## **CLEARING PERMIT APPLICATION SITE IMAGES – 4<sup>TH</sup> JUNE 2018**

The area covered by this clearing permit application was illegally cleared and continuously cropped by the previous lessee. Photos below show the infestation of broad leaf and woody weeds and indications of continued erosion.

It is the aim of the current lessee to regenerate this area through initial cropping to maintain groundcover over the wet season and section by section plant to grasses approved by the Pastoral Lands Board through the diversification permit process.

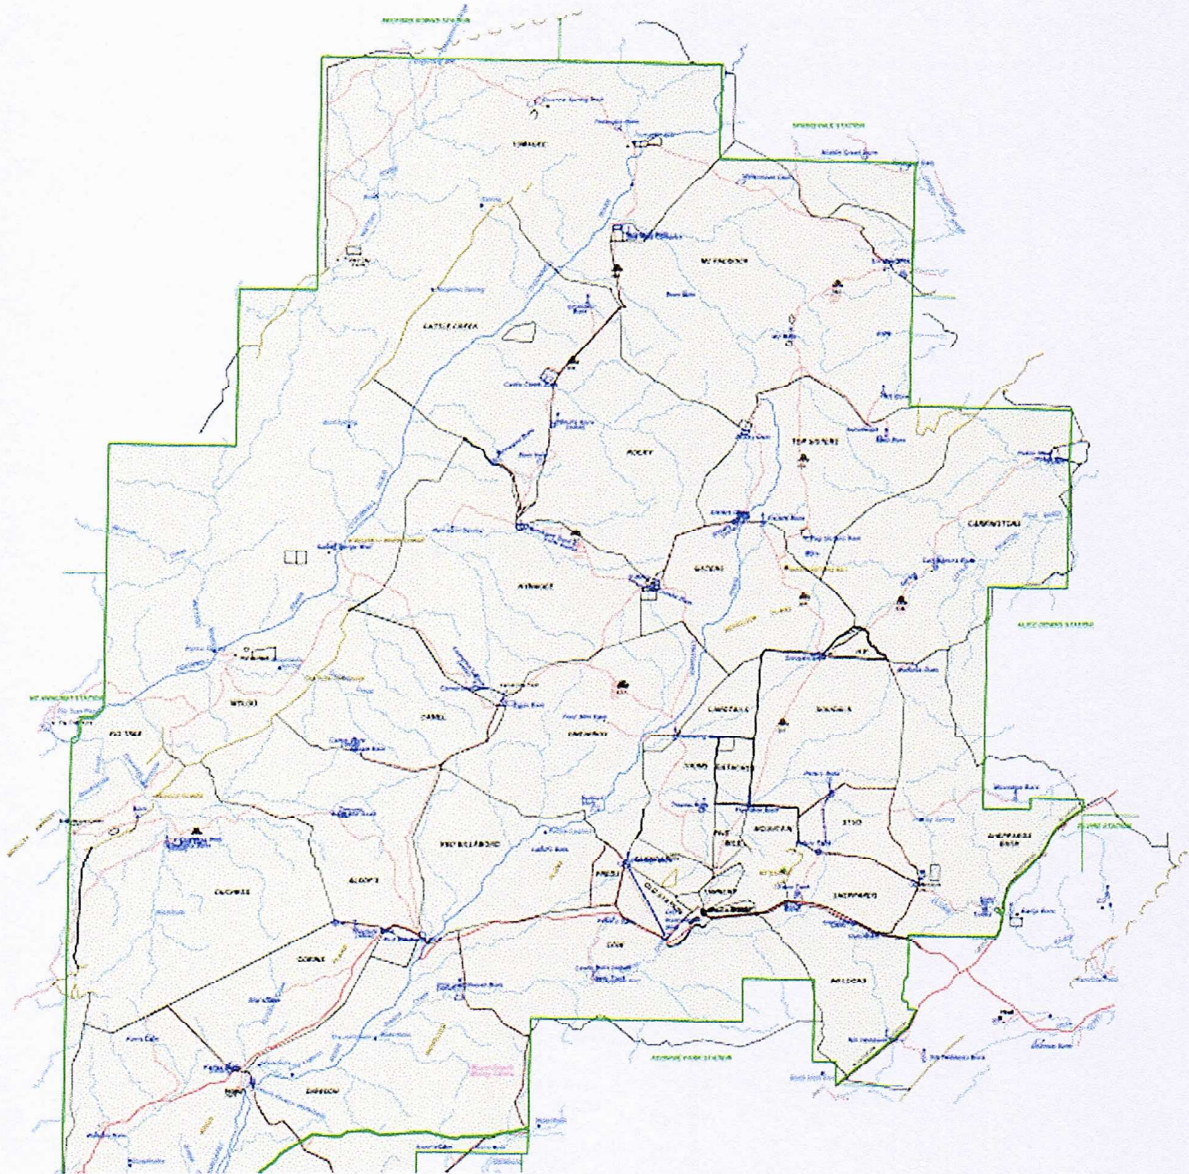

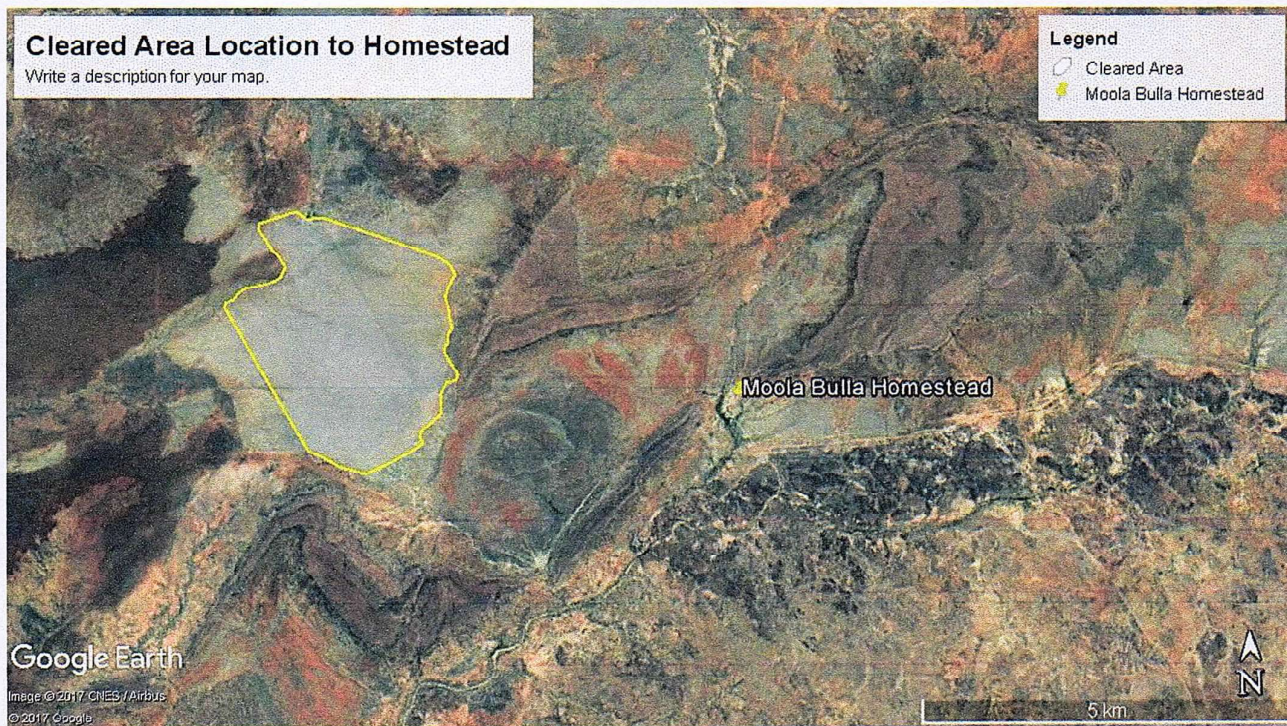

**Natural pastures outside the cleared area.**
