CPS No. 8207/2

Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), see the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

Part 4: Proposed amendments	
<p>Additional information to support the assessment of your application to amend may be attached.</p> <p>Please ensure you have included the following as part of your application:</p> <ul style="list-style-type: none"> • a photocopy of the granted clearing permit, with proposed changes highlighted, <i>and</i> • payment of the prescribed fee. <p>When providing details of the proposed change(s), if any additional clearing is proposed, include details of:</p> <ul style="list-style-type: none"> • the proposed method of the clearing; • the purpose of the clearing; • the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); <i>and</i> • the final land use. 	<p>Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es):</p> <p><input type="checkbox"/> Extend the duration of the clearing permit.</p> <p><input type="checkbox"/> Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.</p> <p><input checked="" type="checkbox"/> Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.</p> <p><input type="checkbox"/> Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i></p> <p><input type="checkbox"/> Make a correction to the clearing permit.</p> <p><input type="checkbox"/> Other.</p> <p>Provide details of the proposed change(s), and the rationale(s) for it / them.</p> <p>Clearing will be undertaken by earthmoving machinery for the purpose of decommissioning and rehabilitation of the Woodada Gas Field (WGF).</p> <p>Clearing will mostly occur on the outside of infrastructure areas (see attached shape file) to decommission and rehabilitate infrastructure, pipelines and roads. Existing vegetation within the area to be rehabilitated and an area approximately 10 m wide around the edges of the rehabilitation area is to be mulched and respread once earthworks have been completed. This will assist with rehabilitation activities as per our advice from our Rehabilitation Specialist Contractor.</p> <p>A total of 20 ha clearing is currently permitted under CPS 8207/2, of which 0.025 ha has been cleared to date for well intervention activities in early 2022.</p> <p>AWE Perth Pty Ltd is seeking approval to increase the clearing permit boundary and increase the approved clearing area to 40 ha. This is to address the recent preferred approach of Department of Biodiversity, Conservation and Attractions (DBCA) for full removal of WGF buried pipelines and flowlines versus the previously agreed approach for partial removal of these lines. The proposed increase in clearing permit boundary and approved clearing areas is necessary to support the removal and rehabilitation of underground pipelines and flowlines that were previously approved to be left in situ.</p> <p>The majority of clearing is likely to be undertaken in Q1 2023 to support Phase 2A of decommissioning and rehabilitation activities which is scheduled to commence in Q1 2023. Well sites that have not been plugged and abandoned will be cleared and rehabilitated at a later date subsequent to these wells being plugged and abandoned. The final land use will form part of the existing Nature Reserve managed by DBCA.</p> <p>Clearing will only occur in the amended attached shape file.</p>
<p>For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.</p>	<p>State the nature of the applicant's authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission.</p> <p><i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i></p> <p>Petroleum titles - Production Licence L4 and L5, Pipeline Licence PL6 (R3)</p>
<p>Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.</p>	<p>Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties.</p> <p>Lake Logue Nature Reserve (LLNR) (class C, 29073) and Un-named Nature Reserve (NR) (39744) managed by the Department of Biodiversity, Conservation and Attractions (DBCA).</p>

Part 4: Proposed amendments
