## 3. Assessment of application against clearing principles

**Comments** The application is to clear 11 native trees within Roberts Road reserve (PIN 1343494 and 11865198), Kelmscott, for the purpose of upgrading an unsealed portion of the road.

Consideration has been given to impacts to biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, conservation areas, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to any of the clearing principles.

No submissions have been received for this application to clear.
