2. Site Information

2.1. Existing environment and information

2.1.1. Description of the native vegetation under application

Vegetation Description	Vegetation Condition
The vegetation under application has been mapped as Beard Vegetation Association 3 which is described as medium forest, jarrah-marri (Shepherd et. al., 2001).	Good: Structure significantly altered by multiple disturbance; retains basic structure/ability to regenerate (Keighery 1994).

3. Assessment of application against clearing principles, planning instruments and other relevant matters

Comments The application is to clear three native trees within Spencer Road reserve for the purpose of road maintenance.

Consideration has been given to impacts to biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to any of the clearing principles.
