive horticulture, as part of the Western Australian Government's Gascoyne Food Bowl Project with the objective to expand the Carnarvon horticulture industry.

- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)

Nil. The entire reason for clearing the land is to develop it for irrigated horticulture.

- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Nil. The area has signs of disturbance and the structure of vegetation has been altered from ongoing disturbance from livestock and human activities.

Flora - Survey results indicate that clearing is not likely to significantly impact on habitat availability of conservation significant species that may be present within the local area

Fauna – survey results indicate it is unlikely the clearing will significantly impact conservation significant fauna. The potential direct impact to fauna present at the time of clearing can be managed by the implementation of a fauna management condition of directional clearing.

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	The entire area will be developed for intensive horticulture. Native vegetation will not be cleared outside of the clearing area. Clearing will be limited near any areas of notable environmental value.
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	Weed management – the following measures will be undertaken to minimize the risk of introduction and spread of weeds: any earth moving machinery used will be clean of soil and vegetation prior to entering and leaving the area to be cleared; no soil, mulch or fill will be brought into the area to be cleared; machinery and vehicles will be restricted to the limits of the area to be cleared. Land degradation mitigation – levelling and grading the site will reduce risks of waterlogging, salinity and inundation when site cleared of vegetation

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.

<p>Has the proposed clearing or any related matter been referred to the EPA?</p>	<p><input type="checkbox"/> Yes</p> <p>Enter details: <input type="text"/></p> <p><input checked="" type="checkbox"/> No – complete question below.</p>
<p>If 'No' – do you intend to refer the proposal to the EPA?</p>	<p><input type="checkbox"/> Yes – intend to refer (proposal is a 'significant proposal')</p> <p><input type="checkbox"/> Yes – intend to refer (proposal will require a section 45C amendment to the current Ministerial Statement)</p> <p><input type="checkbox"/> No – a current valid Ministerial Statement applies</p> <p>Enter Ministerial Statement number: <input type="text"/></p> <p><input checked="" type="checkbox"/> No – not a significant proposal</p>
