3. Assessment of application against clearing principles, planning instruments and other relevant matters

Comments

Consideration has been given to impacts of biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to all clearing principles.

The clearing is for the purpose of fence line maintenance. No submissions have been received.
