

Clearing Permit Decision Report

1. Application details

1.1. Permit application details

Permit application No.: 2819/3
Permit type: Purpose Permit

1.2. Proponent details

Proponent's name: FerrAus Limited (Australian Manganese Proprietary Limited)

1.3. Property details

Property: Mining Lease 52/1034
General Purpose Lease 52/281
Miscellaneous Licence 52/103
Local Government Area: Shire of Meekatharra
Colloquial name: Robertson Range Iron Ore Project

1.4. Application

Clearing Area (ha)	No. Trees	Method of Clearing	For the purpose of:
323.37		Mechanical Removal	Mineral Production

1.5. Decision on application

Decision on Permit Application: Grant
Decision Date: 12 September 2019

2. Site Information

2.1. Existing environment and information

2.1.1. Description of the native vegetation under application

Vegetation Description Beard vegetation associations have been mapped at a 1:250,000 scale for the whole of Western Australia and are useful to look at vegetation extent in a regional context. Three Beard vegetation associations are located within the application area (GIS Database):

29: Sparse low woodland; mulga, discontinuous in scattered groups;

111: Hummock grasslands, shrub steppe; Eucalyptus gamophylla over hard spinifex; and

216: Low woodland; mulga (with spinifex) on rises.

A vegetation survey was conducted over the application area by Ecologia Environment (Ecologia) in April 2007. As a result of this survey, 8 vegetation types were identified within the survey area (Ecologia, 2007). These are:

1a: Scattered outcropping of *Hakea* spp. and other low trees over moderately dense mixed low shrubs and mixed hummock grasses on a red-orange sandy plain. Over-storey species include *Hakea lorea* spp. *lorea*, *H. chordophylla*, *Corymbia deserticola* spp. *deserticola*, *Eucalyptus gamophylla*, over shrub layer including *Acacia dictyophleba*, *Dicrastylis georgei*, *Scaevola parvifolia* spp. *pilbarae* over *Triodia basedowii*, *Triodia schinzii* hummock grasses;

1b: Scattered outcropping *Hakea* spp. and other low trees, over moderately dense mixed hummock grasses, with sparse shrubs. Over-storey species include *Hakea lorea* spp. *lorea*, *Eucalyptus gamophylla*, *Hakea chordophylla*, *Corymbia hamersleyana* over a shrub layer of *Acacia dictyophleba*, *Dicrastylis georgei*, *Scaevola parvifolia* spp. *pilbarae*, *Petalostylis cassioides*, *Leptosema chambersii*, *Santalum lanceolatum* over a hummock grass layer of *Triodia basedowii* and *Triodia schinzii*;

1c: Open *Eucalyptus gamophylla* woodland. *Eucalyptus gamophylla* over shrubs *Eremophila forrestii* spp. *forrestii*, *Acacia ligulata*, *Scaevola spinescens* over low shrubs *Leptosema chambersii*, *Gompholobium polyzygum*, over sparse grass layer *Paraneurachne muelleri*, *Cymbopogon oblectus* over *Triodia basedowii*, *Triodia schinzii*, *Triodia* spp. *Shovellana Hill* hummock grasses;

1d: Moderately dense *high* *Acacia ancistrocarpa* shrubland. Outcropping *Hakea lorea* spp. *lorea* over moderately dense *A. ancistrocarpa* high shrubs over open to moderately dense mixed low shrubs *Petalostylis cassioides*, *A. dictyophleba*, *Melhania oblongifolia*, *Halgania solanacea* var. *Mt Doreen*, with moderately dense to dense *Triodia schinzii*, *Triodia basedowii* hummock grass and scattered mixed soft grasses;

1e: Open *Acacia trudgeniana* mixed medium shrubland. Open *A. trudgeniana* tall shrubs over open *Sida cardiophylla*/*Acacia dictyophleba* mixed medium shrubs over moderately dense *Eragrostis eriopoda*, *Aristida holathera* var. *holathera* mixed soft grass with open *Triodia schinzii*, *Triodia basedowii* mixed hummock grasses;

2. Open mixed low shrubland with open mixed soft grasses. Sparse *Acacia pruinocarpa*, *Codonocarpus cotinifolius* mixed tall shrubs over open to moderately dense *Sida arenicola* medium shrubs over moderately dense *Scaevola spinescens*, *Halgania solanacea* var. *Mt Doreen* mixed low shrubs with open to moderately dense mixed soft grass species;

3a. Open to moderately dense *Acacia aneura* var. *aneura* woodland. Open to moderately dense *Acacia aneura* var. *aneura* low woodland over sparse to moderately dense *Eremophila latrobei* spp. *filiformis*, *E. exilifolia* medium shrubs over scattered to moderately dense *Ptilotus obovatus* low shrubs with scattered *Solanum lasiophyllum* low shrubs mostly with open *Triodia* sp. *Shovelanna Hill* hummock grass and sparse mixed soft grasses dominated by *Eragrostis eriopoda*;

3b: Sparse *Acacia* spp. medium to high shrubland. Scattered outcropping *Acacia* spp. high shrubs over *A. maitlandii* and scattered to sparse *Eremophila latrobei* spp. *filiformis*, *Calytrix carinata* medium shrubs over sparse mixed low shrubs, dominated by *Gompholobium polyzygum* over mixed open to moderately dense soft grasses and open to moderately dense *Triodia* sp.. *Shovellana Hill* hummock grass.

Clearing Description Robertson Range Iron Ore Project.
FerrAus Limited (Australian Manganese Proprietary Limited) proposes to clear up to 323.37 hectares of native vegetation within a boundary of approximately 1,130.309 hectares, for the purpose of mining related infrastructure. The project is located approximately 90 kilometres east of Newman, within the Shire of Meekatharra.

Vegetation Condition Pristine: No obvious signs of disturbance (Keighery, 1994);
To
Excellent: Vegetation structure intact; disturbance affecting individual species, weeds non-aggressive (Keighery, 1994).

Comment Clearing permit CPS 2819/1 was granted by the Department of Mines and Petroleum (now the Department of Mines, Industry Regulation and Safety (DMIRS)) on 21 May 2009 and was valid from 20 June 2009 to 31 July 2014. The permit authorised the clearing of up to 1,130.309 hectares of native vegetation within a boundary of approximately 370 hectares, for the purpose of mineral exploration.
CPS 2819/2 was amended on 18 July 2013 for the purpose of extending the permit duration from 31 July 2014 to 31 December 2019. The amount of clearing authorised and the clearing permit boundary remained the same.
The permit holder has applied to amend CPS 2819/2 for the purpose of extending the permit duration.

3. Assessment of application against Clearing Principles

Comments

FerrAus Limited has applied to amend CPS 2819/2 to extend the duration of the permit from 31 December 2019 to 31 December 2021.

The amendment application has been assessed against the clearing principles, planning instruments and other matters in accordance with s.51O of the *Environmental Protection Act 1986*. Environmental information has been reviewed, and the assessment of the proposed clearing against the clearing principles remains consistent with the assessment contained in decision reports CPS 2819/1 and 2819/2.

Planning Instrument, Native Title, previous EPA decision or other matter.

Comments

There is one native title claim over the area under application (DPLH, 2019). This claim has been registered with the National Native Title Tribunal on behalf of the claimant group. However, the mining tenure has been granted in accordance with the future act regime of the *Native Title Act 1993* and the nature of the act (i.e. the proposed clearing activity) has been provided for in that process, therefore, the granting of a clearing permit is not a future act under the *Native Title Act 1993*.

There are no registered Aboriginal Sites of Significance within the application area (DPLH, 2019). It is the proponent's responsibility to comply with the *Aboriginal Heritage Act 1972* and ensure that no Aboriginal Sites of Significance are damaged through the clearing process.

It is the proponent's responsibility to liaise with the Department of Water and Environmental Regulation and the Department of Biodiversity, Conservation and Attractions, to determine whether a Works Approval, Water Licence, Bed and Banks Permit, or any other licences or approvals are required for the proposed works.

Methodology DPLH (2019)

Definitions:

{DBCA (2019) Conservation Codes for Western Australian Flora and Fauna. Department of Biodiversity, Conservation and Attractions, Western Australia}:-

T **Threatened species:**

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the *Biodiversity Conservation Act 2016* (BC Act).

Threatened fauna is that subset of ‘Specially Protected Fauna’ listed under schedules 1 to 3 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for Threatened Fauna.

Threatened flora is that subset of ‘Rare Flora’ listed under schedules 1 to 3 of the *Wildlife Conservation (Rare Flora) Notice 2018* for Threatened Flora.

The assessment of the conservation status of these species is based on their national extent and ranked according to their level of threat using IUCN Red List categories and criteria as detailed below.

CR **Critically endangered species**

Threatened species considered to be “facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines”.

Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines. Published under schedule 1 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for critically endangered fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for critically endangered flora.

EN **Endangered species**
Threatened species considered to be “*facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines*”.

Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines. Published under schedule 2 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for endangered fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for endangered flora.

VU **Vulnerable species**
Threatened species considered to be “*facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines*”.

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines. Published under schedule 3 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for vulnerable fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for vulnerable flora.

Extinct Species:

EX **Extinct species**
Species where “*there is no reasonable doubt that the last member of the species has died*”, and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

Published as presumed extinct under schedule 4 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for extinct fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for extinct flora.

EW **Extinct in the wild species**
Species that “*is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form*”, and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

Specially protected species:

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

MI **Migratory species**
Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the *Convention on the Conservation of Migratory Species of Wild Animals* (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

Published as migratory birds protected under an international agreement under schedule 5 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

CD **Species of special conservation interest (conservation dependent fauna)**
Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Published as conservation dependent fauna under schedule 6 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

OS **Other specially protected species**
Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

P **Priority species:**

Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora.

Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

P1 **Priority One - Poorly-known species**

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.

P2 **Priority Two - Poorly-known species**

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.

P3 **Priority Three - Poorly-known species**

Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.

P4 **Priority Four - Rare, Near Threatened and other species in need of monitoring**

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as Conservation Dependent.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

Principles for clearing native vegetation:

- (a) Native vegetation should not be cleared if it comprises a high level of biological diversity.
- (b) Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of, a significant habitat for fauna indigenous to Western Australia.
- (c) Native vegetation should not be cleared if it includes, or is necessary for the continued existence of, rare flora.
- (d) Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a threatened ecological community.
- (e) Native vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared.
- (f) Native vegetation should not be cleared if it is growing in, or in association with, an environment associated with a watercourse or wetland.

- (g)** Native vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation.
- (h)** Native vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area.
- (i)** Native vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water.
- (j)** Native vegetation should not be cleared if clearing the vegetation is likely to cause, or exacerbate, the incidence or intensity of flooding.
