## Public Submission Summary

Public Submission	Impacts to be addressed
1.	<p>(a) The area consists of deep white sand which would be very hard to rehabilitate. Over 30 years ago a small area of land was cleared and this has been seen to be very slow to rehabilitate itself.</p> <p>(b) It is adjacent to the South West Highway and if cleared there would be a strong possibility of sand blowing across the highway, causing a hazard to traffic.</p>
