### 5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only** if you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m<sup>2</sup>

1 acre = 0.4 hectares/4,000 m<sup>2</sup>

1 tree = 0.01 hectares/100 m<sup>2</sup>

Area of circle = 3.14 x radius<sup>2</sup>

Area of a rectangle = length x width

Area of a triangle = ½ length x perpendicular height

Footprint of clearing (hectares) (purpose permit only)	30.31 ha
Number of individual trees to be cleared	

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

### 5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>Trico Resources Pty Ltd has been granted development approval by the Western Australian Planning Commission (WAPC) for the extraction of gravel.</p> <p>The extraction of gravel within extraction area 1 necessitates the clearing of native vegetation.</p> <p>Trico Resources was granted a works approval for extractive industries in 2015. The works approval included a clearing permit for the clearing of 100 native trees. Since then, the environmental approval system of the State has changed and clearing permits can no longer be granted under a works approval.</p> <p>Due to delays with other required approvals, the works have not been able to be commenced, and the previously obtained works approval has now expired. The Department of Water and Environmental Regulation (DWER) has advised that Trico Resources will need to apply for a new clearing permit, separate from any works approvals.</p>
<p>Specify what the final land use will be after clearing</p>	<p>Gravel extraction mine.</p>

### 5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical clearing</p>
--	----------------------------

### 5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: March 2026 (once CPS is obtained)</p> <p>End date: March 2027</p>
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

<p>Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?</p>	<input type="checkbox"/> Yes – complete section below	
	<input type="checkbox"/> I have had a pre-application meeting with DWER/DEMIRS	
	Insert date of meeting and officer name(s):	
	<input type="checkbox"/> I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
Insert date of conversation and officer name(s):		
<input type="checkbox"/> I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.		
<input checked="" type="checkbox"/> No – proceed to next question.		

## Part 6 – Mitigation hierarchy

### 6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on	<p>The location of extraction area 1 avoids several larger patches of remnant native vegetation within the Site.</p> <p>Further, an avoidance area was implemented within the Disturbance Footprint of extraction area 1 to reduce impacts to high-quality foraging</p>

property)	<p>habitat for black cockatoo, mainly within a larger patch of remnant native vegetation.</p> <p>The avoidance area provides for the retention of the following values:</p> <ul style="list-style-type: none"> <li>• 0.92 ha of native vegetation.</li> <li>• 0.88 ha of foraging habitat for Carnaby's black cockatoo with a weighted average quality score of 'high' (9/10).</li> <li>• 0.92 ha of foraging habitat for Forest red-tailed black cockatoo with a weighted average quality score of 'high' (9/10).</li> <li>• The avoided foraging habitat includes 53 potential nesting trees with a DBH <math>\geq</math> 500 mm, none of which contain suitable hollows. These are comprised of: <ul style="list-style-type: none"> <li>○ 29 marri.</li> <li>○ 24 jarrah.</li> </ul> </li> </ul> <p>Please refer to the attached supporting documentation for further details and figures.</p>
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<p>Tree Protection Zones will be implemented where trees have been identified for retention in areas where adjacent vegetation requires to be cleared. This prevents damage to roots of retained trees.</p> <p>Trico Resources has further prepared a Master Management Plan, including a Rehabilitation and Vegetation Management Plan. This document is attached to the supporting report.</p> <p>The revegetation includes:</p> <ul style="list-style-type: none"> <li>• Revegetation of a total area of 4.52 ha at a density of one tree per 15 m<sup>2</sup>. This will result in a total of 3,013 trees being planted.</li> <li>• Rehabilitation and revegetation is undertaken in stages following cessation of excavation activities in each stage.</li> <li>• Weed monitoring and corrective control measures if weed species are found to inhibit the success of revegetation.</li> <li>• Monitoring of rehabilitation progress for three years following revegetation of each stage.</li> </ul>

If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

## Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

## Part 9 – Other approvals

### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
