

## CLEARING PERMIT

*Granted under section 51E of the Environmental Protection Act 1986*

<b>Purpose Permit number:</b>	CPS 3294/3
<b>Permit Holder:</b>	Alinta DEWAP Pty Ltd (ACN: 058 070 689)
<b>Duration of Permit:</b>	12 December 2009 – 12 December 2019

The Permit Holder is authorised to clear native vegetation subject to the following conditions of this Permit.

### **PART I – CLEARING AUTHORISED**

#### **1. Purpose for which clearing may be done**

Clearing for the purpose of hazard reduction, fire control for powerlines and installation of underground cables.

#### **2. Land on which clearing is to be done**

Lot 6118 on Plan 195281  
Lot 5549 on Plan 216397

#### **3. Area of Clearing**

The Permit Holder must not clear more than 45 hectares of native vegetation within the area shaded yellow on attached Plan 3294/3.

#### **4. Application**

This Permit allows the Permit Holder to authorise persons, including employees, contractors and agents of the Permit Holder, to clear native vegetation for the purposes of this Permit subject to compliance with the conditions of this Permit and approval from the Permit Holder.

### **PART II – ASSESSMENT SEQUENCE AND MANAGEMENT PROCEDURES**

#### **5. Avoid, minimise etc clearing**

In determining the amount of native vegetation to be cleared authorised under this Permit, the Permit Holder must have regard to the following principles, set out in order of preference:

- (a) avoid the clearing of native vegetation;
- (b) minimise the amount of native vegetation to be cleared; and
- (c) reduce the impact of clearing on any environmental value.

### 1.4. Application

Clearing Area (ha)	No. Trees	Method of Clearing	For the purpose of:
45		Cutting Cutting	Hazard reduction or fire control Water/gas/cable/pipeline/power installation

### 1.5. Decision on application

Decision on Permit Application: Grant  
Decision Date: 20 November 2014

## 2. Site Information

### 2.1. Existing environment and information

#### 2.1.1. Description of the native vegetation under application

Vegetation Description	Clearing Description	Vegetation Condition	Comment
Beard vegetation types: 647 - Hummock grasslands, dwarf-shrub steppe; Acacia translucens over soft spinifex.	The amended application is to clear 45 hectares for the purpose of fire hazard reduction around existing powerlines. It is proposed for 10m to be cleared from either side of the existing powerlines.	Degraded: Structure severely disturbed; regeneration to good condition requires intensive management (Keighery 1994)	Vegetation clearing description based aerial photography and information provided by proponent (Alinta DEWAP 2009, Port Hedland 50cm Orthomosaic - Landgate 2004).
589: Short bunch grassland - savanna / grass plain (Pilbara) / Hummock grasslands, grass steppe; soft spinifex  Shepherd et al (2001)	The area has been previously cleared and this application is to extend the duration of the permit to clear regrowth vegetation.		

### 3. Assessment of application against clearing principles

**Comments**      **Proposal is not likely to be at variance to this Principle**

The proponent has applied to extend the permit duration until December 2019. A review of all other current environmental information reveals no new additional information. Therefore the assessment against the clearing principles has not changed and can be found in the Clearing Permit Decision Report CPS 3294/2.

**Methodology**      GIS Databases:  
-SAC Biodatasets (accessed November 2014)

### Planning instrument, Native Title, Previous EPA decision or other matter.

**Comments**

There have been no submissions from the public received for the proposed clearing.

The application area was cleared in during 2010 under clearing permit CPS 3294/2. The current application to increase the duration of the permit to clear regrowth that has occurred since 2010.
