5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares/4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares/100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	63 ha
Footprint of clearing (hectares) (purpose permit only)	63 ha of clearing within a 1314.96 ha footprint
Number of individual trees to be cleared	0

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>Clearing will be undertaken for the proposed Trident and K2 mining Projects located in the Shire of Meekatharra. Trident and K2 form part of the Marymia Group along the Plutonic Marymia belt. Clearing is required for the proposed mining infrastructure and deposit excavation.</p>
<p>Specify what the final land use will be after clearing</p>	<p>Mining</p>

5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical clearing/bulldozing with stripping and storing of vegetation and topsoil/subsoil for rehabilitation activities.</p>
--	---

5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: 01/05/2026</p> <p>End date: progressively over five to seven years from 2026</p>
--	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DMPE strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

<p>Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?</p>	<input type="checkbox"/> Yes – complete section below	
	<input type="checkbox"/> I have had a pre-application meeting with DWER/DMPE	
	<p>Insert date of meeting and officer name(s):</p>	
	<input type="checkbox"/> I have contacted DWER/DMPE in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
	<p>Insert date of conversation and officer name(s):</p>	

	<input type="checkbox"/> I have not had a pre-application meeting with DWER/DMPE. I understand that this may increase the likelihood of requests for further information and/or delays in assessment. <input checked="" type="checkbox"/> No – proceed to next question.

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DMPE will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DMPE as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	<p>Infrastructure has been designed to avoid priority flora species as far as practicable and where priority flora is within 50m of the disturbance boundary, the flora will be demarcated with a 10m buffer flagged around the species.as per the existing clearing permit for Trident (CPS 10355/1). Some priority species may be disturbed by the development of this proposal.</p> <p>Clearing will only be undertaken where necessary, and activities will be managed to avoid unnecessary disturbance to vegetation. Due to the historical disturbance from the project's previous operators, the existing disturbed areas (such as existing access and haul roads) will be used as far as possible, no disturbance outside of the approved purpose permit area will be undertaken.</p>
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<ul style="list-style-type: none"> - Hygiene inspections of vehicles prior to entering the project area, seasonal weed inspection and ongoing management during operations will be undertaken to prevent the spread of weeds. - Clearing will be progressive to support mining operations. - Rehabilitation will be undertaken progressively throughout the projects life of mine and monitored for erosion, sedimentation and vegetation regrowth success.

	<ul style="list-style-type: none"> - Dust suppression activities will be undertaken to reduce disturbance to vegetation. - Topsoil will be stored on several topsoil stockpiles located outside of drainage areas and adjacent to waste rock landforms. - Catalysts Ground Clearing Permit (GDP) will be implemented before any clearing is undertaken and clearing is to be recorded within a Clearing Tracker. - During rehabilitation, topsoil will be spread over the area and seeded with locally endemic species. Monitoring will be undertaken to ensure sustainable plant growth; intervention will occur where required.
