Locked Bag 10

Joondalup DA WA 6919

Dear Sir/Madam,

RE: Application to Clear Native Vegetation on Lots 24 and 25 Cutler Road, Jandakot

On behalf of the REMONDIS Australia Pty Ltd please find following information to support a clearing permit application for 2.979ha of native vegetation on Lots 24 and 25 Cutler Road, Jandakot. Certificates of Title are supplied as Attachment 1.

1 Background and Context

Lots 24 and 25 Cutler Road, Jandakot, owned by REMONDIS Australia Pty Ltd are located in the City of Cockburn. The Lots are 4.7298ha in size, of which parts are cleared and other areas contain native vegetation. The site is proposed to be developed as a waste processing/handling facility including Food Organics and Garden Organics (FOGO), Container Deposit Scheme (CDS), Old Corrugated Containers (OCC), and Construction and Demolition waste (C&D). The intended land use is in alignment with the Industrial zoning of the site.

The final site development is yet to be determined, once finalised site development has been determined the relevant applications will be submitted. The applicant seeks to apply for the clearing permit for the permit to be issued once planning approval has been obtained.

There is part of a Multiple Use Wetland (Unique Feature Identifier (UFI) 6652) mapped over the central part of the site and as such is considered to be 'riparian' vegetation so an exemption from a Clearing Permit under the Regulations is not considered to apply.

2 Flora, Vegetation and Fauna Survey

To assess the flora and vegetation attributes on the site a Detailed Flora and Vegetation Survey and Basic Fauna Survey were completed in spring 2025. The full survey report is provided as Attachment 2.

The site has been largely cleared in the past and contains highly impacted native vegetation that is generally dominated by invasive weed species. The vegetation is Degraded to Completely Degraded (Attachment 2) and there are no conservation significant flora species recorded on or expected to occur on the site.

The Fauna Habitat on the site is also greatly impacted with very limited habitat for the following:

- Baudin's Black Cockatoo (*Zanda baudinii*), Endangered;
- Carnaby's Black Cockatoo (*Zanda latirostris*), Endangered;
- Forest Red-tailed Black-Cockatoo (*Calyptorhynchus banksii naso*), Vulnerable;
- Stylet Bush Cricket (*Throscodectes xiphos*), Priority 1;
- Perth Slider, Lined Skink (*Lerista lineata*), Priority 3; and
- Southern Brown Bandicoot, Quenda (*Isodon fusciventer*), Priority 4.

The site has very limited habitat for Baudin's Black Cockatoo, Carnaby's Black Cockatoo and Forest Red-tailed Black-Cockatoo. There is one potential breeding habitat Tuart tree but does not have any hollows and is therefore not currently used by Black Cockatoos for breeding.

One SRE species Stylet Bush Cricket, listed as Priority 1, may be present on the site, but clearing is not likely to have a significant impact. Two Priority species that may have habitat on the site are Perth Slider and Southern Brown Bandicoot however the numbers of these species is expected to be very low and risks to individuals can be managed by a trapping and relocation program prior to clearing.

3 Avoidance and Mitigation Measures

The applicant commits to retaining the one Tuart tree on the site with an appropriate buffer of 2m to protect the tree. It is not considered to be possible nor required for REMONDIS to retain any further vegetation on the site given the proposed industrial waste management development and given the extent of weed species across the site.

4 Ten Clearing Permit Principles

The Ten Clearing Principles have been addressed below to determine the environmental impact that the removal of the native vegetation on the site would have.

Principle (a): Vegetation should not be cleared if it comprises a high level of biological diversity.

The vegetation on the site is Degraded and Completely Degraded due to the past clearing. As a result, the vegetation is not representative of a Threatened or Priority Ecological Community.

The proposed clearing is considered not at variance to this principle.

Principle (b): Vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of, a significant habitat for fauna indigenous to Western Australia.

The fauna habitat is in poor condition with high levels of disturbance and is not considered significant habitat. The vegetation is fragmented, disturbed and has limited ecological linkage value. The proposed clearing is considered not at variance to this principle.

Principle (c): Vegetation should not be cleared if it includes, or is necessary for the continued existence of rare flora.

No Threatened or Priority plant species are likely to occur on the site given the clearing and high levels of disturbance. Therefore, the proposed clearing is considered not at variance to this principle.

Principle (d): Vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a threatened ecological community.

The vegetation on the site is not representative of a Threatened Ecological Community. Therefore, the proposed clearing is considered not at variance to this principle.

Principle (e): Vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared.

The site is not a significant remnant of vegetation. The proposed clearing is considered not at variance to this principle.

Principle (f): Vegetation should not be cleared if it is growing in, or in association with, an environment associated with a watercourse or wetland.

The vegetation is partly within a Multiple Use Wetland but is dominated by invasive weeds and is unlikely to be able to be managed to significantly improve wetland values therefore cannot be reinstated as wetland. The proposed clearing may be at variance to this principle, however given the degraded nature of the wetland, including large areas that have already been developed the impact is not considered to be significant.

Principle (g): Vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation.

Clearing the vegetation on the site will not result in land degradation as much of the surrounding area is already developed and management of offsite impacts will be required as part of the planning approval.

The proposed clearing is considered not at variance to this principle.

Principle (h): Vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area.

There are no adjacent reserves. The proposed clearing of Degraded and Completely Degraded vegetation will not adversely impact on any nearby areas of native vegetation. The proposed clearing is considered not at variance to this principle.

Principle (i): Vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water.

The proposed development will be designed in accordance with *Better Urban Water Management*. Stormwater will be managed by controls associated with a planning approval. The proposed clearing is considered not at variance to this principle.

Principle (j): Vegetation should not be cleared if clearing the vegetation is likely to cause, or exacerbate, the incidence of flooding.

The surrounding area is predominantly cleared therefore any further clearing will not increase rain infiltration to the groundwater and stormwater controls will be installed as part of the construction of the waste facility.

The proposed clearing is considered not at variance to this principle.

Please contact me if you would like to discuss the application.

Yours sincerely

Paul van der Moezel
Managing Director

1 INTRODUCTION

1.1 Purpose

Lots 24 and 25 Cutler Road, Jandakot are located in the City of Jandakot approximately 18km south of the Perth Central Business District (Figure 1). The lots are bound by Cutler Road to the north, Armadale Road to the south, and industrial development to the east and west (Figure 2). Verde Drive bisects the lots.

PGV Environmental was commissioned by Bajwa Enviro Consult to undertake a Flora, Vegetation and Fauna Survey of the native vegetation on the lot to inform a Clearing Permit Application.

1.2 Scope of Works

1.2.1 Flora and Vegetation

A Detailed Flora and Vegetation survey was undertaken in accordance with *EPA Technical Guidance: Flora and Vegetation Surveys* (EPA, 2016). The survey included the following:

- Desktop search and review of the Department of Biodiversity, Conservation and Attractions (DBCA) Threatened and Priority Flora databases;
- A search of Atlas of Living Australia (ALA, 2025) database;
- A search of the Commonwealth Government's Protected Matters Search Tool to identify species potentially occurring within the area that are protected under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) (DCCEEW, 2025);
- Examination of historic and recent aerial photography and contour and soil maps to provisionally identify vegetation types and condition;
- Field survey using quadrats to record native and introduced species as well as a thorough site walkover of areas of native vegetation;
- Targeted survey for threatened orchids in accordance with the Draft Survey Guidelines for Australia's Threatened Orchids Guidelines for Detecting Orchids Listed as 'Threatened' under the *Environment Protection and Biodiversity Conservation Act 1999* Australia (Commonwealth of Australia, 2013).
- Recording of any significant plant species using a hand-held GPS;
- Description and mapping of vegetation types and vegetation condition;
- Assessment of any vegetation types of conservation significance; and
- Compilation of a flora list.

1.2.2 Fauna

A Basic Fauna Survey was undertaken in accordance with *EPA Technical Guidance Fauna Surveys for Environmental Impact Assessment* (EPA, 2020). The survey includes the following:

- A search of the DBCA Database for the general area for Threatened and Priority Species;
- A search of the Atlas of Living Australia for Threatened and Priority Species;

- A search of the Commonwealth Government's Protected Matters Search Tool to identify species potentially occurring within the area that are protected under the EPBC Act or international migratory bird agreements (JAMBA/CAMBA);
- A review of studies previously undertaken in the vicinity of the site;
- A description of the fauna habitats present on the site from field surveys; and
- An assessment of the significance of the site for conservation significant species in a local and regional context.

2 EXISTING ENVIRONMENT

2.1 Land Use

Examination of historical aerial photographs indicate the site was partially cleared in the earliest available photograph in 1953 (Plate 1, Landgate 2025). Lot 25 is outlined in red. The southern portion of Lot 24 was cleared in the photograph from 1977 (Plate 2, Landgate 2025).

Plate 1: Aerial Photograph 1953

Plate 2: Aerial Photograph 1977

The southern part of Lot 25 appears to have been largely cleared in the southern part in 2000 (Plate 3, Landgate 2025). Verde Drive was constructed in 2020 (Plate 4, Landgate, 2025)

Plate 3: Aerial Photograph 2000

Plate 4: Aerial Photograph 2020

The current status of the vegetation on the site as depicted on Plate 4 has remained much the same since 2020.

2.2 Topography

The site generally slopes up from the north-west to the south-east from 26m Australian Height Datum (AHD) to 32m AHD (Figure 2).

2.3 Geology and Soils

The site is mapped as part of the Bassendean System, the oldest of the three dune systems on the Swan Coastal Plain (Bolland, 1998). The Bassendean System consists of very low relief, leached, grey siliceous Pleistocene sand dunes, intervening sandy and clayey swamps and gently undulating plains. These soils are very leached, infertile and mildly acidic (DPIRD, 2025).

The soils on the site are two Bassendean phases. Bassendean B2 phase (212Bs_B2) are located on flat to very gently undulating sandplain with well to moderately well drained deep bleached grey sands with a pale yellow B horizon or a weak iron-organic hardpan 1-2 m (DPIRD, 2025). These soils are mapped in the southern part of the site and in the north-eastern corner.

The northern part of the site is mapped on the Bassendean B4 phase (212Bs_B4) which are located on broad poorly drained sandplain with deep grey siliceous sands or bleached sands, underlain at depths generally greater than 1.5 m by clay or less frequently a strong iron-organic hardpan (DPIRD, 2025).

2.4 Hydrology

The Perth Groundwater Map (DWER, 2025) indicates the historical maximum groundwater level under the site has an elevation of around 25m to 26m AHD. The direction of groundwater flow is to the west. The depth to the historical maximum groundwater ranges from 1m to 2m.

There is part of a Multiple Use Wetland (Unique Feature Identifier (UFI) 6652) mapped over the central part of the site as shown in blue on Plate 5.

Plate 5: Wetland Mapping on the Site

3 FLORA AND VEGETATION

3.1 Methodology

3.1.1 Desktop Searches

Searches of the following databases were undertaken prior to the site survey:

- DBCA Threatened and Priority Flora Databases including the WA Herbarium database (WAHerb) and Threatened (Declared Rare) and Priority Flora Species List (TFPL) (Appendix 1) (DBCA, 2025a) for a radius of 10 km (Search Reference: 60-0925FL) that provides a list of Threatened and Priority species recorded in the area;
- Atlas of Living Australia (ALA, 2025) (Appendix 2) which shows all species that have been recorded within a 10km radius of the site.
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2025) (Appendix 3) which identifies species that are listed under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) that could potentially have habitat within a 5km radius of the site.
- DBCA Threatened and Priority Ecological Community Database (Appendix 4) for a radius of 10km that provides a list of Threatened and Priority ecological communities recorded in the area (DBCA, 2025b) (Search Reference: 26-0925EC).

3.1.2 Detailed Flora and Vegetation Survey

A preliminary survey was undertaken on 11 August 2025 to ascertain the broad vegetation types and condition on the site. A Detailed survey of the site was conducted by Dr Paul van der Moezel on 12 September 2025. The north-western part of the site was inundated at the time of survey so was not traversed. The track log is shown on Plate 6.

Plate 6: Track Log 12 September 2025

The survey included sampling from eight 10m x 10m quadrats for species presence, height and density. The number of quadrats was considered appropriate given the small size of the survey area.

Most plant species were identified in the field. Some specimens were photographed or taken for identification at the Perth Reference Herbarium or office using standard reference guides.

3.1.3 Survey Conditions

Rainfall for Perth (Measured at Jandakot Aero, Site Number 009172) was above average in June and July being 180.8mm and 229.2mm compared to averages of 151.7mm and 175.0mm. Rainfall was very high in August being 206.8mm compared to 129.9mm and early September was also above average (BOM, 2025). The above average rainfall in from June to the survey date did cause inundation on part of the site. Given the weedy condition of the vegetation throughout the site, there are no conservation significant flora species that are likely to grow in the inundated area when it dries out in late spring/early summer. The seasonal conditions are not a constraint on the survey.

The conditions that the survey was undertaken in are presented in Table 1 in order to assess the adequacy of the survey. In summary there were no constraints to the survey.

Table 1: Statement of Botanical Survey Conditions

Issue	Constraints (Y/N)*	Comment
Competency/experience of the consultant conducting the survey	No	Dr Paul van der Moezel has extensive botanical survey experience on the Swan Coastal Plain.
Proportion of the flora identified^	No	The timing of the survey in August and mid-September was optimal to record most of the native species.
Sources of information (historic/recent or new data)	No	The flora of the Swan Coastal Plain is well documented.
Proportion of the task achieved and further work that may need to be undertaken	No	No follow-up survey required as no Threatened Flora expected to occur in other seasons.
Timing/weather/season/cycle	No	The spring survey was optimal for most flora species. 2025 was a good year for ephemeral species.
Disturbances (Fire)	No	The fire age of the vegetation was greater than 5 years at the time of the survey.
Intensity of survey (e.g. In retrospect was the intensity adequate)	No	Approximately 5 hours spent on the site. Parts of the site were inundated and not accessible.
Completeness (e.g. was relevant area fully surveyed)	No	
Resources (e.g. degree of expertise available for plant identification)	No	Experienced botanist undertook most plant identifications on site.
Remoteness and/or access problems	No	Accessible site in the Perth Metropolitan Region
Availability of contextual (e.g. bioregional) information for the study area.	No	Bush Forever, Gibson <i>et al.</i> (1994)

*Constraints have been rated as Significant, Moderate or No constraints

^Fungi and nonvascular flora (e.g. algae, mosses and liverworts) were not specifically surveyed for during the survey.

3.2 Desktop Results

3.2.1 Flora Database Searches

The results from the database searches for flora listed under the EPBC Act are shown in Table 2. In summary, the site may have habitat for the following:

- *Drakaea micrantha* (Dwarf Hammer-orchid), Endangered;
- *Amanita quenda* (Quenda lepidella), Priority 1; and
- *Styphelia filifolia*, Priority 3.

Table 2: Identified Significant Flora Species and Likelihood of Occurring on the Site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Austrostipa jacobiana</i>		Critically Endangered	Critically Endangered	<i>Austrostipa jacobiana</i> is known from two populations in Bunbury and Gosnells and grows in seasonal dampland soils at both the Gosnells and Bunbury sites with the Bunbury population in sandy-loam over lime-marl rock in a seasonal dampland and the Passmore population in calcareous-clay to fine sandy-clay soil in a low-lying area on the fringe of a seasonally wet depression (DPaW, 2016).	Highly Unlikely – not suitable habitat
<i>Caladenia huegelii</i>	King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid	Critically Endangered	Endangered	The Grand Spider-orchid prefers deep grey-white sand usually associated with the Bassendean sand-dune system, however, rare plants have been known to extend into the Spearwood system (in which calcareous yellow sands dominate) in some areas (DEC, 2009a). This species generally does not survive in disturbed areas.	Unlikely – areas that may contain habitat have been previously cleared
<i>Calectasia cyanea</i>	Blue Tinsel Lily	Critically Endangered	Critically Endangered	The Blue Tinsel Lily prefers white, grey or yellow sand or gravel. This species is restricted to Torndirrup National Park and Albany region of the South West Botanical Province (Barrett and Dixon, 2001).	No – Record in error outside of species range
<i>Drakaea elastica</i>	Glossy-leafed Hammer Orchid	Critically Endangered	Endangered	The Glossy-leafed Hammer Orchid prefers low-lying situations adjoining winter-wet swamps and grows on bare patches of sand within otherwise dense vegetation in low-lying areas alongside winter-wet swamps, typically in banksia (<i>Banksia menziesii</i> , <i>B. attenuata</i> and <i>B. ilicifolia</i>) woodland or spearwood (<i>Kunzea glabrescens</i>) thicket vegetation (DEC, 2009b).	Highly Unlikely – not suitable habitat
<i>Eremophila nivea</i>	Silky Eremophila	Critically Endangered	Endangered	Silky Eremophila occurs on sandy clay, clay loam on undulating plains, road verges.	No – Record in error outside of species range

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Grevillea thelemanniana</i>	Spider Net Grevillea	Critically Endangered	Critically Endangered	Spider Net Grevillea occurs on sandy clay soil in flat seasonally wet damplands and limestone soils are associated with some of the sites (TSSC, 2018).	Highly Unlikely – not suitable habitat
<i>Synaphea</i> sp. Fairbridge Farm (D Papenfus 696)	Selena's Synaphea	Critically Endangered	Critically Endangered	Selena's Synaphea occurs in sandy soils with lateritic pebbles near winter-wet flats, in low woodland with weedy grasses.	Highly Unlikely – not suitable habitat
<i>Thelymitra variegata</i>	Queen of Sheba	Critically Endangered		The Queen of Sheba orchid grows on sandy clay, sand and laterite. The orchid is found in banksia and Jarrah woodland (Brown <i>et al.</i> , 2013)	Unlikely – not typical habitat
<i>Acacia denticulosa</i>	Sandpaper Wattle	Endangered	Vulnerable	Sandpaper Wattle occurs in sand, loam, clay on granite outcrops, rarely on sandplains.	Highly Unlikely – not suitable habitat
<i>Byblis gigantea</i>	Rainbow Plant	Endangered		The Rainbow Plant occurs in sandy-peat swamps in seasonally wet areas.	Highly Unlikely – not suitable habitat
<i>Diuris drummondii</i>	Tall Donkey Orchid	Endangered	Vulnerable	The Tall Donkey Orchid grows in low-lying depressions in peaty and sandy clay swamps (DEC, 2008), in areas that contain surface water well into summer (Brown <i>et al.</i> , 2013).	Highly Unlikely – not suitable habitat
<i>Diuris purdiei</i>	Purdie's Donkey-orchid	Endangered	Endangered	Purdie's Donkey Orchid occurs in grey-black sand in moist winter-wet swamps with winter inundation in dense heath with scattered trees and amongst native sedges and dense heath with scattered emergent <i>Melaleuca preissiana</i> , <i>Corymbia calophylla</i> , <i>E. marginata</i> and <i>Nuytsia floribunda</i> .	Highly Unlikely – not suitable habitat
<i>Drakaea micrantha</i>	Dwarf Hammer-orchid	Endangered	Vulnerable	Dwarf Hammer-orchid usually occurs on cleared fire breaks or open sandy patches in Banksia, Jarrah and Sheoak woodlands or forest and often found under Spearwood thickets.	Possible – habitat may occur on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Eremophila glabra</i> subsp. <i>chlorella</i>		Endangered	Endangered	<i>Eremophila glabra</i> subsp. <i>chlorella</i> occurs in sandy clay in winter-wet depressions associated with <i>Casuarina obesa</i> , <i>Viminaria juncea</i> , <i>Melaleuca lateritia</i> , <i>M. acutifolia</i> , <i>M. raphiophylla</i> , <i>M. viminea</i> , <i>M. teretifolia</i> , <i>M. brevifolia</i> , <i>Chorizandra enodis</i> , <i>Eucalyptus wandoo</i> , <i>E. loxophleba</i> , <i>Acacia saligna</i> , <i>A. microbotrya</i> , <i>Banksia telmatiaea</i> , <i>B. nivea</i> subsp. <i>nivea</i> , <i>Regelia ciliata</i> , <i>Petrophile seminuda</i> , <i>Verticordia densiflora</i> var. <i>densiflora</i> and <i>Calothamnus hirsutus</i> (DPaW, 2016).	Highly Unlikely – not suitable habitat
<i>Lepidosperma rostratum</i>	Beaked Lepidosperma	Endangered	Endangered	Beaked Lepidosperma is found in peaty sand, clay associated with <i>Banksia telmatiaea</i> and <i>Calothamnus hirsutus</i> .	Highly Unlikely – not suitable habitat
<i>Synaphea</i> sp. Pinjarra Plain (A.S George 17182)		Endangered	Endangered	<i>Synaphea</i> sp. Pinjarra Plain occurs in grey sandy loam or clay, grey-brown clayey sand, brown clayey loam, laterite on flats, seasonally wet areas, railroad reserves often with wet depressions or drains.	Highly Unlikely – not suitable habitat
<i>Andersonia gracilis</i>	Slender Andersonia	Vulnerable	Endangered	Slender Andersonia <i>Andersonia gracilis</i> is currently known from the Badgingarra, Dandaragan and Kenwick areas where it is found on seasonally damp, black sandy clay flats near or on the margins of swamps, often on duplex soils supporting low open heath vegetation with species such as <i>Calothamnus hirsutus</i> , <i>Verticordia densiflora</i> and <i>Kunzea recurva</i> over sedges (DEC, 2006).	Highly Unlikely – not suitable habitat
<i>Banksia mimica</i>	Summer Honey-pot	Vulnerable	Endangered	Summer Honey-pot prefers white or grey sand over laterite, sandy loam.	Highly Unlikely – not suitable habitat
<i>Conospermum undulatum</i>	Wavy-leaved Smokebush	Vulnerable	Vulnerable	Wavy-leaved Smokebush occurs on sand and sandy clay soils, often over laterite, on flat or gently sloping sites between the Swan and Canning Rivers with a few records from slightly swampy habitat (DEC, 2009c).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Diuris micrantha</i>	Dwarf Bee-orchid	Vulnerable	Vulnerable	The Dwarf Bee-orchid is usually found on brown loamy clay in winter-wet swamps, in shallow water.	Highly Unlikely – not suitable habitat
<i>Eleocharis keigheryi</i>	Keighery's Eleocharis	Vulnerable	Vulnerable	Keighery's Eleocharis occurs in clay, sandy loam and is emergent in freshwater: creeks, claypans.	Highly Unlikely – not suitable habitat
<i>Morelotia australiensis</i> (Listed as <i>Tetraria australiensis</i>)	Southern Tetraria	Vulnerable	Vulnerable	Southern Tetraria occurs in grey sand over clay; also described as yellow and sandy or clayey lateritic soils favouring winter-wet swampy depressions, drainage lines or rises surrounding swamps.	Highly Unlikely – not suitable habitat
<i>Acacia lasiocarpa</i> var. <i>bracteolata</i> long peduncle variant (G.J. Keighery 5026)		Priority 1		This variant of <i>Acacia lasiocarpa</i> occurs in grey or black sand over clay in swampy areas, winter wet lowlands.	Highly Unlikely – not suitable habitat
<i>Amanita quenda</i>	Quenda lepidella	Priority 1		Quenda lepidella are solitary or scattered, in moist sandy soil in wetland vegetation (Davidson <i>et al.</i> , 2015).	Possible – habitat may occur on the site
<i>Drosera paleacea</i>	Dwarf Sundew	Priority 1		Dwarf Sundew occurs in white sand, sandy clay in the Albany region.	No – record in error
<i>Drosera patens</i>		Priority 1		<i>Drosera patens</i> occurs in sandy soils on the margins of winter-wet depressions, swamps and lakes.	Unlikely – not typical habitat
<i>Hydrocotyle striata</i>		Priority 1		<i>Hydrocotyle striata</i> occurs in clay near springs.	Highly Unlikely – not suitable habitat
<i>Levenhookia preissii</i>	Preiss's Stylewort	Priority 1		Preiss's Stylewort occurs in grey or black peaty sands in swamps.	Highly Unlikely – not peaty habitat
<i>Acacia benthamii</i>		Priority 2		<i>Acacia benthamii</i> grows on sand, typically on limestone breakaways	Highly Unlikely – not Limestone habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Amanita brunneola</i>		Priority 2		<i>Amanita brunneola</i> occurs singly or gregarious in sandy soil and is recorded from degraded native vegetation, nearby plants include <i>Allocasuarina fraseriana</i> , <i>Corymbia calophylla</i> and <i>Eucalyptus marginata</i> (Davidson <i>et al.</i> , 2023).	Unlikely – not typical habitat
<i>Amanita cretaceaverruca</i>		Priority 2		<i>Amanita cretaceaverruca</i> is gregarious in sandy clay or peaty soil (Davidson <i>et al.</i> , 2023).	Highly Unlikely – not clay/peaty habitat
<i>Amanita wadulawitu</i>	Long-spored Lepidella	Priority 2		Long-spored Lepidella occurs in sandy soil with <i>Corymbia calophylla</i> , <i>Eucalyptus marginata</i> , <i>E. todtiana</i> , <i>E. camaldulensis</i> , <i>Jacksonia furcellata</i> , <i>Banksia attenuata</i> and <i>B. menziesii</i> . (McGurk <i>et al.</i> , 2016).	Unlikely – not typical habitat
<i>Calymperastrum latifolium</i>		Priority 2		<i>Calymperastrum latifolium</i> is recorded from a shaded <i>Macrozamia</i> stem on a large rocky outcrop (Western Australian Herbarium, 1994).	Highly Unlikely – no host plants on the site
<i>Fabronia hampeana</i>		Priority 2		<i>Fabronia hampeana</i> occurs on sheltered wet trunk of <i>Macrozamia dyeri</i> in shrub layer (Western Australian Herbarium, 2005).	Highly Unlikely – no host plants on the site
<i>Haloragis aculeolata</i>		Priority 2		<i>Haloragis aculeolata</i> occurs in black sand or clay over limestone in winter-wet areas.	Highly Unlikely – not suitable habitat
<i>Leucopogon</i> sp. Busselton (D. Cooper 243)		Priority 2		<i>Leucopogon</i> sp. Busselton (D. Cooper 243) is recorded from a seasonal dampland in seasonally wet, white sand (Western Australian Herbarium, 2011).	Highly Unlikely – not suitable habitat
<i>Netrostylis</i> sp. Chandala (G.J. Keighery 17055)		Priority 2		<i>Netrostylis</i> sp. Chandala occurs in peaty sand on swamp edges.	Highly Unlikely – not suitable habitat
<i>Poranthera moorokatta</i>		Priority 2		<i>Poranthera moorokatta</i> grows in white silica sand and has been recorded in Banksia woodland and in a shallow dampland (Barrett, 2012).	Possible – habitat may occur on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Scaevola paludosa</i>		Priority 2		<i>Scaevola paludosa</i> prefers sandy soils and occurs on Cape Le Grande.	No – record in error and outside of species range
<i>Stenanthemum sublineare</i>		Priority 2		<i>Stenanthemum sublineare</i> grows in littered white sand on coastal plain (Rye, 2001).	Highly Unlikely – not suitable habitat
<i>Amanita carneiphylla</i>	Miller's Pink-Gilled Lepidella	Priority 3		Miller's Pink-Gilled Lepidella is a deeply rooting species and grows in sandy soil with <i>Eucalyptus</i> , <i>Banksia</i> , and <i>Allocasuarina</i> and at one site, Mediterranean pine (<i>Pinus</i>) was also found (Tulloss, 2022).	Unlikely – not typical habitat
<i>Amanita drummondii</i>	Drummond's Grisette	Priority 3		Drummond's Grisette is solitary to gregarious in leaf litter in association with <i>Agonis flexuosa</i> , <i>A. theiformis</i> , <i>Allocasuarina fraseriana</i> , <i>Corymbia calophylla</i> , <i>Eucalyptus marginata</i> , <i>E. patens</i> , <i>E. staeri</i> , <i>Jacksonia furcellata</i> , <i>Kunzea glabrescens</i> , <i>Melaleuca</i> sp., <i>Podocarpus drouynianus</i> , <i>Taxandria parviceps</i> . (Davidson <i>et al.</i> , 2015) growing in sandy soil (Amanitaceae Org, 2015a).	Unlikely – not typical habitat
<i>Amanita fibrilloses</i>	Peach Amanita	Priority 3		Peach Amanita is recorded from sandy or gravelly soil in dry sclerophyll forest and Banksia woodland, or in humus rich soil in seasonally wet eucalypt and paperbark woodland, often associated with <i>Eucalyptus marginata</i> , <i>E. jacksonii</i> , <i>Allocasuarina fraseriana</i> , <i>Corymbia calophylla</i> , <i>Melaleuca preissiana</i> and <i>Agonis</i> sp. (Davison <i>et al.</i> , 2013).	Unlikely – not typical habitat
<i>Amanita preissii</i>	Cinnamon-ring Lepidella	Priority 3		Cinnamon-ring Lepidella is found under shrubs and Eucalyptus in West Australia (Amanitaceae Org, 2015b) in sandy soil and lateritic gravel, associated with <i>Allocasuarina fraseriana</i> , <i>Acacia pulchella</i> , <i>Corymbia calophylla</i> , <i>Callitris</i> sp., <i>Eucalyptus gomphocephala</i> , <i>E. marginata</i> , <i>Macrozamia fraseri</i> and <i>Pinus pinaster</i> (Davidson <i>et al.</i> , 2017).	Unlikely – not typical habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Amanita wadjukiorum</i>	Wadjuk Lepidella	Priority 3		Wadjuk Lepidella is solitary to gregarious, in sandy soil in degraded native vegetation with <i>Allocasuarina fraseriana</i> , <i>Corymbia calophylla</i> , <i>C. citriodora</i> and <i>Brachychiton</i> sp (Davidson <i>et al.</i> , 2013).	Unlikely – not typical habitat
<i>Cyathochaeta teretifolia</i>		Priority 3		<i>Cyathochaeta teretifolia</i> occurs in peaty sand, sandy clay on swamps, creek edges.	Highly Unlikely – not suitable habitat
<i>Dampiera triloba</i>		Priority 3		<i>Dampiera triloba</i> grows in loamy sand (Australian National Herbarium, 2009) in lower lying areas.	Unlikely – not typical habitat
<i>Jacksonia gracillima</i>		Priority 3		<i>Jacksonia gracillima</i> occurs in grey and brown well-drained sand.	Unlikely – not typical habitat
<i>Meionectes tenuifolia</i>		Priority 3		<i>Meionectes tenuifolia</i> occurs on swamp margins on seasonally wet poorly drained flats or granite flats in shallow soils.	Highly Unlikely – not suitable habitat
<i>Phlebocarya pilosissima</i> subsp. <i>pilosissima</i>		Priority 3		<i>Phlebocarya pilosissima</i> subsp. <i>pilosissima</i> grows in white or grey sand, lateritic gravel.	Highly Unlikely – not suitable habitat
<i>Pimelea calcicola</i>		Priority 3		<i>Pimelea calcicola</i> occurs in sand on coastal limestone ridges.	Highly Unlikely – not limestone habitat
<i>Schoenus benthamii</i>		Priority 3		<i>Schoenus benthamii</i> prefers white, grey sand, sandy clay in winter-wet flats, swamps.	Highly Unlikely – not suitable habitat
<i>Schoenus capillifolius</i>		Priority 3		<i>Schoenus capillifolius</i> grows in brown mud on claypans.	Highly Unlikely – not claypan habitat
<i>Schoenus pennisetis</i>		Priority 3		<i>Schoenus pennisetis</i> occurs in grey or peaty sand, sandy clay in swamps, winter-wet depressions.	Highly Unlikely – not suitable habitat
<i>Stylidium aceratum</i>		Priority 3		<i>Stylidium aceratum</i> occurs in sandy soils in swamp heathland.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Stylidium paludicola</i>		Priority 3		<i>Stylidium paludicola</i> prefers peaty sand over clay in winter wet habitats in Marri and Melaleuca woodland, Melaleuca shrubland.	Highly Unlikely – not suitable habitat
<i>Styphelia filifolia</i>		Priority 3		<i>Styphelia filifolia</i> occurs in sandy soils of the coastal plain (with one known occurrence from the northern Darling Scarp), usually in Banksia or Jarrah woodland and in low-lying situations (Hislop and Lelièvre, 2017).	Possible – habitat may occur on the site
<i>Aponogeton hexatepalus</i>	Stalked Water Ribbons	Priority 4		Stalked Water Ribbons grow in freshwater: ponds, rivers, claypans	No – not suitable habitat
<i>Dodoniaea hackettiana</i>	Hackett's Hopbush	Priority 4		Hackett's Hopbush occurs in sand with outcropping limestone.	Highly Unlikely – not limestone habitat
<i>Drosera occidentalis</i>	Western Sundew	Priority 4		The Western Sundew occurs in sandy and clayey soils in swamps and wet depressions.	Unlikely – not typical habitat
<i>Eucalyptus kruseana</i>	Bookleaf Mallee	Priority 4		Bookleaf Mallee grows in sandy loam on granite outcrops and hills.	No – record in error – occurs near Kalgoorlie
<i>Grevillea olivacea</i>	Olive Grevillea	Priority 4		Olive Grevillea grows in white or grey sand on coastal dunes, limestone rocks.	No – record in error – outside species range
<i>Jacksonia sericea</i>	Waldjumi	Priority 4		Waldjumi grows in calcareous and sandy soils.	Highly Unlikely – not calcareous habitat
<i>Kennedia beckxiana</i>	Cape Arid Kennedia	Priority 4		Cape Arid Kennedia occurs in sand, loam on granite hills and outcrops.	No – record in error of a cultivated plant – outside of species range

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Microtis quadrata</i>	South Coast Mignonette Orchid	Priority 4		South Coast Mignonette Orchid occurs on clay based coastal flats (Brown et al., 2013).	Highly Unlikely – not clay habitat
<i>Ornduffia submersa</i>		Priority 4		<i>Ornduffia submersa</i> grows in freshwater 0.05-0.6 m deep in pools, lakes, swamps, winter-wet depressions, claypans.	No – not suitable habitat
<i>Stylidium ireneae</i>		Priority 4		<i>Stylidium ireneae</i> occurs in sandy loam in valleys near creek lines, woodland, often with <i>Agonis</i> .	Highly Unlikely – not suitable habitat
<i>Stylidium longitubum</i>	Jumping Jacks	Priority 4		Jumping Jacks prefer sandy clay, clay in seasonal wetlands.	Highly Unlikely – not clay habitat
<i>Thysanotus glaucus</i>		Priority 4		<i>Thysanotus glaucus</i> occurs in white, grey or yellow sand, sandy gravel.	Highly Unlikely – not suitable habitat
<i>Tripterococcus</i> sp. <i>Brachylobus</i> (A.S. George 14234)		Priority 4		<i>Tripterococcus</i> sp. <i>Brachylobus</i> occurs in grey, black or peaty sand winter-wet flats.	Highly Unlikely – not suitable habitat
<i>Verticordia lindleyi</i> subsp. <i>lindleyi</i>		Priority 4		<i>Verticordia lindleyi</i> subsp. <i>lindleyi</i> prefers sand, sandy clay in winter-wet depressions.	Highly Unlikely – not suitable habitat

* sourced from Florabase as well as the DBCA database searches unless otherwise denoted

3.2.2 TEC/PEC Database Search

A search of DBCA's Threatened (TEC) and Priority Ecological Communities (PEC) database identified six TECs and seven PECs (Appendix 4) as having been recorded within 10km of the site. Two of the PECs are part of a Federally listed TEC. The communities identified in the database searches are outlined in Table 3.

Table 3: TEC and PECs Identified in Database Search

Number	Description	Conservation Status in Western Australia	Status under the EPBC Act
SCP26a	<i>Melaleuca huegelii</i> - <i>M. systena</i> shrublands of limestone ridges (floristic community type 26a as originally described in Gibson <i>et al.</i> 1994)	Critically Endangered	Critically Endangered
SCP30a	<i>Callitris preissii</i> (or <i>Melaleuca lanceolata</i>) forests and woodlands of the Swan Coastal Plain (floristic community type 30a as originally described in Gibson <i>et al.</i> 1994)	Critically Endangered	
Mound Springs SCP	Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain)	Critically Endangered	Endangered
SCP08	Herb rich shrublands in clay pans (floristic community type 8 as originally described in Gibson <i>et al.</i> 1994)	Endangered	Critically Endangered
SCP10a	Shrublands on dry clay flats (floristic community type 10a as originally described in Gibson <i>et al.</i> 1994)	Endangered	Critically Endangered
Muchea Limestone	Shrublands and woodlands on Muchea Limestone of the Swan Coastal Plain	Endangered	Endangered
Seasonal clay wetlands of the SW (groups 1-3)	Seasonal rainfall filled wetlands with impeding substrate of the Swan Coastal Plain and Jarrah Forest in transitional rainfall zones	Priority 1	Critically Endangered
Wooded waterbird wetlands	Wooded wetlands which support colonial waterbird nesting areas	Priority 2	
SCP21c	Low lying <i>Banksia attenuata</i> woodlands or shrublands	Priority 3	Endangered as part of the Banksia WL SCP
SCP22	<i>Banksia ilicifolia</i> woodlands	Priority 3	Endangered as part of the Banksia WL SCP
SCP24	Northern Spearwood shrublands and woodlands	Priority 3	Endangered
Banksia WL SCP	<i>Banksia</i> Woodlands of the Swan Coastal Plain ecological community	Priority 3	Endangered
Tuart woodlands	Tuart (<i>Eucalyptus gomphocephala</i>) woodlands and forests of the Swan Coastal Plain	Priority 3	Critically Endangered

Number	Description	Conservation Status in Western Australia	Status under the EPBC Act
Coastal Saltmarsh	Subtropical and Temperate Coastal Saltmarsh	Priority 3	Vulnerable

Of the TECs and PECs identified in the database search several buffered occurrences of the Banksia Woodlands of the Swan Coastal Plain ecological community are mapped on the site, however the occurrence confidence for each is not certain.

3.3 Flora

A total of 68 species were recorded during the flora survey (Appendix 3). The total consisted of 39 native species and 30 introduced species (44.1%). The number of species is considered low for the vegetation types and size of the site. The relatively high proportion of introduced species reflects overall poor condition of the vegetation on the site with large patches without any native vegetation.

No Threatened or Priority plant species were recorded on the site.

There were two Declared Pests under the Biosecurity and Agriculture Management Act 2007 (BAM Act) being Bridal Creeper (*Asparagus asparagoides*) and Arum Lily (*Zantedeschia aethiopica*). Bridal Creeper is also listed as a Weed of National Significance (WoNS).

Plant families with the greatest number of species were the Fabaceae (Wattle and Pea family – 7 species, 4 native and 3 introduced), Asteraceae (Daisy family – 6 species, 1 native and 5 introduced), Proteaceae (Banksia family – 6 species, all native), and Poaceae (Grass family – 6 species, all introduced).

Species richness in the eight quadrats ranged from 7-23, averaging 14.5 species with a range of 0-14 native species. The average number of weed species was 8.6 (66.1%) (Appendix 7). The high number of weed species is consistent with the overall degraded nature of the site.

No Threatened plant species were recorded on the site or are considered likely to occur.

3.4 Vegetation

3.4.1 Vegetation Complexes

Vegetation complexes are a very broad mapping unit based on landform and soils type (Heddlé *et al.*, 1980). The vegetation complex mapped on the site is the Bassendean Complex-Central and South which ranges from woodland of *Eucalyptus marginata* (Jarrah) - *Allocasuarina fraseriana* (Sheoak) - *Banksia* species to low woodland of *Melaleuca* species, and sedgelands on the moister sites (Heddlé *et al.*, 1980).

3.4.2 Vegetation Types

Vegetation types are a finer level of vegetation description and mapping used for small scale sites, such as the survey area. Vegetation types are described based on the structure of the vegetation (eg.

woodland, heath) and the dominant species in each structure. Six vegetation types were described and mapped on the site (Table 4, Figure 3). Quadrat Data are provided in Appendix 4.

There were also areas that were mapped as Weeds and Cleared. The areas of Weeds are dominated by pasture grasses and dense areas of *Watsonia* (*Watsonia meriana* var. *bulbillifera*). The Cleared areas are bare earth with very few species present.

Table 4: Vegetation Type Descriptions

Vegetation Type	Description	Photographs
Ba <i>Banksia attenuata</i> /B. <i>menziesii</i> . B. <i>ilicifolia</i> Low Open Woodland over weeds	This vegetation type occurs at the northern end of the site on both lots. The <i>Banksia</i> tree species are up to 5m high and around 10% cover. <i>Allocasuarina fraseriana</i> is sometimes present. <i>Kunzea glabrescens</i> is present in part as a tall shrub up to 3m high. Common native understorey species include <i>Xanthorrhoea preissii</i>, <i>X. brunonis</i>, <i>Phlebocarya ciliata</i> and <i>Chamaescilla corymbosa</i>. The soil type is grey-black sand. Quadrats CR1 and CR2 are representative of this vegetation type.	
Kg <i>Kunzea glabrescens</i> Tall Shrubland over weeds	This vegetation type occurs in the northern end of the site. <i>Kunzea glabrescens</i> (Spearwood) is up to 5m high and dense, at 25% cover. The understorey is mostly weeds with <i>Ehrharta longiflora</i> (Annual Veldtgrass) the most common species. The soil type is black sand. Quadrat CR4 is representative of this vegetation type.	

Vegetation Type	Description	Photographs
KgAI <i>Kunzea glabrescens</i> / <i>Acacia longifolia</i> Tall Open Scrub over <i>Hypocalymma angustifolia</i> Low Open Shrubland over weeds	This vegetation type occupies a large part of the site north of Verde Drive. Similar to the Kg vegetation type but wetter soil conditions and with the invasive woody weed <i>Acacia longifolia</i> (Sydney Wattle) very common. Some native <i>Hypocalymma angustifolium</i> shrubs occur in the understorey and reflect the wet nature of the soils. The soil type is black sand and was inundated at the time of the survey. Quadrats CR5 and CR6 are representative of this vegetation type.	
Mp <i>Melaleuca preissiana</i> Trees	Several mature <i>Melaleuca preissiana</i> (Paperbark) trees occur either side of Verde Drive in inundated conditions as of 12 September 2025. Some <i>Acacia longifolia</i> weedy shrubs also occur. There is very little understorey due to the inundated conditions.	

Vegetation Type	Description	Photographs
TT <i>Gaudia laevigata</i> Closed Tall Scrub over <i>Xanthorrhoea preissii</i> Low Open Shrubland over weeds	This vegetation type dominates the southern half of the site, south of Verde Drive. The aggressive woody weed <i>Gaudia laevigata</i> (Victorian Tea Tree) is up to 4m high and 75% cover. Occasional native trees occur in this area including <i>Banksia</i> trees but at very low density. The understorey is mostly weeds, particularly Annual and Perennial Veldtgrass, <i>Fumaria capreolata</i> and <i>Bromus diandrus</i>. The soil type is grey/brown-black sand. Quadrats CR7 and CR8 are representative of this vegetation type.	
Eg <i>Eucalyptus gomphocephala</i> (Tuart) Tree	One Tuart tree occurs right on the southern boundary of the site. The understorey is all weeds.	

3.4.3 Vegetation Condition

The condition of the vegetation was assessed according to the system of Keighery as described in Bush Forever (Government of Western Australia, 2000) (Table 5).

Table 5: Vegetation Condition Rating Scale

Condition	Description
Pristine	Pristine or nearly so, no obvious signs of disturbance.
Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species.
Very Good	Vegetation structure altered, obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.
Good	Vegetation structure significantly altered by very obvious signs of multiple disturbance. Retains basic vegetation structure or ability to regenerate to it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.
Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.
Completely Degraded	The structure of the vegetation is no longer intact and the area is completely or almost completely without native species. These are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.

Source: Government of Western Australia, 2000

The condition of the vegetation on the site is mostly Completely Degraded as it is dominated by weeds or cleared. There are some areas that have some native vegetation cover that are in Degraded condition. There is no vegetation on the site that is in Good or better condition (Figure 4).

3.5 Conservation Significance of Flora and Vegetation

3.5.1 Flora

No Threatened or Priority flora species were recorded on the site. No Threatened or Priority flora species are expected to occur on the site in any other seasons.

3.5.2 Vegetation Complex

Approximately 26.9% of the pre-European extent of the Bassendean Complex-Central and South remains on the Swan Coastal Plain (DBCA, 2018). The area remaining of Bassendean Complex-Central and South is above EPA's target to retain at least 10% of each vegetation complex in constrained areas.

3.5.3 Threatened Ecological Communities

The site does not contain any vegetation that would be considered part of a TEC or PEC.

There are areas of vegetation on the site is dominated by Banksia species. Therefore, further analysis of the vegetation was undertaken to determine whether it meets the criteria to be the Banksia Woodlands of the Swan Coastal Plain ecological community. The Banksia woodland TEC needs to meet a minimum 'patch' size depending on its condition to qualify as the TEC, as follows:

- 'Pristine' – no minimum patch size
- 'Excellent' – 0.5ha
- 'Very Good' – 1ha
- 'Good' – 2ha
- 'Degraded' – not part of the TEC

The vegetation dominated by Banksia is in Degraded condition and therefore is not part of the TEC. The site is not within 30m of a patch of the TEC so is not contiguous with a larger patch.

4 FAUNA

4.1 Methodology

A Basic Fauna Survey was undertaken in accordance with EPA Technical Guidance *Fauna Surveys for Environmental Impact Assessment* (EPA, 2020). Desktop studies were undertaken to identify habitats and potential threatened species that may occur on the site.

Searches of the following databases were undertaken prior to the site survey:

- DBCA Threatened and Priority Fauna Database (Appendix 5) for a radius of 10 km that provides a list of Threatened and Priority species recorded in the area (Reference 36-0925FA) (DBCA, 2025c);
- Atlas of Living Australia (ALA, 2025) which shows all species that have been recorded within a 10km radius of the site (Appendix 1).
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2025) (Appendix 2) which identifies species that are listed under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) that could potentially have habitat within a 5km radius of the site.

A site reconnaissance was conducted by PGV Environmental on 11 August and 12 September 2025 to describe the fauna habitats on the site. Desktop studies were undertaken to identify habitats and potential threatened species that may occur on the site. The likelihood of the site providing habitat to identified conservation significant fauna species was determined.

4.2 Fauna Habitats

The fauna habitats on the site consist of:

- Open Woodland habitat (Plate 7)
- Dense Shrubland habitat (Plate 8); and
- Cleared areas (Plate 9).

The Open Woodland habitat is located in the northern part of the site. The dense shrubland habitat is mainly on Lot 25 associated with the wetland area and is dominated by exotic shrubs. The Cleared areas are most of Lot 24 and the southern part of Lot 25 (Figure 5).

There was some temporary open water at the time of the September site inspection that is a result of the above average rainfall in the months preceding the survey. This water is considered to be temporary and not a usual habitat on the site.

Plate 7: Open Woodland Habitat

Plate 8: Dense Shrubland Habitat

Plate 9: Cleared Habitat

Fauna habitat can be assessed using a number of factors including, the size of the habitat, the level of habitat connectivity, availability of specific resources (e.g., tree hollows) and overall vegetation quality. The habitat was assessed according to the categories in Table 6.

Table 6: Fauna Habitat Value

Habitat Value	Description
High Quality Fauna Habitat	These areas closely approximate the vegetation mix and quality that would have been in the area prior to any disturbance. The habitat has connectivity with other habitats and is likely to contain the most natural vertebrate fauna assemblage.
Very Good Fauna Habitat	These areas show minimal signs of disturbance (e.g., grazing, clearing, fragmentation, weeds) and generally retain many of the characteristics of the habitat if it had not been disturbed. The habitat has connectivity with other habitats and fauna assemblages in these areas are likely to be minimally affected by disturbance.
Good Fauna Habitat	These areas showed signs of disturbance (e.g., grazing, clearing, fragmentation, weeds) but generally retain many of the characteristics of the habitat if it had not been disturbed. The habitat has connectivity with other habitats and fauna assemblages in these areas are likely to be affected by disturbance.
Disturbed Fauna Habitat	These areas showed signs of significant disturbance. Many of the trees, shrubs and undergrowth are cleared. These areas may be in the early succession and regeneration stages. Areas may show signs of significant grazing, contain weeds or have been damaged by vehicle or machinery. Habitats are fragmented or have limited connectivity with other fauna habitats. Fauna assemblages in these areas are likely to differ significantly from what might be expected in the area had the disturbance not occurred.

Habitat Value	Description
Highly Degraded Fauna Habitat	These areas often have a significant loss of vegetation, an abundance of weeds, and a large number of vehicle tracks or are completely cleared. Limited or no fauna habitat connectivity. Faunal assemblages in these areas are likely to be significantly different to what might have been in the area pre-disturbance.

From: Coffey Environments, 2009

The vegetation is largely in Completely Degraded and Degraded condition and the site is bisected by a road and fragmented from other habitats. Therefore, the habitat on the site is considered to be Disturbed Fauna Habitat.

4.3 Database Searches for Conservation Significant Fauna Species

Outlined below in Table 7 is a short description of the preferred habitat for each of the species that were identified in the database searches and their preferred habitats. The preferred habitat has been compared to the habitats on the site described above and the likelihood of each species to be present was determined. Species recorded in the database search results that live in the ocean or birds that are marine and pelagic have not been included in the assessment. The only species recorded from the immediate vicinity of the site were quenda (*Isoodon fusciventer*) and a Bush Cricket (*Throscodectes xiphos*).

In summary, there was habitat on for the following species:

- Baudin's Black Cockatoo (*Zanda baudinii*), Endangered;
- Carnaby's Black Cockatoo (*Zanda latirostris*), Endangered;
- Forest Red-tailed Black-Cockatoo (*Calyptorhynchus banksii naso*), Vulnerable;
- Stylet Bush Cricket (*Throscodectes xiphos*), Priority 1;
- Perth Slider, Lined Skink (*Lerista lineata*), Priority 3; and
- Southern Brown Bandicoot, Quenda (*Isoodon fusciventer*), Priority 4.

The Rainbow Bee-eater (*Merops ornatus*), listed as Marine, may also be an intermittent visitor to the site but is unlikely to rely on the vegetation for survival

The Bush Cricket occurs on only lives in Grass Trees. The Grass Tree species on the site are *Xanthorrhoea preissii* and *Xanthorrhoea brunonis*. Habitat plants for this species are very sparse at the northern end and a few among the Victorian Teatrees at the southern end. While the bush cricket may be present on site due to the presence of Grass Trees, the likelihood is very low due to the sparse number of Grass Trees on the site and a targeted survey for the Bush Cricket is not warranted.

Table 7: Identified Significant Fauna Species and Likelihood of Occurring on the Site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Calidris ferruginea</i>	Curlew Sandpiper	Critically Endangered	Critically Endangered	Curlew Sandpipers mainly occur on intertidal mudflats in sheltered coastal areas, such as estuaries, bays, inlets and lagoons, and also around non-tidal swamps, lakes and lagoons near the coast, and ponds in saltworks and sewage farms.	Highly Unlikely – not suitable habitat
<i>Calidris tenuirostris</i>	Great Knot	Critically Endangered	Vulnerable/ Marine/ Migratory	The Great Knot winters in Australia, occurring in sheltered coastal habitats such as inlets, bays, harbours, estuaries and lagoons with large intertidal mud and sandflats, oceanic sandy beaches with nearby mudflats, sandy spits and islets, muddy shorelines with mangroves and occasionally exposed reefs or rock platforms. It roosts in refuges such as shallow water in sheltered sites, on coastal dunes or on saltflats amongst mangroves during high tides (BirdLife International, 2015a).	Highly Unlikely – not suitable habitat
<i>Numenius madagascariensis</i>	Eastern Curlew	Critically Endangered	Critically Endangered	The Eastern Curlew is most commonly associated with sheltered coasts, especially estuaries, bays, harbours, inlets and coastal lagoons, with large intertidal mudflats or sandflats, often with beds of seagrass. Occasionally, the species occurs on ocean beaches (often near estuaries), and coral reefs, rock platforms, or rocky islets.	Highly Unlikely – not suitable habitat
<i>Pseudocheirus occidentalis</i>	Western Ringtail Possum, Ngwayir	Critically Endangered	Critically Endangered	The Western Ringtail Possum is a medium sized nocturnal marsupial. This species occurs in and near coastal Peppermint Tree (<i>Agonis flexuosa</i>) forest and Tuart (<i>Eucalyptus gomphocephala</i>) dominated forest with a Peppermint Tree understorey.	Highly Unlikely – not suitable habitat
<i>Botaurus poiciloptilus</i>	Australasian bittern	Endangered	Endangered	The Australasian Bittern occurs mainly in densely vegetated freshwater wetlands and, rarely, in estuaries or tidal wetlands.	Highly Unlikely – not suitable habitat as areas of standing water were exposed

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Calidris canutus</i>	Red Knot	Endangered	Vulnerable/ Marine/ Migratory	In Australasia the Red Knot mainly inhabit intertidal mudflats, sandflats and sandy beaches of sheltered coasts, in estuaries, bays, inlets, lagoons and harbours; sometimes on sandy ocean beaches or shallow pools on exposed wave-cut rock platforms or coral reefs.	Highly Unlikely – not suitable habitat
<i>Leioproctus douglasiellus</i>	A Short-tongued Bee	Endangered	Critically Endangered	The short-tongued bee species is only known from three locations within the Perth metropolitan area ranging from Cannington to Forrestdale. Specimens have been collected on two plant species, <i>Goodenia filiformis</i> and <i>Anthotium junciforme</i> (TSSC, 2013).	Highly Unlikely – no host flora species recorded on the site
<i>Myrmecobius fasciatus</i>	Numbat, Walpuriti	Endangered	Endangered	Numbats occur in eucalypt forests and woodlands dominated by <i>Eucalyptus marginata</i> , <i>Corymbia calophylla</i> and <i>Eucalyptus wandoo</i> .	Highly Unlikely – not suitable habitat and the site is too disturbed
<i>Neopasiphae simplicior</i>	A Short-tongued Bee	Endangered	Critically Endangered	The Short-tongued Bee species is restricted in range, thought to only occur in a single location within the bushland of the Forrestdale Lake Nature Reserve adjacent to Forrestdale Lake and the Armadale Golf Course, with a previous population known from Cannington. It has been collected at flowers of <i>Goodenia filiformis</i> , <i>Lobelia tenuior</i> , <i>Angianthus preissianus</i> and <i>Velleia</i> sp. It occurs in two TECs, Type 8 and Type 10a. Males roost overnight in flowers of Asteraceae (Houston, 2000).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Rostratula australis</i>	Australian Painted Snipe	Endangered	Endangered Marine/ Migratory	The Australian Painted Snipe has been recorded at wetlands in all states of Australia but is most common in eastern Australia. It generally inhabits shallow terrestrial freshwater (occasionally brackish) wetlands, including temporary and permanent lakes, swamps and claypans. It also uses inundated or waterlogged grassland or saltmarsh, dams, rice crops, sewage farms and bore drains. Typical sites include a cover of vegetation, including grasses.	Highly Unlikely – the site is too disturbed
<i>Zanda baudinii</i>	Baudin's Black Cockatoo	Endangered	Endangered	Baudin's Black-Cockatoo mainly occurs in eucalypt forests, especially Jarrah (<i>Eucalyptus marginata</i>), Marri (<i>Corymbia calophylla</i>), also Karri (<i>Eucalyptus diversicolor</i>) forest, often feeding in the understorey on proteaceous trees and shrubs, especially banksias (DAWE, 2022).	Possible – habitat very limited
<i>Zanda latirostris</i>	Carnaby's Black Cockatoo	Endangered	Endangered	Carnaby's Cockatoo is found in the south-west of Australia from Kalbarri through to Ravensthorpe. It has a preference for feeding on the seeds of <i>Banksia</i> , <i>Hakea</i> , <i>Eucalyptus</i> , <i>Grevillea</i> , <i>Pinus</i> and <i>Allocasuarina</i> spp. It is nomadic often moving toward the coast after breeding. It breeds in tree hollows that are 2.5 - 12m above the ground and have an entrance 23-30cm with a depth of 1-2.5m. Nesting mostly occurs in smooth-barked trees (e.g. Salmon Gum, Wandoo, Red Morrell) (DAWE, 2022).	Possible – habitat very limited
<i>Ardenna carneipes</i>	Flesh-footed Shearwater, Fleshy-footed Shearwater	Vulnerable	Marine/ Migratory	The Flesh-footed Shearwater mainly occurs in the subtropics over continental shelves and slopes and occasionally inshore waters. Burrows are situated in areas that provide a clear flight-path for birds to enter and exit their colonies.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Calyptrorhynchus banksii naso</i>	Forest Red-tailed Black-Cockatoo	Vulnerable	Vulnerable	Forest Red-tailed Black Cockatoos frequent the humid to sub-humid south-west of Western Australia from Gingin in the north, to Albany in the south and west to Cape Leeuwin and Bunbury (DAWE, 2022). It nests in tree hollows with a depth of 1-5m, that are predominately Marri (<i>Corymbia calophylla</i>), Jarrah (<i>Eucalyptus marginata</i>) and Karri (<i>Eucalyptus diversicolor</i>) and it feeds primarily on the seeds of Marri (DAWE, 2022).	Possible – habitat very limited
<i>Charadrius leschenaultii</i>	Greater Sand Plover	Vulnerable	Vulnerable/ Marine/ Migratory	In Australasia, the Greater Sand Plover is almost entirely coastal, inhabiting littoral and estuarine habitats. They mainly occur on sheltered sandy, shelly or muddy beaches with large intertidal mudflats or sandbanks, as well as sandy estuarine lagoons.	Highly Unlikely – not suitable habitat
<i>Dasyurus geoffroii</i>	Chuditch, Western Quoll	Vulnerable	Vulnerable	The Chuditch have been known to occupy a wide range of habitats including woodlands, dry sclerophyll forests, riparian vegetation, beaches and deserts. They are opportunistic feeders, and forage on the ground at night, feeding on invertebrates, small mammals, birds and reptiles.	Highly Unlikely – the site is too disturbed and not large enough to support this species
<i>Leipoa ocellata</i>	Mallee Fowl	Vulnerable	Vulnerable	Mallee fowl have been found in mallee regions of southern Australia from approximately the 26th parallel of latitude southwards in mallee bushland.	No – not mallee habitat
<i>Setonix brachyurus</i>	Quokka	Vulnerable	Vulnerable	Quokkas were originally very common on the Swan Coastal Plain, however, their distribution is now limited to Rottnest Island and a few isolated areas in the south-west of WA. On the mainland, they prefer densely vegetated areas around wetlands and streams, whereas on Rottnest Island they inhabit low scrubby coastal vegetation where water is not readily available year-round.	Highly Unlikely – Thought to be locally extinct

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Sternula nereis nereis</i>	Australian Fairy Tern	Vulnerable	Vulnerable	The Fairy Tern (Australian) nests on sheltered sandy beaches, spits and banks above the high tide line and below vegetation.	Highly Unlikely – not suitable habitat
<i>Westralunio carteri</i>	Carter's Freshwater Mussel	Vulnerable	Vulnerable	Carter's Freshwater Mussel is South-West Western Australia's only freshwater mussel (Murdoch University & SERCUL, 2012). Carter's Freshwater Mussel occurs in freshwater streams, rivers, reservoirs and lakes (ICUN, 2015b) and is intolerant to dehydration for more than three days and salinity (Murdoch University & SERCUL, 2012).	No - no suitable habitat
<i>Actitis hypoleucos</i>	Common Sandpiper	Migratory	Marine/ Migratory	The Common Sandpiper is mostly found around muddy margins or rocky shores. Generally the species forages in shallow water and on bare soft mud at the edges of wetlands.	Highly Unlikely – the site is too disturbed
<i>Apus pacificus</i>	Fork-tailed Swift	Migratory	Marine/Migratory	The Fork-tailed Swift is almost exclusively aerial and is not known to breed in Australia. They are seen in inland plains but sometimes above foothills or in coastal areas. They often occur over cliffs and beaches and also over islands and sometimes well out to sea. They also occur over settled areas, including towns, urban areas and cities. <i>Apus pacificus</i> subsp. <i>pacificus</i> is the only subspecies to migrate to Australia.	Highly Unlikely – may fly overhead but unlikely to land
<i>Arenaria interpres</i>	Ruddy Turnstone	Migratory	Vulnerable/ Marine/ Migratory	The Ruddy Turnstone is mainly found on coastal regions with exposed rock coast lines or coral reefs. It also lives near platforms and shelves, often with shallow tidal pools and rocky, shingle or gravel beaches.	Highly Unlikely – not suitable habitat
<i>Calidris acuminata</i>	Sharp-tailed Sandpiper	Migratory	Vulnerable/ Marine/ Migratory	The Sharp-tailed Sandpiper prefers muddy edges of shallow fresh or brackish wetlands, with inundated or emergent sedges, grass, saltmarsh or other low vegetation.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Calidris alba</i>	Sanderling	Migratory	Marine/ Migratory	Sanderlings occur on most of the coast from Eyre to Derby, and also around Wyndham. They are more often recorded on the south and southwest coasts, north to around southern Shark Bay, with more sparsely scattered records further north in Gascoyne and Pilbara Regions and the Kimberley Division.	Highly Unlikely – not suitable habitat
<i>Calidris melanotos</i>	Pectoral Sandpiper	Migratory	Marine/ Migratory	The Pectoral Sandpiper prefers shallow fresh to saline wetlands and is found at coastal lagoons, estuaries, bays, swamps, lakes, inundated grasslands, saltmarshes, river pools, creeks, floodplains and artificial wetlands.	Highly Unlikely – not suitable habitat
<i>Calidris pugnax</i> (Listed as <i>Philomachus pugnax</i> under the EPBC Act)	Ruff	Migratory	Marine/ Migratory	The Ruff is found on generally fresh, brackish or saline wetlands with exposed mudflats at the edges and is found in terrestrial wetlands including lakes, swamps, pools, lagoons, tidal rivers, swampy fields and floodlands.	Highly Unlikely – the site is too disturbed
<i>Calidris ruficollis</i>	Red-necked Stint	Migratory	Marine/ Migratory	The Red-necked Stint is mostly found in coastal areas, including in sheltered inlets, bays, lagoons and estuaries with intertidal mudflats, often near spits, islets and banks and, sometimes, on protected sandy or coralline shores.	Highly Unlikely – not coastal habitat
<i>Calidris subminuta</i>	Long-toed Stint	Migratory	Marine/ Migratory	The Long-toed Stint prefers shallow freshwater or brackish wetlands including lakes, swamps, river floodplains, streams, lagoons and sewage ponds. The species is also fond of areas of muddy shoreline, growths of short grass, weeds, sedges, low or floating aquatic vegetation, reeds, rushes and occasionally stunted samphire.	Highly Unlikely – the site is too disturbed
<i>Charadrius dubius</i>	Little Ringed Plover	Migratory	Marine/ Migratory	The Little-ringed Plover prefers bare or sparsely vegetated sandy and pebbly shores of shallow standing freshwater pools, lakes or slow-flowing rivers (Birdlife Australia, 2014a).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Chlidonias leucopterus</i>	White-winged Black tern, White-winged Tern	Migratory	Marine/ Migratory	In Australia, the White-winged Black tern mostly inhabits fresh, brackish or saline, and coastal or subcoastal wetlands.	Highly Unlikely – the site is too disturbed
<i>Glareola maldivarum</i>	Oriental Pratincole	Migratory	Marine/ Migratory	The Oriental Pratincole usually inhabits open plains, floodplains or short grassland (including farmland or airstrips), often with extensive bare areas. They often occur near terrestrial wetlands, such as billabongs, lakes or creeks, and artificial wetlands such as reservoirs, saltworks and sewage farms, especially around the margins. The species also occurs along the coast, inhabiting beaches, mudflats and islands, or around coastal lagoons.	Highly Unlikely – not suitable habitat
<i>Hydroprogne caspia</i> (Listed as Marine under the EPBC Act as <i>Sterna caspia</i>)	Caspian Tern	Migratory	Marine/ Migratory	The Caspian Tern is mostly found in sheltered coastal embayments (harbours, lagoons, inlets, bays, estuaries and river deltas) and those with sandy or muddy margins are preferred.	Highly Unlikely – not suitable habitat
<i>Limosa lapponica</i>	Bar-tailed Godwit	Migratory	Marine/ Migratory	The Bar-tailed Godwit is found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays.	Highly Unlikely – not coastal habitat
<i>Limosa limosa</i>	Black-tailed Godwit	Migratory	Endangered /Migratory/ Marine	The Black-tailed Godwit is found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays. It is found often around beds of seagrass and, sometimes, in nearby saltmarsh.	Highly Unlikely – not coastal habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Motacilla cinerea</i>	Grey Wagtail	Migratory	Migratory/ Marine	The Grey Wagtail is mostly recorded in coastal areas in Western Australia (ALA, 2015) however is widespread. There is non-breeding habitat only in Australia and the species has a strong association with water, particularly rocky substrates along water courses but also lakes and marshes.	Highly Unlikely – not coastal habitat
<i>Pandion haliaetus</i>	Osprey	Migratory	Marine/ Migratory	Ospreys occur in littoral and coastal habitats and terrestrial wetlands of tropical and temperate Australia and offshore islands. They feed on fish, especially mullet where available, and rarely take molluscs, crustaceans, insects, reptiles, birds and mammals.	Highly Unlikely – not coastal habitat
<i>Plegadis falcinellus</i>	Glossy Ibis	Migratory	Marine/Mig ratory	The Glossy Ibis is the smallest ibis known in Australia. This species preferred habitat for foraging and breeding are fresh water marshes at the edges of lakes and rivers, lagoons, flood-plains, wet meadows, swamps, reservoirs, sewage ponds, rice-fields and cultivated areas under irrigation but do not breed in South-west Western Australia.	Highly Unlikely – the site is too disturbed
<i>Pluvialis fulva</i>	Pacific Golden Plover	Migratory	Marine/ Migratory	Pacific Golden Plovers usually occur on beaches, mudflats and sandflats (sometimes in vegetation such as mangroves, low saltmarsh such as <i>Sarcocornia</i> , or beds of seagrass) in sheltered areas including harbours, estuaries and lagoons, and also in evaporation ponds in salt works.	Highly Unlikely – not suitable habitat
<i>Pluvialis squatarola</i>	Grey Plover	Migratory	Vulnerable/ Marine/ Migratory	Grey Plovers occur almost entirely in coastal areas, where they usually inhabit sheltered embayments, estuaries and lagoons with mudflats and sandflats, and occasionally on rocky coasts with wave-cut platforms or reef-flats, or on reefs within muddy lagoons.	Highly Unlikely – not coastal habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Tringa glareola</i>	Wood Sandpiper	Migratory	Marine/ Migratory	The Wood Sandpiper uses well-vegetated, shallow, freshwater wetlands, such as swamps, billabongs, lakes, pools and waterholes. They are typically associated with emergent, aquatic plants or grass, and dominated by taller fringing vegetation, such as dense stands of rushes or reeds, shrubs, or dead or live trees, especially <i>Melaleuca</i> and River Red Gums <i>Eucalyptus camaldulensis</i> and often with fallen timber.	Highly Unlikely – not suitable habitat
<i>Tringa nebularia</i>	Common Greenshank	Migratory	Endangered /Marine/ Migratory	The Common Greenshank is a wader and does not breed in Australia. This species can be found in many types of wetlands and has the widest distribution of any shorebird in Australia. This species typically feeds on molluscs, crustaceans, insects, and occasionally fish and frogs.	Highly Unlikely – not suitable habitat
<i>Tringa stagnatilis</i>	Marsh Sandpiper, Little Greenshank	Migratory	Marine/ Migratory	The Marsh Sandpiper lives in permanent or ephemeral wetlands of varying salinity, including swamps, lagoons, billabongs, salt pans, saltmarshes, estuaries, pools on inundated floodplains, and intertidal mudflats and also regularly at sewage farms and saltworks.	Highly Unlikely – the site is too disturbed
<i>Xenus cinereus</i>	Terek Sandpiper	Migratory	Vulnerable/ Marine/ Migratory	The Terek Sandpiper mostly forages in the open, on soft wet intertidal mudflats or in sheltered estuaries, embayments, harbours or lagoons. The species has also been recorded on islets, mudbanks, sandbanks and spits, and near mangroves and occasionally in samphire (<i>Halosarcia</i> spp.).	Highly Unlikely – not suitable habitat
<i>Phascogale tapoatafa wambenger</i>	South-western Brush-tailed Phascogale, Wambenger	Conservation Dependent		Southern Brush-tailed Phascogales are arboreal marsupials which require tree hollows in suitable woodland or forest and rely on abundant invertebrate prey to sustain populations (Pescott, 2012).	Highly Unlikely – not suitable habitat
<i>Falco peregrinus</i>	Peregrine Falcon	Other Specially Protected Species	Marine/ Migratory	The Peregrine Falcon is found in a variety of habitats but nests on high cliff ledges or artificial structures. It feeds primarily on small-medium sized birds, but occasionally taking insects, such as moths, cicadas and locusts (Birdlife Australia, 2012).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Ardea alba</i>	Great Egret, White Egret		Marine	The Eastern Great Egret has been reported in a wide range of wetland habitats and usually frequents shallow waters. This species feeds on fish, insects, crustaceans, molluscs, frogs, lizards, snakes and small birds and mammals.	Highly Unlikely – not suitable habitat
<i>Bubulcus ibis</i>	Cattle Egret		Marine	The Cattle Egret occurs in tropical and temperate grasslands, wooded lands and terrestrial wetlands with breeding in Western Australia recorded in the far north in Wyndham in colonies in wooded swamps such as mangrove forest. This species forages away from water on low lying grasslands, improved pastures and croplands generally in areas that have livestock eating insects, frog, lizards and small mammals.	Highly Unlikely – the site is too disturbed
<i>Charadrius ruficapillus</i>	Red-capped Plover		Marine	The Red-capped Plover is found in wetlands, especially in arid areas, and prefers saline and brackish waters (Birdlife Australia, 2014b).	Highly Unlikely – the site is too disturbed
<i>Egretta sacra</i>	Eastern Reef Egret, Eastern Reef Heron		Marine	The Eastern Reef Egret nests in trees in island woodlands, or on the ground under shrubs or rock ledges and feeds on small fish, crustaceans and insects (Birdlife Australia, 2014c).	Highly Unlikely – the site is too disturbed
<i>Haliaeetus leucogaster</i>	White-bellied Sea-eagle		Marine	The White-bellied Sea-Eagle is found in coastal habitats with large areas of open water, especially those close to the sea-shore. This species feeds opportunistically on a variety of fish, birds, reptiles, mammals and crustaceans, and on carrion and offal.	Highly Unlikely – not coastal habitat
<i>Himantopus himantopus</i>	Black-winged Stilt		Marine	The Black-winged Stilt is found near coastal lagoons and shallow freshwater or brackish pools with extensive areas of mudflats, salt meadows, saltpans, coastal marshes and swamps (Birdlife International, 2014a).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Larus pacificus</i>	Pacific Gull		Marine	Australia's largest gull, the Pacific Gull occurs only along the coasts of southern Australia. Despite its name, the species is seldom seen on the Pacific coastline, and is far more common on the beaches bordering the Southern and Indian Oceans. They breed in colonies on islands, extending from the Furneaux Group in eastern Bass Strait, west to Shark Bay. Their nests may consist of either a scrape in the ground, sometimes lined with gravel, or a neat nest made from grass, sticks or seaweed (Birdlife Australia, 2015b).	Highly Unlikely – not suitable habitat
<i>Merops ornatus</i>	Rainbow Bee-eater		Marine	Populations of the Rainbow Bee-eater that breed in northern Australia are considered to be resident, and in many northern localities the Rainbow Bee-eater is present throughout the year. The Rainbow Bee-eater nests in a burrow dug in the ground. It is found across the better-watered parts of WA including islands preferring lightly wooded, sandy country near water.	Possible – may be an intermittent visitor to the site
<i>Recurvirostra novaehollandiae</i>	Red-necked Avocet		Marine/ Migratory	The Red-necked Avocet occurs in wetland areas including bogs, marshes, swamps and permanent saline, brackish or alkaline lakes generally preferring saline habitats (BirdsSA, 2025).	Highly Unlikely – not saline habitat
<i>Throscodectes xiphos</i>	Styler Bush Cricket	Priority 1		The Styler Bush Cricket is known only from its type locality in Jandakot where it was originally collected in the axil leaf bases of grass trees (<i>Xanthorrhoea preissii</i>) (Invertebrate Solutions, 2019).	Possible – is recorded from the near vicinity of the site but host plants occur sparsely on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Euoplos inornatus</i>	Inornate Trapdoor Spider (northern Jarrah Forest)	Priority 3		The Inornate Trapdoor Spider is recorded from clay creek banks (ALA, 2019).	Highly Unlikely – not suitable clay habitat
<i>Idiosoma sigillatum</i>	Swan Coastal Plain shield-backed trapdoor spider	Priority 3		The Swan Coastal Plain Shield-backed Trapdoor Spider arranges fallen twigs from the sheoak tree around the rim of its burrow entrance, enabling it to feel the vibrations of unsuspecting prey that wander by (Curtin, 2018).	Unlikely – not typical habitat
<i>Leioproctus contrarius</i>	A Short-tongued Bee	Priority 3		<i>Leioproctus contrarius</i> is apparently dependent on flowers of Goodeniaceae and possibly <i>Lechenaultia stenosepala</i> . It was found at Forrestdale Lake in 1952 and 1954 (PES, 2011).	Unlikely – not typical habitat
<i>Lerista lineata</i>	Perth Slider, Lined Skink	Priority 3		The Lined Skink is a burrowing species that occurs in pale sandy soils with coastal heath and shrubland areas in isolated populations in the south-west and mid-west coast of Western Australia. It feeds on termites and other small insects (AROD, 2014).	Possible – habitat may occur on the site
<i>Neelaps calonotos</i>	Black-striped Snake	Priority 3		The Black-striped snake has a limited distribution, inhabiting areas with sandy soils that support heathlands and Banksia/Eucalypt Woodlands (Nevill, 2005) on the Swan Coastal Plain generally in the lower west coast from Lancelin to Mandurah (Storr <i>et al</i> , 1999).	Unlikely – not typical habitat
<i>Ninox connivens connivens</i>	Barking Owl (southwest pop)	Priority 3		Barking Owls are usually found in habitats that are dominated by eucalyptus species, particularly red gum, and, in the tropics, paperbark species. They prefer woodlands and forests with a high density of large trees and particularly sites with hollows that are used by the owls as well as their prey. Roost sites are often located near waterways or wetlands (Birds in Backyards, 2014a).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Tyto novaehollandiae novaehollandiae</i>	Masked Owl (Southern)	Priority 3		The Masked Owl inhabits forests, woodlands, timbered waterways and open country on the fringe of these areas with tall trees with suitable hollows for nesting and roosting and adjacent areas for foraging (Birds in Backyards, 2014b).	Highly Unlikely – not suitable habitat
<i>Botaurus dubius</i>	Australian Little Bittern	Priority 4		The Australian Little Bittern is mainly found in freshwater wetlands, where they inhabit dense emergent vegetation of reeds and sedges, and inundated shrub thickets. They are also occasionally found in brackish and saline wetlands such as mangrove swamps, Juncus-dominated salt marsh and the wooded margins of coastal lagoons (Naturewatch NZ, 2014).	Unlikely – not typical habitat
<i>Elanus scriptus</i>	Letter-winged Kite	Priority 4		The Letter-winged Kite is found in open or sparsely wooded country (Johnstone and Storr, 1998).	Highly Unlikely – not suitable habitat
<i>Falsistrellus mackenziei</i>	Western False Pipistrelle	Priority 4		The Western False Pipistrelle occurs in high rainfall Jarrah, Karri and Tuart forests and coastal woodlands. They roost in hollows of trees, branches and stumps, and are insectivorous, feeding at night between the canopy and understorey of tall forest trees (Environment Australia, 1999).	Highly Unlikely – not suitable habitat
<i>Hydromys chrysogaster</i>	Water-rat, Rakali	Priority 4		The Water Rat generally prefers wetland habitats characterised by dense, low-lying vegetation (0–30 cm from ground), low-density canopy cover and shallow, narrow water bodies (Speldewinde et al., 2013).	Highly Unlikely – not suitable habitat
<i>Isodon fusciventer</i>	Southern Brown Bandicoot, Quenda	Priority 4		Southern Brown Bandicoots are small grey marsupials that prefer dense scrub (up to one metre high). Their diet includes invertebrates (including earthworms, adult beetles and their larvae), underground fungi, subterranean plant material, and very occasionally, small vertebrates (DEC, 2012a).	Possible – habitat may occur on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Notamacropus eugenii derbianus</i>	Tammar Wallaby	Priority 4		The Tammar Wallaby prefers dense, low vegetation for daytime shelter and open grassy areas for feeding. This species inhabits coastal scrub, heath, dry sclerophyll forest and thickets in mallee and woodland (DEC, 2012b).	Highly Unlikely – not suitable habitat
<i>Notamacropus irma</i>	Western Brush Wallaby	Priority 4		The Western Brush Wallaby is a medium sized marsupial and its optimum habitat is open forest or woodland, particularly favouring open, seasonally wet flats with low grasses and open scrubby thickets (DEC, 2012c).	Highly Unlikely – not suitable habitat
<i>Oxyura australis</i>	Blue-billed Duck	Priority 4		The Blue-billed Duck is found on terrestrial wetlands in temperate regions, that are freshwater to saline, and may be natural or artificial. It nests in rushes, sedges, Lignum Muehlenbeckia cunninghamii and paperbark Melaleuca (Birdlife International, 2015). The species is almost completely aquatic, and is seldom seen on land. Non-breeding flocks, often with several hundred individuals, congregate on large, deep open freshwater dams and lakes in autumn. The daylight hours are spent alone in small concealed bays within vegetation or communally in large exposed rafts far from the shore (Birds in Backyards, 2015).	Highly Unlikely – not suitable habitat
<i>Synemon gratiosa</i>	Graceful Sun-moth	Priority 4		The Graceful Sun-moth is a diurnal moth with dull coloured brown to black forewings and brightly coloured orange hind wings. The larvae burrow into the rhizomes of Lomandra maritima and Lomandra hermaphrodita exclusively and therefore require the presence of one or both of these species to be present in an area (Bishop et al., 2011).	Highly Unlikely – no host plants occur on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
<i>Charadrius cucullatus</i> (Listed under the EPBC Act as <i>Thinornis rubricollis</i>)	Hooded Plover	Priority 4	Marine	The Hooded Plover primarily inhabits sandy, ocean beaches, with the highest densities on beaches with large amounts of beach-washed seaweed that are backed by extensive open dunes. In Western Australia the species also inhabits inland and coastal salt lakes (Birdlife International 2014b).	Highly Unlikely – not suitable habitat

* Sourced from the SPRAT Database (DoEE, 2018) unless otherwise indicated

4.4 Impact on Conservation Significant Species

The site has very limited habitat for Baudin's Black Cockatoo, Carnaby's Black Cockatoo and Forest Red-tailed Black-Cockatoo. There is very limited roosting or breeding habitat or potential breeding habitat on the site.

The Tuart tree has two trunk diameters of 129 and 107cm, which means it classifies as a potential breeding habitat tree. The tree did not have any hollows and is therefore not currently used by Black Cockatoos for breeding.

One SRE species Stylet Bush Cricket, listed as Priority 1, may be present on the site, but clearing is not likely to have a significant impact. Two Priority species that may have habitat on the site are Perth Slider and Southern Brown Bandicoot however the numbers of these species is expected to be very low and risks to individuals can be managed by a trapping and relocation program prior to clearing.

The Marine species Rainbow Bee-eater may also be an intermittent visitor to the site but is unlikely to rely on the site for survival and would not be impacted by development.

4.5 Pest Fauna

There are several pest species that are likely to be present on the site outlined in Table 8.

Table 8: Pest Species Likely to Occur on the Site

Taxa	Family	Species Name	Common Name
Mammalia	Canidae	Vulpes vulpes	Red fox
	Felidae	Felis catus	Feral cat
	Leporidae	Oryctolagus cuniculus	European Rabbit
	Muridae	Mus musculus	House Mouse
		Rattus rattus	Black Rat

4.6 Biodiversity Value

The EPA's (2002) *Terrestrial Biological Surveys as an Element of Biodiversity Protection Position Statement No. 3* indicated an ecological assessment of a site must consider its biodiversity value at the genetic, species and ecosystem levels; and its ecological functional value at the ecosystem level. The vegetation on the site is fragmented with little to no ecological linkage and is disturbed, with the likely presence of feral species such as foxes, cats and rabbits which would have highly modified the fauna assemblage from pre-European settlement.

5 SUMMARY

The flora, vegetation and fauna survey of Lots 24 and 25 Cutler Road, Jandakot resulted in the following findings:

- A total of 68 species were recorded during the flora survey consisting of 38 native species and 30 introduced species (44.1%);
- None of the species is a Threatened or Priority species;
- Six vegetation types were described and mapped on the site;
- The condition of the vegetation on the site was mostly Degraded and Completely Degraded with a high coverage of invasive weeds;
- The vegetation belongs to the Bassendean Complex Central and South vegetation complex and approximately 26.9% of the pre-European extent of the Bassendean Complex-Central and South remains on the Swan Coastal Plain. The amount remaining is above the EPA's target for retaining at least 10% of each vegetation complex;
- The vegetation is not representative of a Threatened or Priority Ecological Community;
- The site contains very limited foraging habitat for three species of Black Cockatoos:
 - Baudin's Black Cockatoo (*Zanda baudinii*), Endangered;
 - Carnaby's Black Cockatoo (*Zanda latirostris*), Endangered; and
 - Forest Red-tailed Black-Cockatoo (*Calyptorhynchus banksii naso*), Vulnerable.

Clearing the vegetation would not have a significant impact on Black Cockatoo species due to the low amount of foraging habitat and only one Tuart tree that has potential breeding habitat value;

- One SRE species Stylet Bush Cricket, listed as Priority 1, has some habitat site, however the habitat is sparse and surrounded by weeds so is not likely to require a targeted survey.
- Two Priority species that may have habitat on the site are Perth Slider and Southern Brown Bandicoot however the numbers of these species is expected to be very low and risks to individual managed by a trapping and relocation program prior to clearing.
- The Marine species Rainbow Bee-eater, may also be an intermittent visitor to the site but is unlikely to rely on the site for survival and would not be impacted by the proposed subdivision.

1114409	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Perennial herb; flowers dull yellow.	On sandy flat.	In low heath - sedgeland.	24/11/1980
2170175	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Multi-stemmed herb to 60 cm. Flowers with long pedicels in paniculate inflorescences.	Moist sandy flat.	On edge of regenerating Regelia ciliata heath B.	11/12/1990
2161613	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Glabrous herb to 50 cm high.	Low lying grey sand. Along edge of tracks.	Low scrub B and Dense Low Heath C with scattered Melaleuca preissiana. In cleared or open patches amongst heath.	18/12/1990
2521296	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Slender erect multi-stemmed shrub to 40 cm. Flowers orange-yellow, in full flower.	Winter wet flats, peaty sand over clay.	Hypocalymma angustifolium low heath.	21/02/1992
5678749	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Open spreading shrub 60 cm high x 60 cm wide. Flowers yellow. Plant leafless at flowering.	Coastal plain (winter damp). Bare white sand.	Low Heath C (Muir, 77). Hypocalymma angustifolium, Euchilopsis linearis, Dasypogon bromeliifolius.	21/03/1999
2170183	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Perennial herb with terete to linear leaves. Inflorescences paniculate.	Flat, grey-brown clayey sand.	Mixed low heath C with emergent Melaleuca preissiana, with Pericalymma ellipticum, Adenanthos obovatus and Hypocalymma angustifolium.	18/12/1990
2170159	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Herb to 60 cm high. Usually with c. 6 flowering spikes but as many as 15 counted.	Grey sand, low lying.	Regenerating heath with scattered Melaleuca preissiana with Nuytsia floribunda.	18/12/1990
2170167	44444	Tripterococcus sp. Brachylobus (A.S. George 14234)	4	Erect perennial herb, glabrous. Leaves scattered. Flowers pedicellate, in branched inflorescences.	Grey sand, flat.	Melaleuca preissiana open low woodland A with Adenanthos obovata, Pericalymma ellipticum, Hypocalymma angustifolium and Hakea varia.	18/12/1990
7410670	14714	Verticordia lindleyi subsp. lindleyi	4		Road verge.	Woodland of Corymbia calophylla over open low heath to low shrubland of mixed species including Xanthorrhoea preissii.	8/01/2003
2166690	14714	Verticordia lindleyi subsp. lindleyi	4	Erect dwarf shrub with pink/purple flowers.	White grey loamy sand on seasonally wet flat ground.	In heath with Pericalymma ellipticum, Banksia telmatiaea, sedges.	11/05/1990
2166704	14714	Verticordia lindleyi subsp. lindleyi	4	Erect dwarf shrub with pink/purple flowers.	Grey sand, flat terrain.	Heathland with Pericalymma ellipticum, Beaufortia squarrosa, Dasypogon sp., Regelia inops, Melaleuca preissiana.	11/05/1990
4055500	14714	Verticordia lindleyi subsp. lindleyi	4	Erect shrub to 50 cm. Flowers pink, in flower.	Winter wet flats, grey sand over clay.	Banksia / Calothamnus low open heath.	30/11/1991
8016232	14714	Verticordia lindleyi subsp. lindleyi	4	Perennial shrub 0.5 m high.	Plain. Grey sand. Poor drainage.	Melaleuca raphiophylla, Mel. preissiana.	20/09/2005
8642168	14714	Verticordia lindleyi subsp. lindleyi	4	Shrub to 0.75 m.		Melaleuca preissiana and Nuytsia floribunda open woodland over Kunzea glabrescens tall shrubland over Astartea scoparia, Regelia ciliata and Jacksonia gracillima open heath.	24/11/2011

Department of Climate Change, Energy,
the Environment and Water

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 25-Sep-2025

[Summary](#)

[Details](#)

[Matters of NES](#)

[Other Matters Protected by the EPBC Act](#)

[Extra Information](#)

[Caveat](#)

[Acknowledgements](#)

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	1
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	4
Listed Threatened Species:	31
Listed Migratory Species:	19

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	41
Commonwealth Heritage Places:	None
Listed Marine Species:	26
Whales and Other Cetaceans:	None
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	6
Regional Forest Agreements:	None
Nationally Important Wetlands:	2
EPBC Act Referrals:	56
Key Ecological Features (Marine):	None
Biologically Important Areas:	None
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Wetlands of International Importance (Ramsar Wetlands)		[Resource Information]
Ramsar Site Name	Proximity	Buffer Status
Forrestdale and thomsons lakes	Within Ramsar site	In feature area

Listed Threatened Ecological Communities	[Resource Information]
For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps. Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.	

Community Name	Threatened Category	Presence Text	Buffer Status
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area	In feature area
Empodisma peatlands of southwestern Australia	Endangered	Community may occur within area	In buffer area only
Honeymyrtle shrubland on limestone ridges of the Swan Coastal Plain Bioregion	Critically Endangered	Community may occur within area	In buffer area only
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area	In feature area

Listed Threatened Species			[<u>Resource Information</u>]
Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.			
Scientific Name	Threatened Category	Presence Text	Buffer Status
BIRD			
Botaurus poiciloptilus Australasian Bittern [1001]	Endangered	Species or species habitat known to occur within area	In feature area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area	In feature area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Calyptorhynchus banksii naso Forest Red-tailed Black-Cockatoo, Karrak [67034]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat may occur within area	In feature area
Leipoa ocellata Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Limosa limosa Black-tailed Godwit [845]	Endangered	Species or species habitat known to occur within area	In buffer area only
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area	In feature area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Species or species habitat known to occur within area	In feature area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area	In feature area
Zanda baudinii listed as Calyptorhynchus baudinii Baudin's Cockatoo, Baudin's Black-Cockatoo, Long-billed Black-cockatoo [87736]	Endangered	Roosting known to occur within area	In buffer area only
Zanda latirostris listed as Calyptorhynchus latirostris Carnaby's Black Cockatoo, Short-billed Black-cockatoo [87737]	Endangered	Breeding known to occur within area	In feature area
INSECT			

Scientific Name	Threatened Category	Presence Text	Buffer Status
Leioproctus douglasiellus a short-tongued bee [66756]	Critically Endangered	Species or species habitat may occur within area	In buffer area only
Neopasiphae simplicior A native bee [66821]	Critically Endangered	Species or species habitat likely to occur within area	In buffer area only
MAMMAL			
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Pseudocheirus occidentalis Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
PLANT			
Andersonia gracilis Slender Andersonia [14470]	Endangered	Species or species habitat likely to occur within area	In feature area
Banksia mimica Summer Honey-pot [82765]	Endangered	Species or species habitat may occur within area	In feature area
Caladenia huegelii King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat known to occur within area	In feature area
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat known to occur within area	In feature area
Diuris micrantha Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat known to occur within area	In feature area
Diuris purdiei Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat known to occur within area	In feature area
Drakaea elastica Glossy-leafed Hammer Orchid, Glossy-leafed Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat known to occur within area	In feature area
Eleocharis keigheryi Keighery's Eleocharis [64893]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Lepidosperma rostratum Beaked Lepidosperma [14152]	Endangered	Species or species habitat may occur within area	In buffer area only
Morelotia australiensis listed as Tetraria australiensis Southern Tetraria [92784]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Synaphea sp. Fairbridge Farm (D.Papenfus 696) Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area	In buffer area only

SHARK			
Pristis pristis Largetooth Sawfish, Freshwater Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Endangered	Species or species habitat may occur within area	In feature area

Listed Migratory Species	[Resource Information]		
Scientific Name	Threatened Category	Presence Text	Buffer Status
Migratory Marine Birds			
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area	In feature area

Migratory Marine Species			
Pristis pristis Largetooth Sawfish, Freshwater Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Endangered	Species or species habitat may occur within area	In feature area

Migratory Terrestrial Species			
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area	In feature area

Migratory Wetlands Species			
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area	In feature area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat known to occur within area	In feature area
Calidris pugnax as Philomachus pugnax Ruff [91256]		Species or species habitat known to occur within area	In buffer area only
Calidris ruficollis Red-necked Stint [860]		Species or species habitat known to occur within area	In buffer area only
Calidris subminuta Long-toed Stint [861]		Species or species habitat known to occur within area	In buffer area only
Charadrius dubius Little Ringed Plover [896]		Species or species habitat known to occur within area	In buffer area only
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat may occur within area	In feature area
Limosa limosa Black-tailed Godwit [845]	Endangered	Species or species habitat known to occur within area	In buffer area only
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Pandion haliaetus Osprey [952]	Endangered	Species or species habitat known to occur within area	In feature area
Tringa glareola Wood Sandpiper [829]		Species or species habitat known to occur within area	In buffer area only
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area	In feature area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Species or species habitat known to occur within area	In buffer area only

Other Matters Protected by the EPBC Act

Commonwealth Lands

[[Resource Information](#)]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Land Name	State	Buffer Status
Unknown		
Commonwealth Land - [50731]	WA	In buffer area only

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

APPENDIX 5

Conservation Codes

Conservation Codes for Western Australian Flora and Fauna

Threatened, Extinct and Specially Protected fauna or flora are species which have been adequately searched for and are deemed to be, in the wild, threatened, extinct or in need of special protection, and have been gazetted as such.

The lists of Threatened, Extinct and Specially Protected species are listed under Part 2 of the Biodiversity Conservation Act 2016.

Categories of Threatened, Extinct and Specially Protected fauna and flora are:

T Threatened species

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the *Biodiversity Conservation Act 2016* (BC Act).

Threatened fauna is the species of fauna that are listed as critically endangered, endangered or vulnerable threatened species.

Threatened flora is the species of flora that are listed as critically endangered, endangered or vulnerable threatened species.

The assessment of the conservation status of threatened species is in accordance with the BC Act listing criteria and the requirements of Ministerial Guideline (Number 1) and Ministerial Guideline (Number 2) that adopts the use of the International Union for Conservation of Nature (IUCN) Red List of Threatened Species Categories and Criteria 4, and is based on the national distribution of the species.

CR Critically endangered species

Threatened species considered to be *“facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines”*.

Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines.

EN Endangered species

Threatened species considered to be *“facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines”*.

Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines.

VU Vulnerable species

Threatened species considered to be *“facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines”*.

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines.

Extinct Species

EX Presumed extinct species

Species where “*there is no reasonable doubt that the last member of the species has died*”, and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

EW Extinct in the wild species

Species that “*is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form*”, and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

Specially protected species

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

MI Migratory species

Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the Convention on the Conservation of Migratory Species of Wild Animals (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

CD Species of special conservation interest (conservation dependent fauna)

Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Currently only fauna are listed as species of special conservation interest.

OS Other specially protected species

Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

Currently only fauna are listed as species otherwise in need of special protection.

P Priority species

Priority is not a listing category under the BC Act.

All fauna and flora are protected in WA following the provisions in Part 10 of the BC Act. The protection applies even when a species is not listed as threatened or specially protected, and regardless of land tenure (State managed land (Crown land), private land, or Commonwealth land).

Species that may possibly be threatened species that do not meet the criteria for listing under the BC Act because of insufficient survey or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of prioritisation for survey and evaluation of conservation status so that consideration can be given to potential listing as threatened.

Species that are adequately known, meet criteria for near threatened, or are rare but not threatened, or that have been recently removed from the threatened species list or conservation dependent or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of priority status is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

Priority 1: Poorly-known species

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, for example, agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under immediate threat from known threatening processes. These species are in urgent need of further survey.

Priority 2: Poorly-known species

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, for example, national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under threat from known threatening processes. These species are in urgent need of further survey.

Priority 3: Poorly-known species

Species that are known from several locations and the species does not appear to be under imminent threat or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat.

Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. These species need further survey.

Priority 4: Rare, Near Threatened and other species in need of monitoring

- (a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.
- (b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as a conservation dependent specially protected species.
- (c) Species that have been removed from the list of threatened species or lists of conservation dependent or other specially protected species, during the past five years for reasons other than taxonomy.
- (d) Other species in need of monitoring.

Western Australian Ecological Communities

Threatened Ecological Communities

The BC Act provides for the statutory listing of threatened ecological communities (TECs) by the Minister.

Presumed Totally Destroyed (PD)

An ecological community that has been adequately searched for but for which no representative occurrences have been located. The community has been found to be totally

destroyed or so extensively modified throughout its range that no occurrence of it is likely to recover its species composition and/or structure in the foreseeable future.

Critically Endangered (CR)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or that was originally of limited distribution and is facing severe modification or destruction throughout its range in the immediate future, or is already severely degraded throughout its range but capable of being substantially restored or rehabilitated.

Endangered (EN)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or was originally of limited distribution and is in danger of significant modification throughout its range or severe modification or destruction over most of its range in the near future.

Vulnerable (VU)

An ecological community that has been adequately surveyed and is found to be declining and/or has declined in distribution and/or condition and whose ultimate security has not yet been assured and/or a community that is still widespread but is believed likely to move into a category of higher threat in the near future if threatening processes continue or begin operating throughout its range.

Priority Ecological Communities

Possible threatened ecological communities that do not meet survey criteria or that are not adequately defined are added to the Priority Ecological Community List under priorities 1, 2 and 3. These three categories are ranked in order of priority for survey and/or definition of the community. Ecological communities that are adequately known, and are rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list, are placed in Priority 4. These ecological communities require regular monitoring. Conservation Dependent ecological communities are placed in Priority 5.

Priority One: Poorly-known ecological communities

Ecological communities that are known from very few occurrences with a very restricted distribution (generally ≤ 5 occurrences or a total area of $\leq 100\text{ha}$).

Occurrences are believed to be under threat either due to limited extent, or being on lands under immediate threat (e.g. within agricultural or pastoral lands, urban areas, active mineral leases) or for which current threats exist. May include communities with occurrences on protected lands. Communities may be included if they are comparatively well-known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under immediate threat from known threatening processes across their range.

Priority Two: Poorly-known ecological communities

Communities that are known from few occurrences with a restricted distribution (generally ≤ 10 occurrences or a total area of $\leq 200\text{ha}$). At least some occurrences are not believed to be under immediate threat (within approximately 10 years) of destruction or degradation. Communities may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under threat from known threatening processes.

Priority Three: Poorly known ecological communities

- (i) Communities that are known from several to many occurrences, a significant number or area of which are not under threat of habitat destruction or degradation or:
- (ii) communities known from a few widespread occurrences, which are either large or with significant remaining areas of habitat in which other occurrences may occur, much of it not under imminent threat (within approximately 10 years), or;
- (iii) munities made up of large, and/or widespread occurrences, that may or may not be represented in the reserve system, but are under threat of modification across much of their range from processes such as grazing by domestic and/or feral stock, inappropriate fire regimes, clearing, hydrological change etc.

Communities may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and/or are not well defined, and known threatening processes exist that could affect them.

Priority Four: Ecological communities that are adequately known, rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list. These communities require regular monitoring.

- (i) Rare. Ecological communities known from few occurrences that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These communities are usually represented on conservation lands.
- (ii) Near Threatened. Ecological communities that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for a higher threat category.
- (iii) Ecological communities that have been removed from the list of threatened communities during the past five years.

Priority Five: Conservation Dependent ecological communities

Ecological communities that are not threatened but are subject to a specific conservation program, the cessation of which would result in the community becoming threatened within five years.

Commonwealth of Australia Conservation Codes

Threatened Flora and Fauna

Threatened fauna and flora may be listed under Section 178 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) in any one of the following six categories:

Extinct

A native species is eligible to be included in the extinct category at a particular time if, at that time, there is no reasonable doubt that the last member of the species has died.

Extinct in the wild

A native species is eligible to be included in the extinct in the wild category at a particular time if, at that time:

- a) it is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; or
- b) it has not been recorded in its known and/or expected habitat, at appropriate seasons, anywhere in its past range, despite exhaustive surveys over a time frame appropriate to its life cycle and form.

Critically endangered

A taxon is Critically Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing an extremely high risk of extinction in the wild.

Endangered

A taxon is Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a very high risk of extinction in the wild.

Vulnerable

A taxon is Vulnerable when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a high risk of extinction in the wild.

Conservation dependent

A native species is eligible to be included in the conservation dependent category at a particular time if, at that time:

- a) the species is the focus of a specific conservation program the cessation of which would result in the species becoming vulnerable, endangered or critically endangered; or
- b) the following subparagraphs are satisfied:
 - i. the species is a species of fish;

- ii. the species is the focus of a plan of management that provides for management actions necessary to stop the decline of, and support the recovery of, the species so that its chances of long term survival in nature are maximised;
- iii. the plan of management is in force under a law of the Commonwealth or of a State or Territory;
- iv. cessation of the plan of management would adversely affect the conservation status of the species.

The EPBC Act does not provide for listing in a data deficient category. Where sufficient data (evidence) is unavailable to allow assessment by the Threatened Species Scientific Committee against the criteria for listing, the species are found to be ineligible. A recommendation is made to the Minister to not include the species in any category under the EPBC Act. For reasons of transparency and to inform future research, the Threatened Species Scientific Committee publishes the names of those species found to be data deficient. As data deficient is not a listing category under the EPBC Act, this has no statutory implications and the species is not considered to be listed under the EPBC Act.

Threatened Ecological Communities

Threatened Ecological communities under the EPBC Act are listed in three categories.

Critically endangered

If, at that time, an ecological community is facing an extremely high risk of extinction in the wild in the immediate future (indicative timeframe being the next 10 years).

Endangered

If, at that time, an ecological community is not critically endangered but is facing a very high risk of extinction in the wild in the near future (indicative timeframe being the next 20 years).

Vulnerable

If, at that time, an ecological community is not critically endangered or endangered, but is facing a high risk of extinction in the wild in the medium-term future (indicative timeframe being the next 50 years).

APPENDIX 6

Species List

SPECIES LIST – Lots 24 and 25 Cutler Road, Jandakot (* indicates non-native species)

MONOCOTYLEDONS

ANACARDIACEAE

Lyginia barbata

ARACEAE

**Zantedeschia aethiopica*

ASPARAGACEAE

**Asparagus asparagoides*

COLCHICACEAE

Burchardia congesta

CYPERACEAE

Lepidosperma pubisquameum

DASYPOGONACEAE

Dasypogon bromeliifolius

HAEMODORACEAE

Phlebocarya ciliata

HEMEROCALLIDACEAE

Chamaescilla corymbosa

IRIDACEAE

**Freesia alba x leichtlinii*

**Gladiolus caryophyllaceus*

**Romulea rosea*

**Watsonia meriana* var. *bulbillifera*

ORCHIDACEAE

Caladenia flava

Caladenia latifolia

Diuris corymbosa

POACEAE

**Avena fatua*

**Briza maxima*

**Bromus diandrus*

**Ehrharta calycina*

**Ehrharta longiflora*

**Lagurus ovatus*

RESTIONACEAE

Hypolaena exsulca

XANTHORRHOEACEAE

Xanthorrhoea brunonis

Xanthorrhoea preissii

DICOTYLEDONS

AIZOACEAE

**Carpobrotus edulis*

ANACARDIACEAE

**Schinus terebinthifolius*

ASTERACEAE

**Arctotheca calendula*

**Hypochaeris glabra*

Senecio condylus

**Sonchus oleraceus*

**Taraxacum officinale*

**Ursinia anthemoides*

BRASSICACEAE

Raphanus raphanistrum

CACTACEAE

**Opuntia stricta*

CASUARINACEAE

Allocasuarina fraseriana

CRASSULACEAE

Crassula colorata

Crassula exserta

DILLENIACEAE

Hibbertia racemosa

ERICACEAE

Conostephium pendulum

Styphelia conostephioides

EUPHORBIACEAE

- **Euphorbia peplus*
- **Euphorbia terracina*

FABACEAE

- **Acacia longifolia*
- Acacia pulchella*
- Bossiaea eriocarpa*
- Gastrolobium capitatum*
- **Lotus subbiflorus*
- **Pisum sativum*
- Pultenaea reticulata*

FUMARIACEAE

- **Fumaria capreolata*

GERANIACEAE

- **Pelargonium capitatum*

GOODENIACEAE

- Dampiera linearis*

LAURACEAE

- Cassytha glabella*

LORANTHACEAE

- Nuytsia floribunda*

MYRTACEAE

- Eucalyptus marginata*
- **Gaudia laevigatum*
- Hypocalymma angustifolium*
- Hypocalymma robustum*
- Melaleuca preissiana*

OLEACEAE

- **Olea europaea*

OXALIDACEAE

- Oxalis pes-caprae*

PRIMULACEAE

- **Lysimachia arvensis*

PROTEACEAE

- Adenanthos cygnorum*
- Adenanthos obovatus*
- Banksia attenuata*
- Banksia ilicifolium*
- Banksia menziesii*
- Petrophile linearis*
