

# Clearing Permit Decision Report

## 1. Application details

### 1.1. Permit application details

Permit application No.: 7275/2  
Permit type: Purpose Permit

### 1.2. Proponent details

Proponent's name: Wiluna Mining Corporation Limited

### 1.3. Property details

Property: Mining Lease 53/130  
Mining Lease 53/131  
Mining Lease 53/205  
Mining Lease 53/1097  
Local Government Area: Shire of Wiluna

### 1.4. Application

Clearing Area (ha)	No. Trees	Method of Clearing	For the purpose of:
120		Mechanical Removal	Mineral Production

### 1.5. Decision on application

Decision on Permit Application: Grant  
Decision Date: 30 November 2021

## 2. Site Information

### 2.1. Existing environment and information

#### 2.1.1. Description of the native vegetation under application

**Vegetation Description** The vegetation of the application area is broadly mapped as the following Beard vegetation associations:  
18: Low woodland; mulga (*Acacia aneura*);  
28 Open low woodland; mulga; and  
29: Sparse low woodland; mulga, discontinuous in scattered groups (GIS Database).

A flora and vegetation survey was conducted over the application area by Animal Plant Mineral (APM) during 6-10 of August 2015. The following vegetation types were recorded within the application area (APM, 2015):

**gBra1:** *Acacia* aff. *incurvaneura* mid-dense tall shrubs over mixed sparse shrubs over *Eriachne mucronata* and *Monachather paradoxa* very sparse tussock grasses.

**gFP1:** *Acacia* aff. *incurvaneura* and *Acacia rhodophloia* mid-dense tall shrubs over *Triodia melvillei* mid-dense hummock grass.

**gFP2:** *Acacia pruinocarpa* emergent trees over *Acacia incurvaneura*, mid-dense tall shrubs over *Aristida contorta* very sparse tussock grass.

**gFP3:** *Acacia aptaneura* very sparse tall shrubs over mixed very sparse shrubs over *Aristida contorta* very sparse tussock grass.

**gFP4:** *Acacia aneura* very sparse tall shrubs over *Scaevola spinescens* and *Sida ectogama* very sparse shrubs over *Aristida contorta* very sparse tussock grass.

**gFP5:** *Eremophila galeata* very sparse shrubs over *Aristida contorta* very sparse tussock grass.

**gHC1:** *Acacia aneura* (*Acacia incurvaneura*) very sparse tall shrubs over *Ptilotus obovatus* and *Senna artemisioides* subsp. *helmsii* very sparse shrubs.

**gMD1:** *Acacia incurvaneura* dense tall shrubs over *Eragrostis leptoclada* dense tussock grass and *Bidens bipinnata* mid-dense herbs.

**gMid1:** *Acacia quadrimarginea* mid-dense tall shrubs over *Ptilotus obovatus* very sparse shrubs.

**cBra2:** *Acacia ramulosa* var. *ramulosa* mid-dense shrubs over *Aristida contorta* very sparse tussock grass.

**cBra3:** *Acacia incurvaneura* mid-dense tall shrubs over *Enneapogon caeruleus* very sparse tussock grass.

**cFP5:** *Acacia incurvaneura* (*Acacia aneura*) open tall shrubs over *Maireana georgei* and *Maireana erioclada* very sparse chenopod shrubs.

**cFP6:** *Acacia aneura* very sparse tall shrubs over *Maireana trichoptera* sparse chenopod shrubs and *Aristida contorta* tussock grass.

**cFP7:** *Acacia incurvaneura* sparse tall shrubs over occasional *Eremophila margarethae* sparse shrubs over *Aristida contorta* very sparse tussock grass.

**cFP8:** *Acacia incurvaneura* mid-dense tall shrubs over *Acacia tetragonophylla* and *Sida ectogama* very sparse shrubs.

**cMD2:** *Acacia aptaneura* dense tall shrubs over *Digitaria brownii* and occasional *Themeda triandra* dense tussock grass.

**cMid2:** *Acacia aneura* mid-dense tall shrubs over *Sida ectogama* and *Ptilotus obovatus* sparse open shrubs.

**cMid3:** *Acacia aptaneura* dense tall shrubs over *Ptilotus obovatus* very sparse shrubs over *Aristida contorta* dense tussock grass.

**Clearing Description** Wiluna Mining Corporation Limited proposes to clear up to 120 hectares of native vegetation within a boundary of approximately 276 hectares, for the purpose of mineral production. The project is located approximately 2 kilometres north of Wiluna in the Shire of Wiluna.

**Vegetation Condition** Very Good: Vegetation structure altered; obvious signs of disturbance (Keighery, 1994).  
to

Degraded: Structure severely disturbed; regeneration to good condition requires intensive management (Keighery, 1994).

**Comment** The vegetation condition was derived from a vegetation survey conducted by APM (2015).

Clearing permit CPS 7275/1 was granted by the Department of Mines and Petroleum (now the Department of Mines, Industry Regulation and Safety) on 1 December 2016 and was valid from 24 December 2016 to 31 December 2021. The permit authorised the clearing of up to 120 hectares of native vegetation within a boundary of approximately 276 hectares, for the purpose of mineral production.

On 30 August 2021, the permit holder applied to amend CPS 7275/1 extend the permit duration and update the permit holder name.

### 3. Assessment of application against Clearing Principles

#### Comments

The permit holder has applied to extend the permit duration by five years, to 31 December 2026, and to update the permit holder name from Blackham Resources Limited to Wiluna Mining Corporation Limited. The amendment is allow for current works to continue.

Based on information provided by the permit holder, a cumulative total of vegetation cleared under this permit is approximately 76.89 hectares, with no clearing occurring within the last three financial years.

The flora survey conducted in August 2015 identified *Eremophila congesta* (P1) within the application areas, with the potential impact of clearing an estimate of up to 4,800 individuals of this species (APM, 2015). Upon the granting of CPS 7275/1, Condition 8 of the Permit required the permit holder to engage a botanist to conduct a targeted flora survey to determine the presence of *Eremophila congesta*, map critical habitat, and provide the results to the Department prior to clearing.

Pursuant to permit Condition 8, the permit holder applied to the CEO on 10 January 2017 to begin clearing for the project with the results of a targeted survey conducted on 3-4 January 2017 (APM, 2017). The sites where the species were collected in 2015 were revisited. Plant material for this species was collected, submitted to the WA Herbarium and was determined to be *Eremophila jucunda* subsp. *jucunda*, which was misidentified as *Eremophila congesta* in August 2015 (APM, 2017). It was determined that *Eremophila congesta* was unlikely to be present within the application area (APM, 2017, DBCA, 2017). Based on the above, Condition 8 is no longer required on the permit.

The amendment application has been assessed against the clearing principles, planning instruments and other matters in accordance with s.51O of the *Environmental Protection Act 1986*, and the proposed clearing is at variance to Principle (f), may be at variance to Principle (g), is not likely to be at variance to Principles (a), (b), (c), (i), and (j), and not at variance to Principles (d), (e), and (h).

**Methodology** APM (2015)

## Planning Instrument, Native Title, previous EPA decision or other matter.

### Comments

There are two native title claims (WR2016/001; WC1999/024) over the area under application (DPLH, 2021). These claims have been determined by the Federal Court on behalf of the claimant groups. However, the mining tenure has been granted in accordance with the future act regime of the *Native Title Act 1993* and the nature of the act (i.e. the proposed clearing activity) has been provided for in that process, therefore, the granting of a clearing permit is not a future act under the *Native Title Act 1993*.

There are several registered Aboriginal Sites of Significance within the application area (DPLH, 2021). It is the proponent's responsibility to comply with the *Aboriginal Heritage Act 1972* and ensure that no Aboriginal Sites of Significance are damaged through the clearing process.

It is the proponent's responsibility to liaise with the Department of Water and Environmental Regulation and the Department of Biodiversity, Conservation and Attractions, to determine whether a Works Approval, Water Licence, Bed and Banks Permit, or any other licences or approvals are required for the proposed works.

The amendment application was advertised on 10 September 2021 by the Department of Mines, Industry Regulation and Safety inviting submissions from the public. No submissions were received in relation to this application.

**Methodology** DPLH (2021)

## **Definitions:**

{DBCA (2019) Conservation Codes for Western Australian Flora and Fauna. Department of Biodiversity, Conservation and Attractions, Western Australia}:-

### **T            Threatened species:**

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the *Biodiversity Conservation Act 2016* (BC Act).

**Threatened fauna** is that subset of ‘Specially Protected Fauna’ listed under schedules 1 to 3 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for Threatened Fauna.

**Threatened flora** is that subset of ‘Rare Flora’ listed under schedules 1 to 3 of the *Wildlife Conservation (Rare Flora) Notice 2018* for Threatened Flora.

The assessment of the conservation status of these species is based on their national extent and ranked according to their level of threat using IUCN Red List categories and criteria as detailed below.

### **CR            Critically endangered species**

Threatened species considered to be “*facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines*”.

Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines. Published under schedule 1 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for critically endangered fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for critically endangered flora.

### **EN            Endangered species**

Threatened species considered to be “*facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines*”.

Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines. Published under schedule 2 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for endangered fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for endangered flora.

### **VU            Vulnerable species**

Threatened species considered to be “*facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines*”.

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines. Published under schedule 3 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for vulnerable fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for vulnerable flora.

## **Extinct Species:**

### **EX            Extinct species**

Species where “*there is no reasonable doubt that the last member of the species has died*”, and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

Published as presumed extinct under schedule 4 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018* for extinct fauna or the *Wildlife Conservation (Rare Flora) Notice 2018* for extinct flora.

### **EW            Extinct in the wild species**

Species that “*is known only to survive in cultivation, in captivity or as a naturalised population well*

outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form", and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

### **Specially protected species:**

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

### **MI Migratory species**

Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the *Convention on the Conservation of Migratory Species of Wild Animals* (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

Published as migratory birds protected under an international agreement under schedule 5 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

### **CD Species of special conservation interest (conservation dependent fauna)**

Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Published as conservation dependent fauna under schedule 6 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

### **OS Other specially protected species**

Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

Published as other specially protected fauna under schedule 7 of the *Wildlife Conservation (Specially Protected Fauna) Notice 2018*.

### **P Priority species:**

Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora.

Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

### **P1 Priority One - Poorly-known species**

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.

**P2 Priority Two - Poorly-known species**

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.

**P3 Priority Three - Poorly-known species**

Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.

**P4 Priority Four - Rare, Near Threatened and other species in need of monitoring**

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as Conservation Dependent.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

**Principles for clearing native vegetation:**

- (a) Native vegetation should not be cleared if it comprises a high level of biological diversity.
- (b) Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of, a significant habitat for fauna.
- (c) Native vegetation should not be cleared if it includes, or is necessary for the continued existence of, threatened flora.
- (d) Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a threatened ecological community.
- (e) Native vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared.
- (f) Native vegetation should not be cleared if it is growing in, or in association with, an environment associated with a watercourse or wetland.
- (g) Native vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation.
- (h) Native vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area.
- (i) Native vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water.
- (j) Native vegetation should not be cleared if the clearing of the vegetation is likely to cause, or exacerbate, the incidence or intensity of flooding.
