1 Introduction

1.1 Background

Broome's Town Beach is located approximately 1 km South of Broome's town centre in Western Australia, along the east side of the Town Beach foreshore reserve, Pioneer Cemetery and the Museum (Figure 1). The Proposal is located on Lot 556 on Plan 77711 and a portion of Lot 600 on Plan P4010010.

An extreme level erosion risk for the east side of the Town Beach foreshore reserve, Pioneer Cemetery and the Museum exists extending along approximately 400 m of shoreline. The Shire of Broome proposes to mitigate this erosion risk by constructing a seawall along the 400 m of shoreline. The proposed seawall forms part of the wider Coastal Hazard Risk Management Adaptation Plan (CHRMAP) that was adopted by the Shire of Broome Council in September 2017 and is part-funded by the Department for Planning, Lands and Heritage.

The seawall forms part of major planned upgrades to Broome's Town Beach, which include the development of precincts for heritage, youth and nature play areas, terraced viewing for the Staircase to the Moon, a look out and memorial, and expansion of the existing water park.

It is proposed to clear up to 0.38 ha of terrestrial native vegetation and up to 0.06 ha of mangroves (**the proposed clearing area**) in order to support the construction of the seawall (Figure 2). A Native Vegetation Clearing Permit (NVCP) is required to allow for the clearing of this native vegetation. While the Shire of Broome is seeking approval for the maximum potential amount of clearing of mangroves (0.06 ha), all efforts will be made during the seawall final design and construction stages to retain as many mangroves as possible.

1.2 Purpose of Document

The purpose of this document is to present the results of an assessment of the potential impacts of the proposed clearing against the ten clearing principles as outlined in 'A guide to the assessment of applications to clear native vegetation' (DER 2014).

This report identifies the potential environmental impacts associated with the proposed clearing based on the best available data. This document and accompanying NVCP application form will be submitted to the Department of Water and Environmental Regulation (DWER) for assessment.

1.3 Responsible Person

The Shire of Broome is responsible for implementation of the clearing described within this document. Correspondence relating to this NVCP application should be addressed to:

- Name: Steven Harding
- Position: Director Infrastructure
- Address: Cnr Weld and Haas Street, Broome, WA 6725
- Phone: (08) 9191 3456
- Email: Steven.Harding@broome.wa.gov.au

2 Site Overview

2.1 Location

The construction area is located at Broome's Town Beach, east of Robinson Street, Broome, approximately 1 km South of Broome's town centre (Figure 1). The area is bordered by strata land to the north, residential lots to the west and public parking to the south, with the shoreline abutting to the east.

2.2 Climate

The climate northern coastal region of Western Australia is characterised by the Koppen and Geiger Climate Classification as BSh – hot semi-arid climate featuring hot summers, and warm to cool winters (BoM 2017).

The closest official Bureau of Meteorology (BoM) weather station currently operating is Broome Airport where quality controlled climate data is available dating back to 1939.

The minimum average monthly temperature ranges from approximately 13.7°C to 26.5°C and maximum average monthly temperature ranges approximately 28.9°C to 34.3°C (BoM 2017) (Graph 1). Rainfall of >1mm averages 35.5 days per year, with the maximum mean rainfall being 191.1 mm during January. The annual average rainfall received at this station is approximately 622.8 mm per annum (BoM 2017).

2.3 Topography and soils

The site encompasses the beach (at 0-3 m Australian Height Datum [AHD]), a cliff along the shoreline rising to 8 m AHD, and level ground to the north (Figure 3).

Figure 3: Topography at the Broome Town Beach

The surface geology is described as (Figure 4):

- **Dunes 38496:** Dunes, sandplain with dunes and swales, may include numerous interdune clay pans; residual and aeolian sand with minor silt and clay; aeolian red quartz sand, clay and silt, in places gypsiferous; yellow hummocky sand

Soils are described as (Figure 5):

- **Carpentaria System_335Cr:** Coastal Plains, extensive bare mud flats, associated sandy margins and minor dunes, saline sands and muds, supporting paperbark thickets, samphire shrublands and fringing mangrove forests
- **Yeeda System_335Ye:** red sandplains supporting pindan vegetation with dense acacia shrubs, scattered bloodwood and grey box trees and curly spinifex and ribbon grass

2.4 Wetlands

The site is located approximately 6 km west of the Ramsar Site - Roebuck Bay. Roebuck Bay has a very large tidal range which exposes around 160 square kilometres of mudflat, covering most of the Ramsar site (DEE 2017).

2.5 Flora and Fauna

Database searches of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) Protected Matters Search Tool (PMST) and the Department of Biodiversity Conservation and Attractions [DBCA's]) Search Tool were undertaken to compile a list of Threatened or Priority species and Threatened and Priority Ecological Communities (TECs and PECs) potentially present in the area. These database searches are summarised in Table 1.

Table 1: Database searches undertaken to identify potential environmental constraints

POTENTIAL ENVIRONMENTAL CONSTRAINT(S)	DATABASE SEARCHES
Matters of National Environmental Significance (MNES)	EPBC Act PMST Search (DoEE 2017a), 5 km buffer
Declared Rare Flora (DRF) and Priority species	DBCA NatureMap search (DBCA 2017a), 5 km buffer
TECs and / or PECs	EPBC Act PMST (DEE 2017a) DBCA NatureMap search (DBCA 2017a), 5 km buffer

2.5.1 Flora Database Results

Database searches returned 400 flora species known to occur within a 5 km radius of the site, of which 7 are listed under the DBCA Priority List, WC Act or EPBC Act as being of conservation significance (Appendix A).

Table 2 presents an assessment of the likelihood of occurrence of conservation significant flora (from database searches) in the proposed clearing area.

Table 2: Assessment of the Likelihood of Occurrence of Conservation Significant Flora (from database searches) in the proposed clearing area

SPECIES	CONSERVATION STATUS ¹ PRIORITY LIST, WC ACT, EPBC	HABITAT INFORMATION	SUITABLE HABITAT	CLOSEST RECORD ²	NOTES	LIKELIHOOD
<i>Keraudrenia exastia</i> / <i>Seringia exastia</i> (Fringed fire-bush)	-; T; CE	The Fringed <i>Keraudrenia</i> grows in pindan (red soil) heathland (Western Australian Herbarium 2006). Apart from one subpopulation which occupies a north-facing dune slope, the remaining six subpopulations occur on almost flat land and associated vegetation includes Feathertop Spinifex (<i>Triodia schinzii</i>) and scattered trees, under 7 m in height, of Soap Wattle (<i>Acacia colei</i>), Bloodwood (<i>Eucalyptus dampieri</i>) and several other common species with a variety of intermediate sized shrub (DEE 2018c).	No	5.4 km south east		Unlikely

¹P = Listed by DBCA as a Priority species.

²Closest record to Survey Area based on DBCA database locations (DBCA 2017).

Likely = Suitable habitat present and records less than 5 km from the Survey Area, Possible = Suitable habitat present and records between 5km and 10 km from the Survey Area, and Unlikely = No suitable habitat present and/or records greater than 10 km from the Survey Area. En = Listed as Endangered under the EBPC Act, Vu = Listed as Vulnerable under the EBPC, Ce= Critically Endangered under the EBPC Act, P = Listed as Priority by the DPaW DRF = Declared Rare Flora as listed by the State.

2.5.2 Fauna Database Results

Database searches returned 610 fauna species known to occur within a 5 km radius of the site, of which 97 are listed under the DBCA Priority List, WC Act or EPBC Act as being of conservation significance (Appendix A).

The majority of these conservation species are listed under the EPBC Act as marine species (36), 12 are bird species, six are migratory marine birds, five are migratory terrestrial birds, 32 are migratory wetland species. Four are listed as terrestrial animal species.

One is Priority 1 species, three are Priority 2 species, two are Priority 3 species and five are Priority 4 species listed under the DBCA Priority list. Two species are listed as Other Specially protected fauna.

2.6 Vegetation

Vegetation mapping of the Broome area was completed on a broad scale (1:250,000) by Beard (1972-80). These vegetation units were re-assessed by Shepherd et al. (2001) to account for clearing in the intensive land use zone, dividing some larger vegetation units into smaller units. There is one Beard / Shepherd vegetation unit in the area. The Shepherd et al. (2001) vegetation unit is described below (Figure 6):

- **Dampierland_750:** Pindan woodland. Acacia thicket with eucalypt woodland over spinifex *Acacia tumida*, *Eucalyptus tectifera*, *Corymbia grandifolia*, *Triodia pungens*, *T. bitextura*

Table 3: Broad Vegetation Types and its State and Regional Representation (Government of Western Australia 2016)

	PRE-EUROPEAN AREA (HA)	CURRENT EXTENT (HA) 1	REMAINING (%)	CURRENT EXTENT % IN DBCMA MANAGED LANDS
Vegetation Types (Beard 1979/ Shepherd et al. 2001) in the state				
750	1,231,155.50	1,225,687.52	99.56	2.77
Vegetation Types (Beard 1979/ Shepherd et al. 2001) in the Dampierland Bioregion

4	1,221,734.45	1,217,843.72	99.68	2.78
Vegetation Types (Beard 1979/ Shepherd et al. 2001) in the Local Government Area (Shire of Broome)				
4	1,115,559.37	1,110,131.18	99.51	3.05

A search of the Department of Environment and Energy's (DoEE) *Protected Matters Search Tool* determined that there is one EPBC Act-listed Threatened Ecological Community (TEC) likely to occur within a 5 km radius of the site (DoEE 2017). This community is the Monsoon vine thickets on the coastal sand dunes of Dampier Peninsula and is classified as endangered.

2.7 Environmentally Sensitive Areas

The entire disturbance envelope is located within an Environmentally Sensitive Area (ESA) (Figure 7) which forms part of a buffer for the “Monsoon vine thickets on the coastal sand dunes of Dampier Peninsula” threatened ecological community (TEC). This TEC is not present within the proposed disturbance envelope (the nearest occurrence is ~1 km to the north east).

2.8 Conservation Areas

A desktop search confirms there are no conservation areas near to the proposed disturbance envelope.

3 Assessment Methodology

The assessment for the clearing permit application used the results of the desktop assessment (review of current and relevant literature sources, databases and GIS Information) and notes from a site inspection (SoB 2018) to determine:

- The possible impacts, environmental sensitivities and the environmental risk associated with the proposed clearing;
- Whether the proposed clearing is exempt under the EP Act or the *Environmental Protection (Clearing of Native Vegetation) Regulations 2004*; and
- The likely impacts of native vegetation clearing against the ten clearing principles, under the EP Act and Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (Regulations) (Table 4).

4 Assessment against the Ten Clearing Principles

The proposed clearing activities have been assessed against the ten clearing principles as defined in DER's *Guide to Assessment: Clearing of Native Vegetation under the Environmental Protection Act 1986*, taking into account the current extent and condition of the native vegetation on the site. This assessment is presented in Table 4.

Table 4: Assessment against 10 Clearing Principles

PRINCIPLE	ASSESSMENT
<p>Principle (a) – Native vegetation should not be cleared if it comprises a high level of biological diversity</p>	<p>A total of 400 flora species were returned in the database searches. A total of 610 fauna taxa were returned in the fauna database searches. The majority of which were marine species or bird species. The proposed development envelope does not contain significant marine fauna habitat as it included only a limited extent of shallow intertidal habitat. Due to the small development envelope within a large beach area, and given the proximity to human use areas, shore bird species are not likely to be significantly impacted.</p> <p>Of the 0.44 ha of native vegetation, 0.38 ha is terrestrial native vegetation and 0.06 ha is mangrove habitat. Some of the terrestrial vegetation to be cleared is native; however it is isolated regrowth, in poor condition, following clearing from 1974. Flora species present within the proposed disturbance envelope include <i>Acacia eriopoda</i>, <i>Cenchrus ciliaris</i> (Buffel Grass), <i>Pemna acuminata</i> and <i>Azadirachta indica</i> (SoB 2018). None of the above mentioned species are conservation significant species or priority species listed under the WC Act or EPBC Act.</p> <p>The proposed onshore disturbance area has previously been cleared and contains isolated patches of regrowth and weeds, and therefore does not represent a high level of biological biodiversity. A small number of small, isolated mangroves, at the upper limits of their range, occur within the intertidal disturbance area. These are unlikely to support a significant community.</p> <p>Assessed Outcome: Proposed clearing is <u>unlikely</u> to be at variance with this Principle.</p>

ASSESSMENT	
PRINCIPLE	
Principle (b) – Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a significant habitat for fauna indigenous to Western Australia	<p>The proposed disturbance envelope does not contain significant fauna habitat, only an isolated patch of regrowth and a small number of small, isolated mangroves at the upper limits of their range. Beyond the disturbance envelope is a much larger mapped local mangrove habitat which is more likely to be utilised by fauna species as it is denser and located lower within the intertidal area (Figure 2). Additionally there are far larger, denser areas along the wider Broome coastline, to the north and north east of the disturbance envelope that sustain healthy mangrove habitat. The clearing for the purpose of the seawall is minimal, and aims to resinate the eroding cliffs along the shoreline, and thus will contribute to the stabilisation of the beach and therefore enhance any beach habitat for fauna species (i.e. shorebirds etc.).</p> <p>The proposed disturbance area does not contain significant habitat for fauna indigenous to Western Australia.</p> <p>Assessed Outcome: The proposed clearing is <u>unlikely</u> to be at variance with this Principle.</p>
Principle (c) – Native vegetation should not be cleared if it includes, or is necessary for the continued existence of rare flora.	<p>A total of 400 flora species were returned in the 5 km buffer database searches. Of these, seven are listed under the DBCA Priority List, WC Act or EPBC Act as being of conservation significant. Only of the species was listed under the EPBC Act and WC Act, <i>Keraudrenia exastia</i> / <i>Seringia exastia</i> (<i>Fringed fire-bush</i>), and there is no suitable habitat within the proposed disturbance envelope for this species and therefore it is unlikely to occur (Table 2). The remaining six species are priority species under the DBCA Priority list, and whilst these could occur within the proposed disturbance area, they were not recorded during a site visual assessment (SoB 2018).</p> <p>The proposed disturbance area does not contain habitat necessary for the continued existence of rare flora.</p> <p>Assessed Outcome: The proposed clearing is <u>unlikely</u> to be at variance with this Principle.</p>
ASSESSMENT	
PRINCIPLE	
Principle (d) – Native vegetation should not be cleared if it comprises	<p>There are no threatened ecological communities (TEC) within the proposed disturbance area. The nearest recorded TEC is approximately 1 km north west the site. The 0.44 ha of native vegetation within the proposed disturbance envelope is not necessary for the maintenance of or part of a TEC.</p>

ASSESSMENT	
<p>PRINCIPLE the whole or a part of, or is necessary for the maintenance of a Threatened Ecological Community (TEC).</p>	<p>Assessed Outcome: The proposed clearing is <u>unlikely</u> to be at variance with this Principle.</p> <p>The proposed disturbance envelope is within the Shepherd et al. (2001) vegetation unit Dampierland_750: which the structure is described as Pindan woodland. The vegetation unit is made up of Acacia thicket with eucalypt woodland over spinifex, species include <i>Acacia tumida</i>, <i>Eucalyptus tectifera</i>, <i>Corymbia grandifolia</i>, <i>Triodia pungens</i>, and <i>T. bitextura</i>.</p> <p>The Dampierland_750 vegetation type has approximately 99.56 % of its Pre-European extent remaining within the State, 99.68 % within the Bioregion and Subregion and 99.51 % within the Shire of Broome (Government of Western Australia 2016; Table 3).</p> <p>According to the EPA's Guidance Statement No. 33, the national target is to have clearing controls in place to prevent the removal of ecological communities which are below 30% remaining (of the Pre-European extent). The EPA considers it is important that ecological communities are maintained above the threshold level of 30% of the original pre-clearing extent of each community, as communities below this threshold level show the species loss appears to accelerate exponentially at the ecosystem level (EPA 2008).</p> <p>The Dampierland_750 vegetation unit is well represented at all levels, statewide and local and well above the 30 % threshold. Therefore the clearing of 0.38 ha of regrowth, in poor condition, is not significant as a remnant of native vegetation or in an area that has been extensively cleared.</p> <p>Assessed Outcome: The proposed clearing is <u>unlikely</u> to be at variance with this Principle.</p>
<p>Principle (e) – Native vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared</p>	<p>The proposed disturbance envelope is situated on the Broome Town Beach which is described as intertidal sand/mud flat. Of the native vegetation proposed to be cleared, 0.06 ha is isolated mangroves. This 0.06 ha</p> <p>Principle (f) – Native vegetation should not be cleared if it is growing in,</p>

PRINCIPLE	ASSESSMENT
<p>or in association with, an environment associated with a watercourse or wetland.</p>	<p>of mangroves only makes up 1.3 % of the locally mapped mangrove habitat depicted in the area (Figure 2). The nearest wetland area is the Roebuck Bay wetland which is 6 km east of the proposed disturbance envelope.</p> <p>Assessed Outcome: The proposed clearing is <u>unlikely</u> be at variance with this Principle.</p>
<p>Principle (g) – Native vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation</p>	<p>The DER (2014) defined land degradation as including the following:</p> <ul style="list-style-type: none"> ● the clearing of vegetation; ● decline in vegetation condition; ● soil erosion and soil acidity (caused by wind and water erosion due to vegetation clearing); ● salinity; or ● waterlogging/flooding. <p>A minimal area of vegetation is proposed to be cleared (0.44 ha) and is located in isolated and sporadic patches within the proposed disturbance envelope, the vegetation is part of regrowth from 1974 and contains weed species. Weeds will be managed onsite by the Shire of Broome Environment Division.</p> <p>Mapping of Acid Sulfate Soils does not cover the proposed disturbance envelope, however, it is within close proximity to 'High to moderate risk' areas (Figure 8). It is not expected the clearing of the small patches of native vegetation regrowth will contribute to the acidity of the soils within the proposed disturbance envelope. The construction of the seawall will be temporary and aims to stabilise the beach cliffs and therefore will reduce the risk of any potential acid sulfate soils being exposed.</p> <p>The proposed disturbance area is prone to erosion; the purpose of this clearing permit is to clear vegetation for the purpose of developing a seawall which aims to mitigate any further erosion along the cliffs at the Town Beach. The proposal will result in overall benefit in relation to the EPA's objective for coastal processes by</p>

ASSESSMENT	
PRINCIPLE	
	<p>rectifying the existing erosion (EPA 2016). There will be negligible impact on the local shoreline given the groyne to the south and rocky geology and coastal protection measures to the north.</p> <p>Assessed Outcome: The Proposal is <u>unlikely</u> to be at variance with this Principle.</p> <p>The proposed disturbance envelope is not adjacent or nearby to any conservation areas.</p> <p>Assessed Outcome: The Proposal is <u>unlikely</u> to be at variance with this Principle.</p>
<p>Principle (h) – Native vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area</p>	<p>The clearing of 0.38 ha of isolated patches of vegetation regrowth and 0.06 ha of mangroves is unlikely to cause deterioration to the quality of surface or ground water at the site. The proposed construction of the seawall will not intersect groundwater and there are no surface water features within the proposed disturbance envelope.</p> <p>Assessed Outcome: The Proposal is <u>unlikely</u> to be at variance with this Principle.</p>
<p>Principle (i) – Native vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water</p>	<p>The clearing of 0.38 ha of isolated patches of vegetation regrowth and 0.06 ha of mangroves is unlikely to cause or exacerbate flooding. The purpose of the clearing is to build a seawall 400 m along the shoreline to prevent the erosion of the existing beach cliffs. The sea wall will stabilise the beach and cliffs and thus mitigate the risk of flooding occurring beyond the beach.</p> <p>Assessed Outcome: The Proposal is <u>unlikely</u> to be at variance with this Principle.</p>
<p>Principle (j) – Native vegetation should not be cleared if clearing the vegetation is likely to cause, or exacerbate, the incidence of flooding</p>	<p>The clearing of 0.38 ha of isolated patches of vegetation regrowth and 0.06 ha of mangroves is unlikely to cause or exacerbate flooding. The purpose of the clearing is to build a seawall 400 m along the shoreline to prevent the erosion of the existing beach cliffs. The sea wall will stabilise the beach and cliffs and thus mitigate the risk of flooding occurring beyond the beach.</p> <p>Assessed Outcome: The Proposal is <u>unlikely</u> to be at variance with this Principle.</p>

5 Summary of Assessment and Conclusion

In summary, and following desktop searches and site inspections of the proposed disturbance envelope, it is considered that the proposed clearing not likely to be at variance with any of the ten clearing Principles.

This is due to the minimal area of vegetation to be cleared which does not contain significant habitat for flora or fauna species; the site is also highly fragmented due to previous clearing. The proposed clearing will facilitate the improvement of current land erosion and degradation.

6 Limitations

This report is produced strictly in accordance with the scope of services set out in the contract or otherwise agreed in accordance with the contract. 360 Environmental makes no representations or warranties in relation to the nature and quality of soil and water other than the visual observation and analytical data in this report.

In the preparation of this report, 360 Environmental has relied upon documents, information, data and analyses (“client’s information”) provided by the client and other individuals and entities. In most cases where client’s information has been relied upon, such reliance has been indicated in this report. Unless expressly set out in this report, 360 Environmental has not verified that the client’s information is accurate, exhaustive or current and the validity and accuracy of any aspect of the report including, or based upon, any part of the client’s information is contingent upon the accuracy, exhaustiveness and currency of the client’s information. 360 Environmental shall not be liable to the client or any other person in connection with any invalid or inaccurate aspect of this report where that invalidity or inaccuracy arose because the client’s information was not accurate, exhaustive and current or arose because of any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to 360 Environmental.

Aspects of this report, including the opinions, conclusions and recommendations it contains, are based on the results of the investigation, sampling and testing set out in the contract and otherwise in accordance with normal practices and standards. The investigation, sampling and testing are designed to produce results that represent a reasonable interpretation of the general conditions of the site that is the subject of this report. However, due to the characteristics of the site, including natural variations in site conditions, the results of the investigation, sampling and testing may not accurately represent the actual state of the whole site at all points.

It is important to recognise that site conditions, including the extent and concentration of contaminants, can change with time. This is particularly relevant if this report, including the data, opinions, conclusions and recommendations it contains, are to be used a considerable time after it was prepared. In these circumstances, further investigation of the site may be necessary.

Subject to the terms of the contract between the Client and 360 Environmental Pty Ltd, copying, reproducing, disclosing or disseminating parts of this report is prohibited (except to the extent required by law) unless the report is produced in its entirety including this page, without the prior written consent of 360 Environmental Pty Ltd.

EPBC PMST Search and NatureMap Report

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 20/02/18 16:23:07

[Summary](#)

[Details](#)

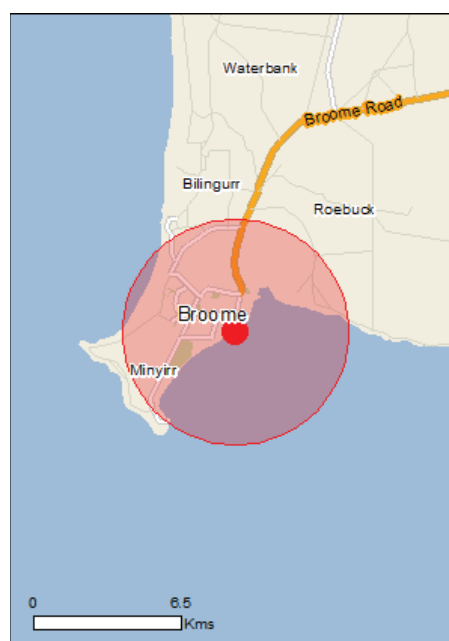

[Matters of NES](#)

Buffer: 5.0Km

Summary

Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	1
Wetlands of International Importance:	1
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	1
Listed Threatened Species:	30
Listed Migratory Species:	65

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Land:	2
Commonwealth Heritage Places:	None
Listed Marine Species:	105
Whales and Other Cetaceans:	12
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Commonwealth Reserves Marine:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have nominated.

State and Territory Reserves:	1
Regional Forest Agreements:	None
Invasive Species:	10
Nationally Important Wetlands:	1
Key Ecological Features (Marine)	None

Details

Matters of National Environmental Significance

National Heritage Properties [\[Resource Information \]](#)

Name	State	Status
Natural		
The West Kimberley	WA	Listed place

Wetlands of International Importance (Ramsar) [\[Resource Information \]](#)

Name	Proximity
Roebuck bay	Within 10km of Ramsar

Listed Threatened Ecological Communities [\[Resource Information \]](#)

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Name	Status	Type of Presence
Monsoon vine thickets on the coastal sand dunes of Dampier Peninsula	Endangered	Community likely to occur within area

Listed Threatened Species [\[Resource Information \]](#)

Name	Status	Type of Presence
Birds		
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Critically Endangered	Roosting known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Roosting known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Limosa lapponica baueri Bar-tailed Godwit (baueri), Western Alaskan Bar-tailed Godwit [86380]	Vulnerable	Species or species habitat known to occur within area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Bar-tailed Godwit (menzbieri) [86432]	Critically Endangered	Species or species habitat known to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Polytelis alexandrae Princess Parrot, Alexandra's Parrot [758]	Vulnerable	Species or species habitat likely to occur within area

Name	Status	Type of Presence
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat may occur within area
Tyto novaehollandiae kimberli Masked Owl (northern) [26048]	Vulnerable	Species or species habitat may occur within area
Mammals		
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Macrotis lagotis Greater Bilby [282]	Vulnerable	Species or species habitat known to occur within area
Megaptera novaeangliae Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area
Saccolaimus saccolaimus nudicluniatus Bare-rumped Sheath-tailed Bat, Bare-rumped Sheath-tail Bat [66889]	Vulnerable	Species or species habitat likely to occur within area
Xeromys myoides Water Mouse, False Water Rat, Yirrkoo [66]	Vulnerable	Species or species habitat may occur within area
Plants		
Keraudrenia exastia Fringed Keraudrenia [66301]	Critically Endangered	Species or species habitat known to occur within area
Reptiles		
Aipysurus apraefrontalis Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Ctenotus angusticeps Airlie Island Ctenotus [25937]	Vulnerable	Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding likely to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Sharks		
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat known to occur within area

Name	Status	Type of Presence
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area

Listed Migratory Species [[Resource Information](#)]

* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.

Name	Threatened	Type of Presence
Migratory Marine Birds		
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat known to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat known to occur within area
Sternula albifrons Little Tern [82849]		Foraging, feeding or related behaviour known to occur within area
Migratory Marine Species		
Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Dugong dugon Dugong [28]		Foraging, feeding or related behaviour known to occur within area

Name	Threatened	Type of Presence
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding likely to occur within area
Manta alfredi Reef Manta Ray, Coastal Manta Ray, Inshore Manta Ray, Prince Alfred's Ray, Resident Manta Ray [84994]		Species or species habitat may occur within area
Manta birostris Giant Manta Ray, Chevron Manta Ray, Pacific Manta Ray, Pelagic Manta Ray, Oceanic Manta Ray [84995]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Orcaella brevirostris Irrawaddy Dolphin [45]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat known to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Sousa chinensis Indo-Pacific Humpback Dolphin [50]		Breeding known to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Migratory Terrestrial Species		
Cecropis daurica Red-rumped Swallow [80610]		Species or species habitat known to occur within area
Cuculus optatus Oriental Cuckoo, Horsfield's Cuckoo [86651]		Species or species habitat known to occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat known to occur within area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area
Motacilla flava Yellow Wagtail [644]		Species or species habitat known to occur within area
Migratory Wetlands Species		
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur

Name	Threatened	Type of Presence
Arenaria interpres Ruddy Turnstone [872]		within area Roosting known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]		Roosting known to occur within area
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat known to occur within area
Calidris ruficollis Red-necked Stint [860]		Roosting known to occur within area
Calidris tenuirostris Great Knot [862]	Critically Endangered	Roosting known to occur within area
Charadrius bicinctus Double-banded Plover [895]		Roosting known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Roosting known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Roosting known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area
Glareola maldivarum Oriental Pratincole [840]		Roosting known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]		Roosting known to occur within area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]		Roosting known to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area

Name	Threatened	Type of Presence
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]		Roosting known to occur within area
Tringa brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
Tringa totanus Common Redshank, Redshank [835]		Roosting known to occur within area
Xenus cinereus Terek Sandpiper [59300]		Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Land [\[Resource Information \]](#)

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Hirundo rustica Barn Swallow [662]		Species or species habitat known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]		Roosting known to occur within area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]		Roosting known to occur within area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area
Motacilla flava Yellow Wagtail [644]		Species or species habitat known to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]		Roosting known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area
Rostratula benghalensis (sensu lato) Painted Snipe [889]	Endangered*	Species or species habitat may occur within area
Sterna albifrons Little Tern [813]		Foraging, feeding or related behaviour known to occur within area

Name	Threatened	Type of Presence
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
Tringa totanus Common Redshank, Redshank [835]		Roosting known to occur within area
Xenus cinereus Terek Sandpiper [59300]		Roosting known to occur within area
Fish		
Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus nitidus Glittering Pipefish [66224]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribbioned Pipehorse, Ribbioned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area

Name	Threatened	Type of Presence
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Solenostomus paegnius Rough-snout Ghost Pipefish [68425]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammals		
Dugong dugon Dugong [28]		Foraging, feeding or related behaviour known to occur within area
Reptiles		
Acalyptophis peronii Horned Seasnake [1114]		Species or species habitat may occur within area
Aipysurus apraefrontalis Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area
Aipysurus duboisii Dubois' Seasnake [1116]		Species or species habitat may occur within area
Aipysurus eydouxii Spine-tailed Seasnake [1117]		Species or species habitat may occur within

Name	Threatened	Type of Presence area
Aipysurus laevis Olive Seasnake [1120]		Species or species habitat may occur within area
Aipysurus tenuis Brown-lined Seasnake [1121]		Species or species habitat may occur within area
Astrotia stokesii Stokes' Seasnake [1122]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus johnstoni Freshwater Crocodile, Johnston's Crocodile, Johnston's River Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Disteira kingii Spectacled Seasnake [1123]		Species or species habitat may occur within area
Disteira major Olive-headed Seasnake [1124]		Species or species habitat may occur within area
Emydocephalus annulatus Turtle-headed Seasnake [1125]		Species or species habitat may occur within area
Ephalophis greyi North-western Mangrove Seasnake [1127]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding likely to occur within area
Hydrelaps darwiniensis Black-ringed Seasnake [1100]		Species or species habitat may occur within area
Hydrophis elegans Elegant Seasnake [1104]		Species or species habitat may occur within area
Hydrophis mcdowellii null [25926]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Seasnake, Ornate Reef Seasnake [1111]		Species or species habitat may occur within area
Lapemis hardwickii Spine-bellied Seasnake [1113]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Name	Threatened	Type of Presence
Pelamis platurus Yellow-bellied Seasnake [1091]		Species or species habitat may occur within area
Whales and other Cetaceans		[Resource Information]
Name	Status	Type of Presence
Mammals		
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area
Orcaella brevirostris Irrawaddy Dolphin [45]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Sousa chinensis Indo-Pacific Humpback Dolphin [50]		Breeding known to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area

Extra Information

State and Territory Reserves [\[Resource Information \]](#)

Name	State
Unnamed WA51497	WA

Invasive Species [\[Resource Information \]](#)

Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.

Name	Status	Type of Presence
------	--------	------------------

Birds

Columba livia Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area
----------------------------------------------------------------	--	--------------------------------------------------------

Sturnus vulgaris Common Starling [389]		Species or species habitat likely to occur within area
-------------------------------------------	--	--------------------------------------------------------

Mammals

Felis catus Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
--------------------------------------------------	--	--------------------------------------------------------

Mus musculus House Mouse [120]		Species or species habitat likely to occur within area
-----------------------------------	--	--------------------------------------------------------

Rattus rattus Black Rat, Ship Rat [84]		Species or species habitat likely to occur within area
-------------------------------------------	--	--------------------------------------------------------

Plants

Cenchrus ciliaris Buffel-grass, Black Buffel-grass [20213]		Species or species habitat likely to occur within area
---------------------------------------------------------------	--	--------------------------------------------------------

Dolichandra unguis-cati Cat's Claw Vine, Yellow Trumpet Vine, Cat's Claw Creeper, Funnel Creeper [85119]		Species or species habitat likely to occur within area
-------------------------------------------------------------------------------------------------------------	--	--------------------------------------------------------

Jatropha gossypifolia Cotton-leaved Physic-Nut, Bellyache Bush, Cotton-leaf Physic Nut, Cotton-leaf Jatropha, Black Physic Nut [7507]		Species or species habitat likely to occur within area
------------------------------------------------------------------------------------------------------------------------------------------	--	--------------------------------------------------------

Reptiles

Hemidactylus frenatus Asian House Gecko [1708]		Species or species habitat likely to occur within area
---------------------------------------------------	--	--------------------------------------------------------

Ramphotyphlops braminus Flowerpot Blind Snake, Brahminy Blind Snake, Cacing Besi [1258]		Species or species habitat likely to occur within area
--------------------------------------------------------------------------------------------	--	--------------------------------------------------------

Roebuck Bay	WA

Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

Conservation Codes

- T - Rare or likely to become extinct
- X - Presumed extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

¹ For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

NatureMap Species Report

Created By Guest user on 20/02/2018

Current Names Only Yes

Conservation Codes

- T - Rare or likely to become extinct
- X - Presumed extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

¹ For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.
