3. Assessment of application against clearing principles, planning instruments and other relevant matters

Comments

The application is for the proposed clearing of 0.055 hectares of native vegetation within Williams Street road reserve (PIN 11845979), Gooseberry Hill, for the purpose of road widening and improving sight lines.

Consideration has been given to impacts to biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to any of the clearing principles.

One registered Indigenous Heritage Site is mapped within the application area. It is the responsibility of the proponent to ensure that no Aboriginal Sites of Significance are damaged through the clearing process. The proponent is advised to liaise with the Department of Aboriginal Affairs regarding their obligations under the Aboriginal Heritage Act 1972

No submissions have been received.
