

#### Department of Water and Environmental Regulation

Department of Energy, Mines, Industry Regulation and Safety

## Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (maps etc.). The Department of Water and Environmental Regulation (DWER) or Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) will return/decline any forms that are not correctly completed.

To find out more about the stages of assessment for clearing permit forms, see the *Procedure: Native vegetation clearing permits*.

## Part 1 – Form type

Select your form type.  Note: Where appropriate in this form, and unless stated otherwise, the terms 'application' and 'applicant' also mean 'referral' and 'referrer' respectively.	□ Referral of proposed clearing (section 51DA of the EP Act) □ Application for an area permit (section 51E of the EP Act) □ Application for a purpose permit (section 51E of the EP Act)	
Which department are you submitting this form to?  If the clearing is for mineral and petroleum activities authorised under the <i>Mining Act 1978</i> , the various petroleum Acts, and/or a State Agreement with areas covered by either mineral or petroleum tenure granted under one of the abovementioned Acts, select 'Department of Energy, Mines, Industry Regulation and Safety'.  For all other clearing activities, select 'Department of Water and Environmental Regulation'.		<ul> <li>□ Department of Energy, Mines, Industry Regulation and Safety</li> <li>□ Department of Water and Environmental Regulation</li> </ul>

## Part 2 – Applicant details

### 2.1 Applicant name

2.1 Applicant name			
For area permits:	☐ Applying as a	an individual – complete the following:	
If granted, the name(s) of (all)	Title	□ Mr □ Mrs □ Ms □ Other:	
landowner(s) will be listed as	Name(s)		
'permit holders' on the permit.	☐ Applying as a following:	a body corporate or other entity formed at law – complete the	
For purpose permits:	Name		
If granted, the name(s) of (all) applicant(s) will	Australian Cor	mpany Number (ACN)	
go on the permit.		a government entity (e.g. government department, local thority, or other statutory body)	
	Name	Forest Products Commission	
2.2 Applicant con Provide the contact of		ove (primary contact).	
Title			
First name			
Last name			
Position			
Company name			
Phone number			
Email address

State		

#### Part 3 – Land details

- You must accurately describe the location of the land where your clearing is proposed.
- Provide copies of associated documents registered against the Certificate of Title (limitations, interests, encumbrances or notifications) where the clearing may impact them (i.e. caveats within freehold Lots).
- If you have a large number of properties, please provide the relevant details for each property in a separately attached supporting document.

I have a large number of properties and have given the relevant details in an attached supporting document.	☐ Yes – skip to Part 4	⊠ No

If 'No' – complete the following:

Land description  Provide the following details, as applicable, for all properties:  - volume and folio number - lot or location number(s) - crown lease or reserve number - pastoral lease number - mining tenement number	Lot 4470 on Deposi	ted Plan 29854	
Street address – Line 1	11664 Bussell High	way	
Street address – Line 2			
Suburb	Karridale		
State	WA	Postcode	6288
Local government area(s)	Shire of Augusta-Margaret River		
Land zoning	General Agriculture		

## Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

Proof of ownership may include:

- a certificate of title
- a pastoral or mining lease
- public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner (select one of the following options)	Complete the following
☐ I am the landowner	☐ Attach proof of ownership
☐ I am lodging a form on behalf of the landowner (e.g. a consultant)	☐ Attach proof of ownership
☐ I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to act on their behalf and acknowledge they will be jointly responsible for the clearing permit
☐ I am likely to become the landowner	☐ Attach evidence of the pending transfer of ownership, including details of current proprietor on certificate of title, and/or contract of sale ('offer and acceptance')
☑ I will undertake the clearing activities with the landowner's authority and will be the permit holder	<ul> <li>         □ Attach proof of ownership     </li> <li>         □ Attach a letter, in which the landowner authorises you to access and clear native vegetation within the property(ies) as detailed in section 3.1 (if the applicant is not the landowner)     </li> </ul>
☐ I am a person with multiple land parcels within which clearing is proposed	☐ Attach proof of ownership and/or ☐ Attach letters, in which the landowner authorises you to access and clear native vegetation within the properties as detailed in section 3.1 (if the applicant is not the landowner)
☐ I will undertake the clearing activities through the exercise of power conferred by different legislation (e.g. the <i>Energy Operators (Powers) Act 1979</i> )	☐ Provide relevant legislative details:

#### Part 5 – Proposed clearing

#### 5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form.

Note: DWER/DEMIRS will decline/return forms (as applicable) if you do not provide sufficient information for this question.

- Geometry type: polygon shape
- Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude/longitude)
- Datum: GDA 2020

An aerial photograph or map with a north arrow, clearly marking the proposed clearing area

#### Note:

- An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj
- You must provide an ESRI shapefile if the form requires an assessment under an *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

#### 5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, "clearing of 5 hectares".
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, "clearing of 10 trees". If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare =  $10,000 \text{ m}^2$  Area of circle =  $3.14 \text{ x radius}^2$ 1 acre =  $0.4 \text{ hectares/4,000 m}^2$  Area of a rectangle = length x width

1 tree = 0.01 hectares/100 m<sup>2</sup> Area of a triangle =  $\frac{1}{2}$  length x perpendicular height

Total area of clearing proposed (hectares)	There are 55.3 ha of pine trees to be harvested. Of this area, 18.5 ha is within an ESA.
Footprint of clearing (hectares) (purpose permit only)	The total hectares of the property is 197.4 ha. Only 55.3 ha has pine trees to be harvested.

Number of individual frees to be cleared	Number of individual trees to be cleared	N/A
--	--	-----

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

#### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).

If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.). FPC currently holds a Profit a Prendre timber sharefarming agreement on Lot 4470, the property is called "Boranup 2". Pinus radiata is the dominant plantation species. The current landowner is DBCA. FPC is seeking to clearfall the pines and end the PaP early, prompted by the need to protect the critically endangered White-Bellied Frog (Geocrinia alba), which resides in creeks on the property.

The existing pine plantation has been identified as a risk to the frog's survival. This is due to the fire risk of the plantation, sedimentation risk caused by machinery and vehicles in plantation-associated activities, and hydrological resources utilized by the pines.

Native shrubs and sedges have encroached in the pine areas. While these native species are not the intended species to harvest, they will be impacted by the pine harvest operation.

Specify what the final land use will be after clearing

DBCA will continue to be the landowner and will use the property as habitat for the endangered species White-Bellied Frog, among other potential fauna projects. The area currently occupied by pines will be rehabilitated to native species appropriate for the location, conducive to the longevity of *G. alba*.

#### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)

Pine trees will be mechanically harvested using a harvester.

Forwarders will be used to remove the timber once it has been cut, to cart to landings and load log trucks.

Log trucks will be used to remove timber from the plantation on haul routes agreed upon with DBCA.

Front end loaders and graders will be used on tracks, firebreaks and haul routes. Vegetation encroaching onto haul routes may be

	disturbed to increase access. Turnarounds will be constructed using these machines within the plantation area (outside of ESA boundaries).
5.5 Timeframe	
Period within which you propose to do the clearing	Start date: November 2025
(e.g. 1/7/2022 to 30/8/2024)	End date: January 2027

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

#### 5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt Interim Biogeographic Regionalisation for Australia (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

	☐ Yes – complete☐ I have had a	section below pre-application meeting with DWER/DEMIRS
	Insert date of meeting and officer name(s):	
Do you propose to clear native vegetation within the Swan Coastal	☐ I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
Plain or Avon Wheatbelt bioregions?	Insert date of conversation and officer name(s):	
	understand that	nd a pre-application meeting with DWER/DEMIRS. I this may increase the likelihood of requests for further or delays in assessment.

## Part 6 – Mitigation hierarchy

#### 6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing e.g. engineering solutions did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

# Provide the avoidance details (e.g. retention of vegetation on property)

Hand falling the pine trees was considered to minimize soil disturbance, however this activity was deemed unsafe due to the high stocking of the pine trees. Heavy machinery would still be needed to extract the timber even if hand felled.

As pine trees are considered to be negatively affecting the *G. alba* population, removing the pines is the best option for species protection.

During conversations and site visits between DBCA & FPC, the below actions have been agreed upon:

- Enforcing a 6m no machinery access buffer from known frog population. In these buffers, harvesters will reach in to extract pine trees.
- No trafficking on firebreaks that are adjacent to known frog populations.

# Provide the mitigation details (e.g. management of weed spread, rehabilitation)

All machinery and vehicles will be clean on entry to the site, to reduce the likelihood of introducing weeds.

Harvesting will be monitored by FPC and DBCA to identify any sedimentation caused by operations. Mitigation methods will be agreed upon by DBCA and FPC prior to operations resuming.

No disturbance buffers will be demarcated in field using spray paint and/or flagging tape.

A portable water tank may be engaged during harvesting operations for fire protection measures. Water should not be draught from water points on Boranup 2, due to the risk of contamination, sedimentation, and agitation.

For trees of any species that are felled (either deliberately or inadvertently) and land in the creek habitat, every effort should be made to remove them from the habitat without machinery entering the habitat, cell boundary firebreak or encroaching into the no disturbance buffer. Any encroachments should be reported as an incident to DBCA. Alternative recovery techniques to be approved by DBCA prior to implementing.

DBCA will rehabilitate the plantation area to native species after harvesting is completed.

6.2 Offsets			
Do you want to submit a clearing offset proposal with your form?	□ Yes ⊠ No		
If 'Yes' – please complete and attach Appendix A of the <u>Clearing</u> of native vegetation offsets procedure guideline as a supporting document for your form.	☐ Appendix A attached		
Part 7 – Surveys for assessments (IBSA and IMSA)			
Do you want to submit marine or biodiversity surveys in support of your form?	Yes ⊠ No – skip to Part 8		
7.1 Biodiversity surveys  If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments (IBSA). If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.  Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).			
Have you submitted all the biodiversity surveys that support this form to the Index of Biodiversity Surveys for Assessment?	☐ Yes ☐ Not applicable		
Provide an IBSA number (preferred) or a submission number(s)			
7.2 Marine surveys  If you want to submit any marine surveys to support this form, you mu  Instructions for the preparation of data packages for the Index of Mar  Assessments (IMSA). If you do not meet the IMSA requirements, DW decline/return your form.	rine Surveys for		

## Part 8 – Assessment bilateral agreement

Have you prepared all the marine surveys that support this form in

accordance with the EPA's Instructions for the preparation of data packages for the Index of Marine Surveys for Assessments?

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

☐ Yes

☐ Not applicable

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's guidance on the assessment bilateral agreement.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process, such as the assessment bilateral agreement or accredited assessment?	☐ Yes ☑ No – skip to Part 9	
Is your proposed clearing a controlled action?  If 'Yes', please make sure you have entered all the mandatory details in the Annex C7 form	☐ Yes  EPBC number:  ☐ Annex C7 form attached  ☐ No (DWER/DEMIRS cannot assess the application under an EPBC Act Accredited Process)	
List the controlling provisions identified in the notification of the controlled action decision		

### Part 9 – Other approvals

#### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.

Has the proposed clearing or any	□ Yes		
related matter been referred to the EPA?	Enter details:		
THE EPA!			
If 'No' – do you intend to refer the	☐ Yes – intend to refer (proposal is a 'significant proposal')		
proposal to the	☐ Yes – intend to refer (proposal will require a section 45C amendment to
