

## CLEARING PERMIT

*Granted under section 51E of the Environmental Protection Act 1986*

### PERMIT DETAILS

Area Permit Number: 1926/1  
File Number: DEC3576  
Duration of Permit: From 15 June 2008 to 15 June 2012

### PERMIT HOLDER

Durnbond Pty Ltd

### LAND ON WHICH CLEARING IS TO BE DONE

Lot 10177 on Plan 203442.  
Lot 13137 on Plan 181927.

### AUTHORISED ACTIVITY

Clearing of 1.0 hectare of native vegetation within the area hatched yellow on attached Plan 1926/1a and 0.5 hectare of native vegetation within the area hatched yellow on attached Plan 1926/1b.

### CONDITIONS

#### 1. Dieback and Weed control

- (a) When undertaking any clearing and *revegetation*, or other activity pursuant to this Permit the Permit Holder must take the following steps to minimise the risk of introduction and spread of *dieback*:
- (i) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
  - (ii) avoid the movement of soil in wet conditions;
  - (iii) ensure that no dieback-affected *mulches*, *fill* or other materials are brought into an area that is not affected by dieback; and
  - (iv) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.
- (b) When undertaking any clearing and *revegetation*, or other activity pursuant to this Permit the Permit Holder must take the following steps to minimise the risk of the introduction and spread of *weeds*:
- (i) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
  - (ii) ensure that no *weed*-affected *mulch* or *fill* are brought into the area to be cleared; and
  - (iii) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.

## 2. Revegetation

- (a) The Permit Holder shall retain the vegetative material and topsoil removed by clearing authorised under this Permit.
- (b) Within six months of the area no longer being required for the purpose of gravel and sand extraction the Permit Holder must *revegetate* the area permitted to be cleared on attached Plan CPS 1926/1a and CPS 1926/b by:
  - (i) Deliberately planting and/or seeding native vegetation that will result in a similar species composition, structure and density of native vegetation to pre-clearing vegetation types in that area;
  - (ii) Ensuring only local provenance seeds and propagating material from within 10km of the area cleared are used to *revegetate* the area;
  - (iii) Laying vegetative material and topsoil retained in accordance with condition 1(a) on the area.
- (c) Within one year of undertaking *revegetation* in accordance with condition 2(b), the Permit Holder must:
  - (i) Determine the species composition, structure and density of the area revegetated; and
  - (ii) Where, in the opinion of an *environmental specialist*, the composition structure and density determined under condition 2(c)(i) will not result in a similar species composition, structure and density to pre-clearing vegetation types in that area the Permit Holder must undertake additional planting or seeding of native vegetation in accordance with the requirements of condition 2(b)(i) and (ii).

## 3. Records to be kept

- (a) The Permit Holder must maintain the following records for activities done pursuant to this Permit in relation to the *revegetation* of areas pursuant to condition 2.
  - (i) The commencement date of *revegetation*;
  - (ii) The location of any area *revegetated* recorded using Geocentric Datum Australia 1994;
  - (iii) A description of the *revegetation* activities undertaken;
  - (iv) The size of the area *revegetated* (in hectares); and
  - (v) The species, structure and composition of *revegetation* measured.

## 4. Reporting

The Permit Holder must provide to the CEO, on or before 30 June of each year, a written report of records required under condition 3 and activities done by the Permit Holder under this Permit between 1 January and 31 December of the preceding year.

## 5. Definitions

The following meanings are given to terms used in this Permit:

*dieback* means the effect of *Phytophthora* species on native vegetation;

*environmental specialist* means a person who is engaged by the permit holder for the purpose of providing environmental advice, who holds a tertiary qualification in environmental science or equivalent, and has experience relevant to the type of environmental advice that an environmental specialist is required to provide under this Permit;

*fill* means material used to increase the ground level, or fill a hollow;

*mulch* means the use of organic matter, wood chips or rocks to slow the movement of water across the soil surface and to reduce evaporation;

*revegetate, revegetated and revegetation* means the re-establishment of a cover of native vegetation in an area such that the species composition, structure and density is similar to pre-clearing vegetation types in that area, and can involve regeneration, direct seeding and/or planting;

*weed* means a species listed in Appendix 3 of the "Environmental Weed Strategy" published by the Department of Conservation and Land Management (1999), and plants declared under section 37 of the Agricultural and Related Resources Protection Act 1976.
