

CLEARING PERMIT

Granted under section 51E of the Environmental Protection Act 1986

Purpose Permit number:	CPS 4887/3
Permit Holder:	Roy Hill Infrastructure Pty Ltd
Duration of Permit:	25 May 2012 – 31 December 2021

The Permit Holder is authorised to clear native vegetation subject to the following conditions of this Permit.

PART I – CLEARING AUTHORISED

1. Purpose for which clearing may be done

Clearing for the purpose of port construction support including temporary lay down, equipment storage, buildings, roads, car parks, communications tower, accommodation camp and other support facilities.

2. Land on which clearing is to be done

Lot 203 on Deposited Plan 220594 (Boodarie 6722)
Lot 324 on Deposited Plan 220768 (Boodarie 6722)
Lot 1282 on Deposited Plan 70562 (Boodarie 6722)

3. Area of Clearing

The Permit Holder must not clear more than 82.44 hectares of native vegetation within the area hatched yellow on attached Plan 4887/3.

4. Period in which clearing is authorised

The Permit Holder shall not clear any native vegetation after 31 December 2016.

5. Application

This Permit allows the Permit Holder to authorise persons, including employees, contractors and agents of the Permit Holder, to clear native vegetation for the purposes of this Permit subject to compliance with the conditions of this Permit and approval from the Permit Holder.

6. Type of clearing authorised

This Permit authorises the Permit Holder to clear native vegetation for activities to the extent that the Permit Holder has the right to access land under the *Land Administration Act 1997* or any other written law.

PART II – ASSESSMENT SEQUENCE AND MANAGEMENT PROCEDURES

7. Avoid, minimise etc clearing

In determining the amount of native vegetation to be cleared authorised under this Permit, the Permit Holder must have regard to the following principles, set out in order of preference:

- avoid the clearing of native vegetation;
- minimise the amount of native vegetation to be cleared; and
- reduce the impact of clearing on any environmental value.

8. Weed control

- (a) When undertaking any clearing or other activity authorised under this Permit, the Permit Holder must take the following steps to minimise the risk of the introduction and spread of *weeds*:
- (i) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
 - (ii) ensure that no *weed*-affected soil, *mulch*, *fill* or other material is brought into the area to be cleared; and
 - (iii) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.
- (b) At least once in each 12 month period for the term of this Permit, the Permit Holder must remove or kill any *weeds* growing within areas cleared under this Permit.

9. Fauna management

The Permit Holder must implement and adhere to the Roy Hill Project Vertebrate Fauna Management Plan for the Roy Hill Railway Corridor 100RH-3000-EN-REP-2009 December 2011.

10. Retain vegetative material and topsoil, revegetation and rehabilitation

The Permit Holder shall:

- (a) Retain the vegetative material and topsoil removed by clearing authorised under this Permit and stockpile the vegetative material and topsoil in an area that has already been cleared.
- (b) Within six months following clearing authorised under this permit, *revegetate* and *rehabilitate* the area(s) that are no longer required for the purpose for which they were cleared under this by:
- (i) re-shaping the surface of the land so that it is consistent with the surrounding 5 metres of uncleared land; and
 - (ii) ripping the ground on the contour to remove soil compaction; and
 - (iii) laying the vegetative material and topsoil retained under condition 10(a) on the cleared area(s).
- (c) Within 24 months of laying the vegetative material and topsoil on the cleared area in accordance with condition 10(b) of this Permit:
- (i) engage an *environmental specialist* to determine the species composition, structure and density of the area *revegetated* and *rehabilitated*; and
 - (ii) where, in the opinion of an *environmental specialist*, the composition structure and density determined under condition 10(c)(i) of this Permit will not result in a similar species composition, structure and density to that of pre-clearing vegetation types in that area, *revegetate* the area by deliberately *planting* and/or *direct seeding* native vegetation that will result in a similar species composition, structure and density of native vegetation to pre-clearing vegetation types in that area and ensuring only *local provenance* seeds and propagating material are used.
- (d) Where additional *planting* or *direct seeding* of native vegetation is undertaken in accordance with condition 10(c)(ii) of this permit, the Permit Holder shall repeat condition 10(c)(i) and 10(c)(ii) within 24 months of undertaking the additional *planting* or *direct seeding* of native vegetation.
- (e) Where a determination by an *environmental specialist* that the composition, structure and density within areas *revegetated* and *rehabilitated* will result in a similar species composition, structure and density to that of pre-clearing vegetation types in that area, as determined in condition 10(c)(i) and (ii) of this permit, that determination shall be submitted for the CEO's consideration. If the CEO does not agree with the determination made under condition 10(c)(ii), the CEO may require the Permit Holder to undertake additional *planting* and *direct seeding* in accordance with the requirements under condition 10(c)(ii).

PART III - RECORD KEEPING AND REPORTING

11. Records must be kept

The Permit Holder must maintain the following records for activities done pursuant to this Permit:

- (a) In relation to the clearing of native vegetation authorised under this Permit:
 - (i) the species composition, structure and density of the cleared area;
 - (ii) the location where the clearing occurred, recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
 - (iii) the date that the area was cleared; and
 - (iv) the size of the area cleared (in hectares).
- (b) In relation to the *revegetation* and *rehabilitation* of areas pursuant to condition 10 of this Permit:
 - (i) the location of any areas *revegetated* and *rehabilitated*, recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
 - (ii) a description of the *revegetation* and *rehabilitation* activities undertaken;
 - (iii) the size of the area *revegetated* and *rehabilitated* (in hectares); and
 - (iv) the species composition, structure and density of *revegetation* and *rehabilitation*.
 - (v) a copy of the environmental specialist's report.

12. Reporting

- (a) The Permit Holder must provide to the CEO on or before 30 June of each year, a written report:
 - (i) of records required under condition 11 of this Permit; and
 - (ii) concerning activities done by the Permit Holder under this Permit between 1 January and 31 December of the preceding year.
- (b) If no clearing authorised under this Permit was undertaken between 1 January to 31 December of the preceding calendar year, a written report confirming that no clearing under this permit has been carried out, must be provided to the CEO on or before 30 June of each year.
- (c) Prior to 20 September 2021, the Permit Holder must provide to the CEO a written report of records required under condition 11 of this Permit where these records have not already been provided under condition 12(a) of this Permit.

DEFINITIONS

The following meanings are given to terms used in this Permit:

direct seeding means a method of re-establishing vegetation through the establishment of a seed bed and the introduction of seeds of the desired plant species;

environmental specialist: means a person who holds a tertiary qualification in environmental science or equivalent, and has experience relevant to the type of environmental advice that an environmental specialist is required to provide under this Permit, or who is approved by the CEO as a suitable environmental specialist;

fill means material used to increase the ground level, or fill a hollow;

local provenance means native vegetation seeds and propagating material from natural sources within 100 kilometres and the same Interim Biogeographic Regionalisation for Australia (IBRA) subregions of the areas cleared;

mulch means the use of organic matter, wood chips or rocks to slow the movement of water across the soil surface and to reduce evaporation;

optimal time means the period from November to December for undertaking *direct seeding*;

planting means the re-establishment of vegetation by creating favourable soil conditions and planting seedlings of the desired species;

regenerate/ed/ion means re-establishment of vegetation from in situ seed banks and propagating material (such as lignotubers, bulbs, rhizomes) contained either within the topsoil or seed-bearing mulch;

rehabilitate/ed/ion means actively managing an area containing native vegetation in order to improve the ecological function of that area;

revegetate/ed/ion means the re-establishment of a cover of *local provenance* native vegetation in an area using methods such as natural *regeneration*, *direct seeding* and/or *planting*, so that the species composition, structure and density is similar to pre-clearing vegetation types in that area;

weed/s means any plant -

- (a) that is a declared pest under section 22 of the *Biosecurity and Agriculture Management Act 2007*; or
- (b) published in a Department of Parks and Wildlife Regional Weed Rankings Summary, regardless of ranking; or
- (c) not indigenous to the area concerned.

Clearing Permit Decision Report

Government of Western Australia
Department of Environment Regulation

1. Application details

1.1. Permit application details

Permit application No.: 4887/3
Permit type: Purpose Permit

1.2. Proponent details

Proponent's name: Roy Hill Infrastructure Pty Ltd

1.3. Property details

Property: LOT 203 ON PLAN 220594 (BOODARIE 6722)
LOT 324 ON PLAN 220768 (BOODARIE 6722)
LOT 1282 ON PLAN 70562 (BOODARIE 6722)
Local Government Area: Town of Port Hedland

1.4. Application

Clearing Area (ha)	No. Trees	Method of Clearing	For the purpose of:
82.44		Mechanical Removal	Building or Structure

1.5. Decision on application

Decision on Permit Application: Grant
Decision Date: 26 February 2015

2. Site Information

2.1. Existing environment and information

2.1.1. Description of the native vegetation under application

Vegetation Description	Clearing Description	Vegetation Condition	Comment
<p>Beard Vegetation Association: 647 eastern 2/3 - Hummock grasslands, dwarf-shrub steppe; <i>Acacia translucens</i> over soft spinifex (Shepherd et al, 2001)</p> <p>589 western 1/3 - Mosaic: Short bunch grassland - savanna / grass plain (Pilbara) / Hummock grasslands, grass steppe; soft spinifex (Shepherd et al, 2001)</p> <p>FCT 6a: occasional mid isolated shrubs of <i>Acacia tumida</i> var. <i>pilbarensis</i> over low isolated shrubs of <i>Acacia stellaticeps</i> over low hummock grassland dominated by <i>Triodia epactia</i> with other dominant species including <i>Aristida</i> spp., <i>Chrysopogon fallax</i>, <i>Eriachne obtusa</i>, <i>Eragrostis eriopoda</i>, red sand to sandy loam on dunes, and midslope - plain areas (Woodman, 2011). Nearly all of the application area was mapped as this vegetation type (Woodman, 2011).</p> <p>FCT 4: occasional mid isolated shrubs of <i>Acacia tumida</i> var. <i>pilbarensis</i> over occasional low isolated shrubs of <i>Acacia stellaticeps</i> over low hummock grassland of <i>Triodia epactia</i> on red sandy clay in closed depressions and flats (Woodman, 2011). Two small areas, near the northern and eastern edges of the application area were described as this vegetation type (Woodman, 2011).</p>	<p>The amended application is to clear 82.44 hectares of native vegetation within Lot 203 on Deposited Plan 220594, Lot 324 on Deposited Plan 220768 and Lot 1282 on Deposited Plan 70562, Boodarie, for a temporary lay down area for port construction including equipment storage, buildings, roads, car parks, communications tower, accommodation camp and other support facilities (RHI, 2012 and RHI, 2013).</p> <p>The application area is approximately 4 kilometres long and 0.5 kilometre wide and is located within the approved corridor of the Roy Hill Infrastructure Pty Railway, to the west of the final rail alignment.</p>	<p>Excellent: Vegetation structure intact; disturbance affecting individual species, weeds non-aggressive (Keighery 1994)</p> <p>To</p> <p>Very Good: Vegetation structure altered; obvious signs of disturbance (Keighery 1994)</p>	<p>Vegetation description and condition was determined through aerial imagery, photographs and description in survey reports provided by the applicant (RHI, 2012; Woodman, 2011; Terrestrial Ecosystems, 2012).</p> <p>The majority of the application area is described as FCT 6a, which was recorded to support a total of 115 flora species during a survey of the railway corridor that included the application area (Woodman, 2011).</p> <p>A fence line is reported to run across the application area which indicates it was once used for grazing stock but there is no evidence of stock in the area now (Terrestrial Ecosystems, 2012). Vegetation condition mapping indicates that the application area ranges from excellent to very good (Keighery, 1994) condition, with some weed presence (Woodman, 2011).</p>

3. Assessment of application against clearing principles

Comments

Roy Hill Infrastructure Pty Ltd (RHI) has reduced the application area to coincide with their new Section 91 Licence. This amendment has resulted in the reduction of clearing from 186.54 hectares to 82.44 hectares.

The assessment against the clearing principles has not changed. The findings from the previous assessment are still relevant and can be found in Clearing Permit Decision Report CPS 4887/2.

Planning instrument, Native Title, Previous EPA decision or other matter.

Comments

The clearing footprint and boundary has been modified, reducing the amount of clearing required. This change is in response to a new Section 91 Licence issued on 16 December 2014.

There have been no submissions received from the public in response to the amendment.
