Part 5 Proposed changes

Additional information to support the assessment of your application to amend may be attached.

Please ensure you have included the following as part of your application:

- a photocopy of the granted clearing permit, with proposed changes highlighted,
- and
- payment.

If you are applying on behalf of the permit holder, please attach your agent's authority duly authorising you to act on behalf of the permit holder.

Please tick below the proposed change(s) to your clearing permit:

- extend the duration of the permit
- vary a permit condition, such as a due date
- amend the size of the area permitted to be cleared, or remove a land parcel listed on the permit
- or
- other.

Provide details of proposed changes:

The total area of clearing will remain the same, but we have had to realign one section of the track, as a Priority 1 flora species (5 plants) was found on the original trail alignment (see revised flora survey report). The realignment will take the trail outside of the existing clearing permit area, by about 5m. The realignment will allow the trail to be constructed around the critical habitat for this species. No DRF or Priority plants will be taken or impacted as a result of the realignment.

In fact, the new trail should further protect these P1 plants, as they are located on the edge of an existing track. This track will be brushed (i.e. closed) with the cleared native vegetation (under this permit) to discourage people from continuing to use that track.

A new shapefile has been provided which includes the area that needs to be cleared for this realignment.
