Currently there is a 9,000 m3 tank on the reserve that runs dry during adverse seasonal conditions. The new dam will be used to supplement the existing supply for use by surrounding farmers for stock watering purposes. The existing standpipe, located in the Pingaring townsite and connected to the comprehensive water supply, has a very limited supply which is not sufficient to keep up with demand during dry periods. In fact the standpipe has a reducer fitted during the summer months to ensure that the overall comprehensive supply is not affected due to excessive draw on the scheme.</div>
