Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Part 4: Proposed amendments													
Additional information to support the assessment of your application to amend may be attached. Please ensure you have included the following as part of your application: - a photocopy of the granted clearing permit, with proposed changes highlighted, <i>and</i> - payment of the prescribed fee. When providing details of the proposed change(s), if any additional clearing is proposed, include details of: - the proposed method of the clearing; - the purpose of the clearing; - the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); <i>and</i> - the final land use.	Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es): <table border="1"> <tr> <td>☒</td> <td>Extend the duration of the clearing permit.</td> </tr> <tr> <td>☒</td> <td>Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.</td> </tr> <tr> <td>☐</td> <td>Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.</td> </tr> <tr> <td>☐</td> <td>Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i></td> </tr> <tr> <td>☐</td> <td>Make a correction to the clearing permit.</td> </tr> <tr> <td>☐</td> <td>Other.</td> </tr> </table> Provide details of the proposed change(s), and the rationale(s) for it / them. Proposed Changes: 1) Extend the duration of the permit by ten years from 1 February 2026 to 1 February 2036 and amend Condition 10b to reflect the revised expiry date. Rationale: As reflected in the most recent Mine Closure Plan submission (REGID 119604), the expected project completion date is 2030. The permit expiry date extension is to provide sufficient time following completion for the Permit Holder to undertake <i>revegetation and rehabilitation</i> of areas that are currently still required for the purpose for which they were cleared under the Permit to support the Project and to complete the required verification monitoring in accordance with Condition 8 of the Permit. In accordance with Condition 4, no new clearing will be undertaken under the Permit. 2) Revise Condition 10a to reduce annual reporting requirements to biennial reporting requirements until project completion. Annual reporting will resume upon the commencement of revegetation and rehabilitation activities. Rationale: In accordance with Condition 4, no new clearing will be or can be undertaken under the Permit. As such, there is negligible risk to environmental values being impacted upon during this time, and there are no substantive activities to report on until revegetation and rehabilitation works begin. Therefore, MinRes requests a reduction from annual to biennial reporting until such time as revegetation and rehabilitation activities commence, at which point annual reporting will resume. Records will continue to be maintained as per Condition 9 of the Permit.	☒	Extend the duration of the clearing permit.	☒	Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.	☐	Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.	☐	Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i>	☐	Make a correction to the clearing permit.	☐	Other.
