AUTHORISED ACTIVITY

1. Clearing of up to 8.2 hectares of native vegetation within the area shown hatched in yellow on attached Plans 739/1a, 739/1b and 739/1c.

CONDITIONS

1. Prior to commencing clearing, the Permit Holder shall install and maintain a *clean down facility* at Site A and Site B, as indicated on attached Plan 739/1c.
2. The Permit Holder shall remove all soil and plant material from all tools, machinery, footwear, equipment and vehicles at the *clean down facility* when entering or exiting the area between Sites A and B as indicated on attached Plan 739/1c.
3. The Permit Holder shall take the following measures within the area hatched red on attached Plan 739/1c to revegetate it by 1 December 2009:
 - a) selectively remove or kill all plant species that are not native vegetation,
 - b) plant the areas 1 metre beyond the top of the backslope with seedlings to a minimum average planting density of 1000 plants per hectare. Planting shall consist of local native species found within a 50km radius of the areas to be cleared ; and
 - c) sow the areas 1 metre beyond the top of the backslope with a minimum average seeding density of 1 kilogram per hectare, ensuring that the seed is distributed evenly across the area and consist of local native species found within a 50km radius of the areas to be cleared.
4. In September, October or November of each year between 2010 and 2012 inclusive, sowing of the seed mixture and / or replanting of seedlings of the kind referred to in condition 3 of this Permit, shall be repeated on those parts of the areas 1 metre beyond the top of the backslope to the edge of the road reserve in the area hatched red on attached Plan 739/1c where the plant survival rate (measured at September of the relevant year) is below 1000 stems per hectare.

5. The Permit Holder shall record the following for each instance of revegetation within the area hatched red on attached Plan 739/1c:
 - a) the area of land revegetated,
 - b) composition of species used for revegetation under condition 3 of this Permit,
 - c) density of planting in stems per hectare and density of seeds in kilograms per hectare used for revegetation under condition 3 of this Permit,
 - d) measurements of stems per hectare at September of each year between 2010 and 2012 inclusive,
 - e) composition of species used for maintenance replanting when required under condition 4 of this Permit, and
 - f) density of planting in stems per hectare and / or density of seeds in kilograms per hectare used for maintenance replanting when required under condition 4 of this Permit.

6. The Permit Holder shall provide a report to the Chief Executive Officer by 1 December of the years 2010 and 2012, setting out the records required to be kept under condition 5 of this Permit in relation to clearing, rehabilitation and revegetation carried out within the term of the Permit.

DEFINITIONS

Except as otherwise provided, terms used in this Permit have the meaning set out in the *Environmental Protection Act 1986*.

Clean down facility: means a hard stand area that includes vehicle ramps, brushes, hoses and water to enable the removal of soil and plant matter from tools, machinery and vehicles.
