Vegetation Description

Beard Vegetation Association 909 is described as Grasslands, high grass savanna woodland; bloodwood, stringybark & woollybutt over upland tall grass & curly spinifex on sandplain (Shepherd et al, 2001)

Vegetation Condition

Completely Degraded; No longer intact, completely/almost completely without native species (Keighery, 1994).

3. Assessment of application against clearing principles

Comments The Shire of Wyndham-East Kimberley propose to clear 0.1873 hectares of native vegetation within Victoria Highway road reserve (PIN 11415121), Kununurra, for the purpose of road and drainage upgrades.

Consideration has been given to impacts to biodiversity, significant fauna habitat, rare flora, threatened ecological communities, remnant vegetation values, wetlands, watercourses, land degradation, surface water quality, groundwater quality, and flooding. The assessment has found that the clearing under application is not likely to be at variance to any of the clearing principles.
