

GOVERNMENT OF
WESTERN AUSTRALIA

CLEARING PERMIT

Granted under section 51E of the Environmental Protection Act 1986

Purpose permit number:	CPS 2404/1
Permit holder:	HBJ Minerals Pty Ltd
Purpose of clearing:	Mineral Exploration
Shire:	City of Kalgoorlie-Boulder
Duration of permit:	29 June 2008 – 29 June 2013

TABLE OF CONTENTS

1. LAND ON WHICH CLEARING IS TO BE DONE.....	2
2. AREA OF CLEARING.....	2
3. APPLICATION.....	2
4. COMPLIANCE WITH ASSESSMENT SEQUENCE AND MANAGEMENT PROCEDURES.....	2
5. AVOID, MINIMISE ETC CLEARING.....	2
6. FAUNA MANAGEMENT.....	2
7. REVEGETATION.....	3
8. WEED CONTROL.....	3
9. RECORDS MUST BE KEPT.....	3
10. REPORTING.....	4
DEFINITIONS.....	4

Purpose permit number:	CPS 2404/1
Permit holder:	HBJ Minerals Pty Ltd
Purpose of clearing:	Mineral Exploration
Shire:	City of Kalgoorlie-Boulder
Duration of permit:	29 June 2008 – 29 June 2013

The permit holder is authorised to clear native vegetation for the above stated purposes, subject to the conditions of this Permit.

PART I – CLEARING AUTHORISED

1. Land on which clearing is to be done

Lot 48 on Plan 226304
 Lot 50 on Plan 226299
 Lot 62 on Plan 101674

2. Area of clearing

The Permit holder must not clear more than 215 hectares within the area cross-hatched yellow on attached Plan 2404/1.

3. Application

This Permit allows the Permit holder to authorise persons, including employees, contractors and agents of the Permit holder, to clear native vegetation for the purposes of this Permit subject to compliance with the conditions of this Permit and approval from the Permit holder.

4. Compliance with Assessment Sequence and Management Procedures

Prior to clearing any native vegetation under conditions 1 and 2 of this Permit, the Permit holder must comply with the Assessment Sequence and the Management Procedures set out in Part II of this Permit.

PART II – ASSESSMENT SEQUENCE AND MANAGEMENT PROCEDURES

5. Avoid, minimise etc clearing

- (a) In determining the amount of native vegetation to be cleared for the purposes of mineral exploration the Permit holder must have regard to the following principles, set out in order of preference:
- (i) avoid the clearing of native vegetation;
 - (ii) minimise the amount of native vegetation to be cleared; and
 - (iii) reduce the impact of clearing on any environmental value.

6. Fauna Management

- (a) Prior to clearing, the site shall be walked, inspected and surveyed by a *fauna specialist* to identify the presence of Malleefowl (*Leipoa ocellata*) mounds.

- (b) The Permit holder shall not clear within 50m of Malleefowl (*Leipoa ocellata*) mounds identified in condition 6(a) above.

7. Revegetation

- (a) The Permit holder shall retain the vegetative material and topsoil removed by clearing authorised under this Permit.
- (b) Within six months of the area no longer being required for the purpose of exploration and prospecting the Permit holder must *revegetate* the area by:
- (i) Deep ripping the soil of any area to be rehabilitated;
 - (ii) Laying vegetative material and topsoil retained in accordance with condition 7(a) on the area.
- (c) Within one year of undertaking *revegetation* in accordance with condition 7(b), the Permit holder must:
- (i) Determine the species composition, structure and density of the area *revegetated*;
 - (ii) Where, in the opinion of an *flora specialist*, the composition structure and density determined under condition 7(c)(i) will not result in a similar species composition, structure and density to pre-clearing vegetation types in that area, the Permit holder must undertake planting or seeding of native vegetation; and
 - (iii) Propagative material must be sourced from within 50km of the area to be revegetated.

8. Weed Control

- (a) When undertaking any clearing and *revegetation*, or other activity pursuant to this Permit the Permit holder must take the following steps to minimise the risk of the introduction and spread of *weeds*:
- (i) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
 - (ii) ensure that no *weed*-affected *mulch*, *fill* or other material is brought into the area to be cleared; and
 - (iii) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.

PART III – RECORD KEEPING AND REPORTING

9 Records must be kept

The Permit holder must maintain the following records for activities done pursuant to this Permit, as relevant:

- (a) In relation to the clearing of native vegetation undertaken pursuant to the purpose of clearing:
- (i) the location where the clearing occurred, recorded using Geocentric Datum Australia 1994;
 - (ii) the date that the area was cleared; and
 - (iii) the size of the area cleared (in hectares).
- (b) In relation to fauna management pursuant to condition 6:
- (i) The location of each Malleefowl mound in accordance with condition 6(a) recorded using Geocentric Datum Australia 1994.
- (c) In relation to the *revegetation* of areas pursuant to conditions 7(b) and (c):
- (i) The location of any area *revegetated* recorded using Geocentric Datum Australia 1994;

- (ii) A description of the *revegetation* activities undertaken; and
- (iii) The size of the area *revegetated* (in hectares).

10 Reporting

The Permit holder must provide to the CEO, on or before 30 June of each year, a written report of records required under condition 9 and activities done by the Permit holder under this Permit between 1 January and 31 December of the preceding year.

Definitions

The following meanings are given to terms used in this Permit:

fauna specialist means a person with training and specific work experience in fauna identification or faunal assemblage surveys of Western Australian fauna.

fill means material used to increase the ground level, or fill a hollow.

flora specialist means a person with specific training and/or experience in the ecology and taxonomy of Western Australian flora;

mulch means the use of organic matter, wood chips or rocks to slow the movement of water across the soil surface and to reduce evaporation.

revegetate, revegetated and revegetation means the re-establishment of a cover of native vegetation in an area such that the species composition, structure and density is similar to pre-clearing vegetation types in that area, and can involve regeneration, direct seeding and/or planting.

weed means a species listed in Appendix 3 of the "Environmental Weed Strategy" published by the Department of Conservation and Land Management (1999), and plants declared under section 37 of the Agricultural and Related Resources Protection Act 1976.
