Proposed method of clearing or final land use

The City is seeking permission to translocate two native species, *Chaetanthus tenellus* and *Lawrenzia aquamata*, for use in environmental restoration projects in the nearby Canning River Regional Park. The City is concerned that future plans to develop the site will lead to the plants being destroyed. Further, the land is in a highly degraded condition ( has been previously cleared) and environmental weeds would be likely to outcompete the populations in the near future.

Period within which clearing is proposed to be undertaken, e.g. May 2013 – June 2018

October 2016 – October 2017.

Purpose of clearing

Plant relocation prior to development.

Has this clearing application or any related matter been referred to the Environmental Protection Authority (EPA)  Yes  No
