Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), see the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

Yes EPBC number:

No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

Form Annex C7 is complete and the required supporting information is attached.

Part 2: Clearing permit details

Amendments can only be made to active clearing permits.

Applications must be made more than 90 working days prior to the existing permit expiring to ensure there is adequate time to assess the amendment.

Part 4: Proposed amendments	
<p>Additional information to support the assessment of your application to amend may be attached.</p> <p>Please ensure you have included the following as part of your application:</p> <ul style="list-style-type: none"> a photocopy of the granted clearing permit, with proposed changes highlighted, <i>and</i> payment of the prescribed fee. <p>When providing details of the proposed change(s), if any additional clearing is proposed, include details of:</p> <ul style="list-style-type: none"> the proposed method of the clearing; the purpose of the clearing; the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); <i>and</i> the final land use. 	<p>Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es):</p> <p><input type="checkbox"/> Extend the duration of the clearing permit.</p> <p><input type="checkbox"/> Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.</p> <p><input checked="" type="checkbox"/> Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.</p> <p><input type="checkbox"/> Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i></p> <p><input type="checkbox"/> Make a correction to the clearing permit.</p> <p><input type="checkbox"/> Other.</p> <p>Provide details of the proposed change(s), and the rationale(s) for it / them.</p> <p>An additional area of 153.4 ha is requested to be added to the current clearing permit (CPS 4532-11).</p> <p>This area consists of existing pipeline infrastructure across the lease and a previously cleared area in the South Waste Rock Dump (SWRD). Designated works include the provision of access tracks, clearing of regrowth vegetation to remove infrastructure, and rehabilitation and revegetation as part of the Argyle Diamond Mine Closure. Clearing of these areas is expected to commence in the second quarter of 2022, with rehabilitation taking place immediately after the completion of infrastructure removal.</p> <p>All pipeline alignment areas within the permit have been previously disturbed, this includes the alignment towards Lake Argyle in the north-east, and additional pipelines around the former open pit. The purpose of clearing in these areas is to allow for the removal of pipeline infrastructure and access to complete these tasks, followed by rehabilitation of these areas.</p> <p>Rehabilitation of infrastructure corridors and tracks will include the filling in of excavations, reinstating drainage lines, return of any available topsoil and ripping the ground to promote revegetation.</p> <p>The area in the SWRD around the primary crusher location is currently disturbed containing the primary crusher infrastructure, ROM pad and other legacy mining infrastructure. The infrastructure in this area will be demolished and the area will be rehabilitated. Rehabilitation of the SWRD will include landforming, application of growth media, ripping and seeding.</p> <p>The amendment areas requested are spread across four lease areas managed by Argyle Diamonds, see breakdown below.</p> <ul style="list-style-type: none"> M259SA – 59.6 ha L80/11 – 28.0 ha L80/24 – 36.9 ha L80/53 – 28.9 ha <p>Approximately 106.8 ha of the 153.4 ha requested has been disturbed historically for the construction of infrastructure or mining activities. All areas within L80/11, L80/24 and L80/53 have been previously disturbed for the installation of infrastructure, however some regrowth vegetation is now present.</p> <p>Areas under this amendment will be cleared using mechanical means (i.e., excavator and dozer). Disturbance to vegetation will be limited where possible.</p> <p>Rehabilitation will be completed immediately following clearing and infrastructure removal in line with the Mine Closure Plan.</p> <p>No priority flora is present within the amendment areas. The requested amendment area intersects Lake Argyle, an Environmentally Sensitive Area and RAMSAR wetland. Clearing required in this area is only for the removal of pipeline</p>

Part 4: Proposed amendments	
	infrastructure from the lake in areas previously disturbed, and in some cases within the waterbody itself, and therefore is anticipated to have minimal impact.
For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.	State the nature of the applicant's authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission. <i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i> ADL Mining Lease M259SA, L80/24, L80/11, L80/53 – evidence of tenure provided.
Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties. ADL Mining Lease M259SA, L80/24, L80/11, L80/53
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input type="checkbox"/> Yes <input type="checkbox"/> No
	If yes, provide details: It is not possible to avoid the requested clearing unless installations are left in-situ. This option has been considered but does not align with the lease conditions of M80/24 and M80/53 to remove all installations, nor does it align with the Mine Closure Plan and stakeholder expectations. These areas have been previously disturbed, and clearing required to access and remove infrastructure and then rehabilitate the ground will be minimised where possible.
Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the EPA's WA Environmental Offsets Policy and Guidelines on the EPA website for further information.	Do you want to submit a clearing permit offset proposal with your application? <input type="checkbox"/> Yes <input type="checkbox"/> No
	If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i> .
