Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), see the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

Part 4: Proposed amendments	
<p>Additional information to support the assessment of your application to amend may be attached.</p> <p>Please ensure you have included the following as part of your application:</p> <ul style="list-style-type: none"> a photocopy of the granted clearing permit, with proposed changes highlighted, <i>and</i> payment of the prescribed fee. <p>When providing details of the proposed change(s), if any additional clearing is proposed, include details of:</p> <ul style="list-style-type: none"> the proposed method of the clearing; the purpose of the clearing; the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); <i>and</i> the final land use. 	<p>Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es):</p> <p><input type="checkbox"/> Extend the duration of the clearing permit.</p>
	<p><input type="checkbox"/> Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.</p>
	<p><input checked="" type="checkbox"/> Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.</p>
	<p><input type="checkbox"/> Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i></p>
	<p><input type="checkbox"/> Make a correction to the clearing permit.</p>
	<p><input type="checkbox"/> Other.</p>
	<p>Provide details of the proposed change(s), and the rationale(s) for it / them.</p> <p>1) Increase <i>Area of Clearing</i> from 200ha to 400ha to enable the clearing associated with the Orelia Phase 1 pit cutback; and, 2) Extend duration of the permit by 5 years from current date (to 2026). The proposed method of vegetation clearing will be undertaken by a bulldozer. The underlying topsoil will be harvested and stockpiled by the mining fleet. The purpose of the clearing is <i>Clearing for the purpose of mineral production and associated activities</i>. This remains unchanged from the existing clearing permit CPS 8019/1. Clearing activities are expected to commence in quarter 1 2022 to support the Orelia Phase 1 Pit Development. It is expected the Orelia Mine will be operational for 4.5 years (pending approval). As per the Bronzewing Mine Closure Plan Revision 7.0, the planned post mining land use is: <i>returning to a self-sustaining ecosystem representative of the local environment where light grazing may be undertaken. Given the underlying tenure are the Barwidgee and Yandal Pastoral leases, the proposed post-mining land use at the Project will be to reinstate, where practical, the pre-mining pastoral land-use.</i></p>
<p>For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.</p>	<p>State the nature of the applicant’s authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission. <i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i></p> <p>Mining tenure – Mining Leases. Refer to attached tenement holder reports for M36/146 & M36/200.</p>
<p>Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.</p>	<p>Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties.</p> <p>Mining tenure – Mining Leases. Refer to attached tenement holder reports for M36/146 & M36/200.</p>
<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, provide details:</p> <p>Northern Star do not intend to clear the total clearing permit footprint. The associated approved and proposed Mining Proposals (REG ID 74813 and 99184) allowed for disturbance 470ha and 227ha respectively. The large proportion of disturbance will be within the existing disturbance footprint. The proposed CPS8019/1 amendment will allow for the required clearing on rehabilitated landforms and native vegetation.</p>
