Application for removing Mill Logs as follows.

3121

That portion of area marked on map has **substantial** trees as a **corridors** on **four** sides plus a creek line with flooded gums running east west plus a flooded gums running north south plus a treed ridge running north south as marked.

Further plantings of suitable species. Sheek, wattles and Tasmanian Blue gums.

NB Jarrah and Wandoo trees **do not** survive in wet areas.

5277

This area has **substantial** area of Reminent bush that has been left esp for land clearing agreement 1995.

5276

This has a tree corridor (Road 40 metres) on the north side with treed corridor on the south portion on three sides. There is a treed area in the front portion.

5275

This has 3 treed ridges running NW-SE plus is has a 40 metre Road Trees on the South side 77 has 20 metre Road (Trees) (Closed) on the west side. All these treed corridors are connecting.

5273

This area has trees on closed Road on the west side, remenant vegetation on North and South and a road on the east. All this vegetation is connected as corridors

3929

This has a substantial tree corridors on four side
On the east side 105 ha (Neighbours).

3928

This area has on North side 105 ha (Neighbours)
East side a Corridor 60 metres, South side
Neighbours remenant Bush, A. iron stone ridge with
vegetation running NW-SE plus a road-Telephone
line no longer used. A complete corridor.

There are areas on this property that will be
planted to trees to offset the removal of mill logs
on those portion being applied for. Only trees that are
suitable.

NB No Soil erosion has occurred or and Salt outbreaks
seen since the original bulldozing permit 1995.

There is two reason for this application

1 To bring into production those arable land for
pasture

2 The trees in park land are now mill logs

The logs are required to be sawn into fence post
to fence the entire boundaries of the farm and to use

fence post to fence off added tree planting in water ways where needed.

NB Waterway carry surface water during winter With added trees plantings this will utilize surface water before it gets to the major creeks.

NB When the original committee approved the clearing permit 1995, they recognize the trees left in park land would become millable trees for timber. They are now ready to be utilized for that purpose, with agreed offset plantings.

It is imperative to remain viable that these trees now mill logs, be utilized so as to bring into production this arable land.
