Area of land that will be subjected to surface reforming and clearing of minimal native vegetation is within the fenced fly ash dam area compound.
Area: ~ 6.5 hectare

Perron Quarry fly ash dam perimeter fence

The Perron Quarry fly ash dam (former limestone quarry) is a retired asset that requires rehabilitation earthworks to provide a stable and safe landform. The NVCP permit application is only applicable to land within the fly ash dam area which is clearly defined by a perimeter fence. Vegetation within the fly ash dam area was removed during construction activities over 30 years ago. The landscape today mainly consists of weed species with a few interspersed native species which are present in thickets (*A. rostellifera*) and individually dispersed. The rehabilitated land will remain vacant, however, the eastern portion of the eastern cell will form part of the proposed North South District Distributor Road (Landcorp Project).

The following flora list is indicative of the main species that are present within the Perron Quarry fly ash dam area.

Native Species:

- ~ 66 - *Acacia rostellifera* (summer scented wattle) thickets
- ~ 12 - *Lepospermum laevigatum* (tea tree)
- 1 *Eucalyptus radix* (flooded gum)

Approximately 79 natives species require removal

Weed species:

- Olea europaea* (Olive tree)
- Cortaderia selloana* (Pampas grass)
- Ricinus communis* (Castor oil plant)
- Schinus terebinthifolius* (Japanese pepper)
- Palaquium capitulatum* (Rose scented pelargonium)
- Euphorbia terracina* (lalse caper)
- Asphodelus fistulosus* (onion weed)
- Pennisetum clandestinum* (Kikuyu grass)
