2.1.1. Description of the native vegetation under application

Vegetation Description	Vegetation Condition
The vegetation under application has been mapped as Beard Vegetation Association 968: Medium woodland; jarrah, marri & wandoo (Shepherd et al, 2001).	Completely Degraded: No longer intact; completely/almost completely without native species (Keighery 1994)

3. Assessment of application against clearing principles

Comments

The application is for the proposed clearing of five native trees within Coolup Road reserve, Coolup, for the purpose of road widening.

Consideration has been given to impacts to biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to any of the clearing principles.

No submissions have been received.
